

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

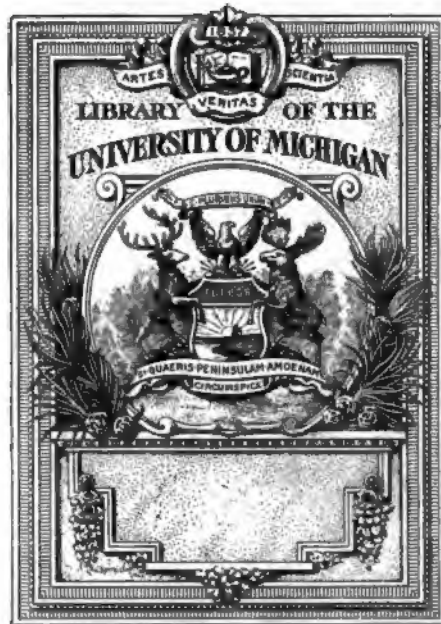

### About Google Book Search

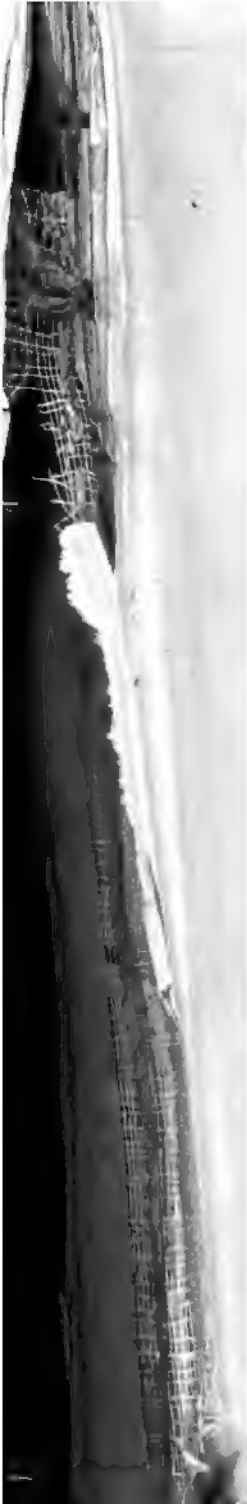

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Presented 6th April, 1906.—*Mr. Smith (Nanaimo)*..... *Not printed.*
- 81.** Return to an order of the House of Commons, dated 14th March, 1906, showing the names of all the homestead inspectors at present attached to the thirteen agencies throughout Manitoba and the Northwest, and a record showing the number of days that each inspector was absent from his regular duties, between the 1st of July and the 31st December, 1905, the cause of said absence, and a statement of expenses for each month during that period. Presented 5th April, 1906.—*Mr. McCarthy (Calgary)*..... *Not printed.*
- 82.** Return to an address of the House of Commons, dated 2nd April, 1906, for a copy of the order in council appointing Mr. W. A. Weeks to investigate certain matters in dispute respecting lands taken by the Prince Edward Island Railway, and certain other matters in dispute connected with that railway; also a copy of the evidence and report of the said W. A. Weeks in the matter. Presented 6th April, 1906.—*Mr. Martin (Queen's)*..... *Not printed.*
- 83.** Return to an order of the House of Commons, dated 14th March, 1906, for copies of all correspondence had between the government or any department or member thereof, and the Transcontinental Construction Commission, in reference to the surveys of location of the route of the Transcontinental Railway, in the province of New Brunswick. Presented 6th April, 1906.—*Mr. Crockett.* *Not printed.*
- 83a.** Return to an order of the House of Commons, dated 18th April, 1906, for copies of all correspondence had between the Grand Trunk Pacific Railway Company and the government or any department thereof, and between the Grand Trunk Pacific Railway Company and the Transcontinental Railway Commission, in reference to the survey and location of the proposed Transcontinental Railway between Quebec and Moncton. Presented 1st June, 1906.—*Mr. Crockett*..... *Not printed.*
- 84.** Return to an order of the House of Commons, dated 14th March, 1906, for copies of all forms of application for homestead entries used since the year 1890. Presented 6th April, 1906.—*Mr. Ingram.*  
*Not printed.*
- 85.** Statement showing the wharfs transferred to the department of marine and fisheries since 1896. Presented 6th April, 1906, by Hon. L. P. Brodeur..... *Not printed.*
- 86.** Return to an order of the House of Commons, dated 19th March, 1906, (a) setting forth the various laws in the United Kingdom, and in the various dependencies and colonies of the Empire, with respect to the naturalization of aliens; (b) defining the effect of naturalization consummated in Great Britain, or in the various colonies or dependencies, respectively, when a person so naturalized becomes domiciled thereafter, in any other portion of the Empire; (c) setting forth any efforts heretofore made by the government of the United Kingdom, or of any colony or dependency, or by any body or association, for the purpose of securing uniformity in the naturalization laws throughout the Empire. Presented 6th April, 1906.—*Mr. Borden (Carleton).*

*"Report of Departmental Committee" printed for Sessional Papers*

---

---

## CONTENTS OF VOLUME 14—*Continued.*

87. Copy of a letter addressed to S. G. Curry, Esquire, architect, informing him that, under an order in council, a commission will be to-day issued to him jointly with Mr. A. C. Hutchison, architect, of Montreal, to hold an investigation and to report upon an accident which occurred on the morning of the 5th instant, by the collapse of part of the tower in the west block extension of the departmental buildings in this city. Plans and specifications of the said extension accompany the said letter. Presented 9th April, 1906, by Hon. C. S. Hyman ..... *Not printed.*
88. Return to an order of the House of Commons, dated 6th March, 1905, for copies of all reports, returns, estimates, correspondence, writings, records, documents, memoranda, or written or printed information of any kind in the possession or control of the post office department, in reference to the question of establishing rural mail delivery in Canada, or the manner of establishing or conducting such service, and the probable cost; including any information in the possession of the department as to the working of the United States system, or such a service or system elsewhere and the annual expense and other particulars. Presented 9th April, 1906.—*Mr. Lennox.*  
*Printed for Sessional Papers.*
89. Return to an order of the House of Commons, dated 2nd April, 1906, for a copy of all correspondence, letters, telegrams, memorials or other documents, between the post office department, or any official thereof, and any person or persons, respecting the removal of the post office in the town of Thornedale, Ontario, from the place of business of Mr. S. Duffins, to the place of business of Mr. J. Falconer. Presented 9th April, 1906.—*Mr. Elson.* ..... *Not printed.*
90. Return to an order of the House of Commons, dated 19th March, 1906, showing all timber lands sold or leased by the department of the interior subsequent to the date of those included in Sessional Paper No. 39, brought down to the house on the 12th March, 1906; the description and area of such lots, the applications made therefor, the notice of advertisement for sale or tender, the tenders received, the amount of each tender, the tenders accepted, the name and address of the person or company to whom each lot was sold or leased. Presented 9th April, 1906.—*Mr. Foster.* ..... *Not printed.*
91. Return to an order of the House of Commons, dated 14th March, 1906, showing: 1. The number of homesteaders to make entry in and for the territory now included in the provinces of Manitoba, Saskatchewan and Alberta, during each year between 1896 and 31st December, 1905. 2. The nationality of said homesteaders, dividing same into the following categories: (a) British North America; (b) Great Britain and Ireland; (c) the United States; (d) France, Belgium and Switzerland; (e) Germany, Holland, Norway, Sweden, Denmark and Iceland; (f) all other countries of continental Europe; (g) all other nationalities; (h) persons who previously made entry. Presented 9th April, 1906.—*Mr. Wilson (Lennox and Addington).* ..... *Not printed.*
- 91a. Return to an order of the House of Commons, dated 14th March, 1906, showing: 1. The number of authorizations granted, under the authority of subsection 3 of article 34 of the Dominion Lands Act, for one person to make homestead entry on behalf of another person, during each of the years of 1901, 1902, 1903, 1904 and 1905. 2. Of the homestead entries made in consequence of said authorizations, during each of the years 1901 and 1902; how many have resulted in a demand for a patent; how many have been cancelled; how many stood upon the books of the department of the interior on 1st January, 1906, as neither patented nor cancelled. 3. How many of the homesteads entered for during 1901 and 1902 on behalf of absent parties by means of powers of attorney, have been patented in the name of the person for whom the original entry was made. Presented 11th April, 1906. *Mr. Lake.* ..... *Not printed.*
- 91b. Return to an order of the House of Commons, dated 11th March, 1906, showing, in respect of every case where, during the year ending 30th June, 1905, and during the six months ending 31st December, 1905, an extension of time within which to complete his entry, has been accorded any homesteader within the territory now included in the provinces of Manitoba, Saskatchewan and Alberta; giving: (a) the name of the applicant for said extension; (b) his post office address at the time of original entry; (c) the date and agency of original homestead entry; (d) the location of the land in question, indicating township, range and section; (e) the earliest date at which applicant might have become entitled to secure a patent, had all conditions been promptly fulfilled; (f) post office address of applicant at time of demand for extension; (g) the date of demand for extension; (h) the length of extension granted; (i) the cause of granting extension; (j) the name or names of any and all parties who may have communicated with the department for the purpose of recommending the granting of said extension; (k) the name of the homestead inspector who reported on

## CONTENTS OF VOLUME 14—*Continued.*

- the case, and whether he advised in favour of granting an extension or the contrary ; (i) the name and address of any and every person who shall have applied to record a cancellation against said section or part thereof. All the above information to be arranged according to agencies. Presented 11th April, 1906.—*Mr. Ames*..... *Not printed.*
- 91c. Return to an order of the House of Commons, dated 14th March, 1906, showing : (a) the number of land sales, withdrawing even sections from homestead entry, made by the department of the interior during the year 1904-5, and during the six months ending 31st December, 1905, together with the total acreage represented thereby ; (b) the same regarding land sales affecting only odd sections ; (c) the same regarding land sales affecting solid blocks of both even and odd sections. Presented 23rd April, 1906.—*Mr. McCarthy (Calgary)*..... *Not printed.*
- 91d. Return to an order of the House of Commons, dated 14th March, 1906, showing : 1. The number of homestead entries recorded each fiscal year from 1870 to 1905, and also during the six months ending 31st December, 1905, for the territory comprised in the present provinces of Manitoba, Saskatchewan and Alberta. 2. The number and percentage of such entries for each year for which patents have prior to the 31st December, 1905, been granted, or recommendations made for the issue of patents. 3. The number and percentage of such entries for each year that have, prior to the 31st December, 1905, been cancelled. 4. The number and percentage of such entries for each year which, neither patented or cancelled, remained in an incomplete state on the first of January, 1906. Presented 8th June, 1906.—*Mr. Lake*..... *Not printed.*
92. Return to an order of the House of Commons, dated 14th March, 1906, showing the name and post office address of each person or company having a closed grazing lease, granted for a period of more than three years, by the department of the interior, of lands in Alberta or Saskatchewan, giving in each instance, (a) the location boundaries and area of each tract of land so leased ; (b) the date of issue and of expiry of said lease ; (c) the annual rental specified therein ; (d) and the amount of overdue rental wherever such be the case. Presented 9th April, 1906.—*Mr. Ames*..... *Not printed.*
93. Return to an address of the House of Commons, dated 28th March, 1906, for copies of all correspondence, telegrams, memoranda, reports and orders in council, in possession of the government, or any member or official thereof, in connection with the grant of an additional subsidy to the province of Prince Edward Island in 1901, of \$30,000 a year, and the basis on which the said subsidy was agreed to be paid to the province. Presented 10th April, 1906.—*Mr. Martin (Queen's)*..... *Not printed.*
94. Return to an order of the House of Commons, dated 2nd April, 1906, for copies of all correspondence and contracts, if any, list of payments to men employed by the department of marine and fisheries in construction of Lake Ocebe lighthouse, on the Maganetawan River, district of Parry Sound. Presented 10th April, 1906.—*Mr. Bennett*..... *Not printed.*
95. Return to an address of the House of Commons, dated 17th April, 1906, for copies of orders in council and correspondence having reference to the assumption by the department of railways and canals of the several dams owned by the Ontario government on the head and subsidiary waters of the Trent canal. Presented 17th April, 1906.—*Hon. H. R. Emmerson*..... *Not printed.*
- 95a. Return to an order of the House of Commons, dated 9th April, 1906, showing the progress made and sums expended from time to time upon the construction of the Trent canal, giving the dates of the various contracts let, the completion of said contracts, the names of contractors on said contracts, the amount paid in extras, and the causes of these extras. Presented 26th April, 1906.—*Mr. Hughes (Victoria)*..... *Not printed.*
96. Return to an address of the House of Commons, dated 14th March, 1906, for copies of all correspondence between the provincial governments on the subject of the readjustment of provincial subsidies. Presented 17th April, 1906.—*Mr. Parmelee*..... *Printed for both distribution and sessional papers.*
97. Return to an order of the House of Commons, dated 14th March, 1906, for copies of all petitions, reports, letters, notices, telegrams, correspondence, recommendations, bonds, leases, papers and documents in relation to a site and new post office building in the county of Elgin, at Aylmer. Presented 17th April, 1906.—*Mr. Ingram*..... *Not printed.*
98. Return to an order of the House of Commons, dated 28th March, 1906, showing all amounts paid for dredging in the province of Ontario, from the 1st July, 1905, up to the present time ; the place where such work was performed ; the names of parties doing such work, and the amount paid therefor ; also of any unpaid amounts due or alleged to be due for dredging, showing the amount, the parties claiming, and where the work was done. Presented 17th April, 1906.—*Mr. Bennett*..... *Not printed.*

CONTENTS OF VOLUME 14—*Continued.*

99. Return to an order of the House of Commons, dated 17th April, 1906, for copy of a circular letter, dated the 19th March, 1906, addressed to the judges of the various courts throughout the Dominion by the deputy minister of justice, embodying the question propounded in the house of commons on the 14th March, 1906, regarding the manner in which the provisions of section 7 of 4 and 5 Edward VII, cap. 31, are being observed, and the answer given thereto on behalf of the government by the minister of justice. Presented 17th April, 1906.—*Hon. C. Fitzpatrick*. . . . . *Not printed.*
- 99a. Return to an order of the House of Commons, dated 28th March, 1906, showing, (a) the number of judges whose salaries are paid out of the consolidated revenue of Canada; (b) the name and residence of each judge; (c) the amount of salary and expenses paid to each judge; (d) the area of the judicial district in which such judge exercises jurisdiction, and in the case of local, district, and county judges, the population of the district; (e) the number of cases tried by each judge in each year since the 1st January, 1901; (f) the number of motions, petitions, &c., disposed of by each judge during each year, at chambers or in a summary manner; (g) the number of days during which each judge was actually engaged in the performance of judicial duties; (h) the number of days during which each judge was engaged in any occupation, business or matter other than the performance of his judicial duties. Presented 17th April, 1906.—*Mr. Leanoz*. . . . . *Not printed.*
100. Return to an order of the House of Commons, dated 9th April, 1906, for a copy of the report made by the deputy minister of labour, on the result of his investigation into the complaints of the Winnipeg printers, and any papers, showing what action, if any, has been taken by the government on his report. Presented 17th April, 1906.—*Mr. Verville*. . . . . *Not printed.*
101. Return to an order of the House of Commons, dated 28th March, 1906, showing what land sales have been made in blocks or area of more than one-half section, during the years 1903, 1904 and 1905, in Manitoba, the Territories, including the new provinces of Alberta and Saskatchewan, and British Columbia; to whom the same were sold in each instance; the price per acre, and the date of sale in each instance. Presented 17th April, 1906.—*Mr. Sproule*. . . . . *Not printed.*
102. Return to an order of the House of Commons, dated 13th March, 1905: 1. For copies of all advertisements, tenders, contracts, plans, specifications and papers, relating to the construction of the several sections of the Murray Harbour Branch Railway. 2. Of the several articles of rolling stock referred to at page 2186 of Hansard of 28th April, 1904, supplied on capital account to the aforesaid railway in each of the years there mentioned; with the prices at which each article was charged to capital. 3. The names of the companies, persons or railways from which each such article was acquired, and the price therefor; stating if the article was new or second-hand. 4. The use to which each such article was applied when acquired, what compensation was received for such use, from whom, and how the proceeds were applied. 5. Where each such article of rolling stock is now, in whose use, and on what terms. Presented 17th April, 1906.—*Mr. Barker*. . . . . *Not printed.*
103. Report of an inquiry into certain matters connected with the construction of the Ottawa post office. Presented 18th April, 1906, by Hon. C. S. Hyman. . . . . *Not printed.*
104. Return to an order of the House of Commons, dated 21st March, 1906, for copies of the contract, together with plans and specifications, between the government and the Dominion Coal Company, for the improvement of Glace Bay Harbour for public purposes; also copies of all correspondence, telegrams, memoranda, and representations made by delegates, members of parliament, or any other persons, having reference thereto; also copies of all accounts furnished to the government for expenditures on Glace Bay Harbour, by the Dominion Coal Company. Presented 19th April, 1906. *Mr Martin (Queen's)*. . . . . *Not printed.*
105. Return to an address of the Senate, dated 15th March, 1906, of the number and amount of policies transferred from assessment section to legal reserve section under Act of 1904, by the Mutual Reserve Life Insurance Company of New York; also the number and amount of policies written by the company during the year 1905 and the cash payments made thereon. Presented 19th April, 1906.—*Hon. Mr. McMullen*. . . . . *Not printed.*
106. Return to an address of the House of Commons, dated 19th March, 1906, for copies of all orders in council, surveys, reports, options, agreements for the purchase or lease, letters, telegrams, correspondence and other documents of every nature and description, relating to the acquisition of land for the purpose of military training at Petawawa, in the province of Ontario, together with the names, occupations, and addresses of all persons, firms and corporations from whom any such

## CONTENTS OF VOLUME 14—*Continued.*

- were purchased, leased or otherwise acquired ; the dates when such property was purchased, leased or otherwise acquired. Also a return showing the extent of the lands purchased, leased or otherwise acquired from each person, firm or corporation, the consideration therefor, the amount of the purchase or rental, and all amounts payable in respect thereof, including any commission upon said purchase, rental or acquisition. Also the names of all persons civil or military, who acted for the government in connection with such purchasing, leasing or other acquisition. Also all letters, telegrams, papers, correspondence and other documents between the vendor or lessee, or any persons acting for them and the government, or any person acting for the government, including all protests of persons owning or claiming to own land in the vicinity ; and all correspondence between such persons and the government, and all correspondence between any person acting for the government, and any person or persons claiming to be interested in any such purchase, sale or acquisition. Also the names of all persons engaged in making the final or other settlement of any claims for the purchasing, leasing or other acquisition of any such lands, or for trespass upon or interference with any adjoining lands, or the persons residing thereon, and a full statement of all the amounts, if any, paid to each such person engaged in making any such settlement, or in making any arrangement in connection with such claims. Also a statement of the amount and nature of all claims for trespass or interference, and of all sums paid or payable in respect thereof. Presented 23rd April, 1906.—*Mr. Worthington*..... *Not printed.*
- 107.** Return to an order of the House of Commons, dated 28th March, 1906, showing the number of mail contracts in Peel county, giving location, number of miles, names of couriers, and price paid. Also date of commencement, date of expiration, and names of bondsmen ; also if public tenders were asked ; the name of each preceding contract, with name of courier, and the price paid. Presented 23rd April, 1906.—*Mr. Blain*..... *Not printed.*
- 108.** Return to an order of the House of Commons, dated 2nd April, 1906, for copies of all reports and communications from the superintendent of insurance to the government, or to the minister of finance, during the years 1903, 1904 and 1905, relating or referring to the desirability or expediency of any further amendment or amendments to the Insurance Act, or relating or referring to any defects in said act. Presented 23rd April, 1906.—*Mr. Borden (Carleton)*..... *Not printed.*
- 108a** Return to an order of the House of Commons, dated 14th March, 1906, for a copy of the special report of the superintendent of insurance addressed to the minister of finance, bearing date 9th November, 1905 ; also copies of all other reports, correspondence and documents, from 1st January, 1905, up to the date of the return, respecting the regulation of life insurance in Canada. Presented 23rd April, 1906.—*Mr. Borden (Carleton)*..... *Not printed.*
- 108b.** Return to an order of the House of Commons, dated 14th March, 1906, for copies of all telegrams, reports, communications, investigations, letters and documents of every description, relating to the necessity of investigating the working of insurance companies doing business in the Dominion of Canada, including all correspondence, communications and other documents, whether advocating or opposing, or otherwise relating to the commission recently appointed for the above purpose ; or any investigation either by the government or by a commission, committee of the house, or otherwise, into the matters aforesaid ; also in connection with the recommendation and appointment of the commissioners. Presented 23rd April, 1906.—*Mr. Ingram*..... *Not printed.*
- 109.** Return to an order of the House of Commons, dated 6th March, 1905, for copies of all correspondence, documents, papers, and reports, not already brought down relating to the harbour at Port Colborne, the breakwater thereof, and elevators, or proposed elevators therein. Presented 23rd April, 1906.—*Mr. Barker* .. . . . *Not printed.*
- 110.** Return to an order of the House of Commons, dated 21st March, 1906, for copies of all thermograph records of temperatures on ocean steamers in the possession of the government, taken during the season of 1905, stating : (1) where the thermograph was placed in each case, whether in cold storage chambers, cool air chambers, ventilated chambers, unventilated chambers, or on deck or other part of the vessel, exposed only to the natural ocean temperature, and in this latter instance, if liable to be exposed to the sun's rays ; (2) the kind of produce that was stored in the chamber if any ; (3) date of sailing of steamer, the port from which sailing, name of vessel and line of steamers ; (4) where the chamber was a ventilated chamber, state method of ventilation, size and number of intakes, also of outflows for air. Presented 23rd April, 1906.—*Mr. Smith (Wentworth)*..... *Not printed.*

111. Return to an order of the House of Commons, dated 28th March, 1906, for copies of all reports made subsequent to 3rd April, 1905, in respect of Joseph Nixon, land agent at Macleod. Presented 23rd April, 1906.—*Mr. Foster*..... *Not printed.*
112. Return to an order of the House of Commons, dated 14th March, 1906, showing the total number of land patents issued, together with the acreage covered thereby, in and for the territory included within the limits of the present provinces of Manitoba, Saskatchewan and Alberta, between the year 1872 and the 31st December, 1905, under each of the following forms of grant, stating also whether odd or even sections were affected: commutation grants, homesteads, Manitoba Act grants, military bounty grants, Northwest half-breed grants, parish sales, quit claim special grants, railways, sales of mining, farming, ranching, &c., school land sales, special grants, and all others. Presented 23rd April, 1906.—*Mr. Ames*..... *Not printed.*
- 112a. Return to an order of the House of Commons, dated 14th March, 1906, showing the parcels of land, other than railway grants, which since 1896, have been sold, in the present province of Alberta or Saskatchewan, for irrigation projects; giving in each instance area, location and price obtained, and the name of the company or individual to whom sale was made. Presented 23rd April, 1906.—*Mr Ames*..... *Not printed.*
- 112b. Return to an address of the House of Commons, dated 14th March, 1906, for copies of all contracts and agreements between the government, or any department of the government, and the Qu'Appelle, Long Lake and Saskatchewan Railroad and Steamboat Company, and all orders in council, reports, papers, documents and correspondence respecting: (a) any loan to the said company; (b) any indebtedness of the said company to the crown or to the government; (c) any lands to which the company might become entitled by virtue of any statute, contract or agreement; (d) any land granted to or earned by the company; (e) the area within which such lands might be selected by the company; (f) any enlargement, change or alteration of the area within which such lands might be selected by the company, or by any purchaser from the assignee of the company. 2. All correspondence respecting the matters above mentioned between the government, or any department of the government, or any official or person acting or purporting to act for the government and the said company, or any official thereof, or any person acting or purporting to act therefor, or any assignee of or purchaser from the said company. 3. All orders in council relating to, touching or concerning the said company's land grant, or the area within which the same might be selected, or any enlargement or alteration of that area. 4. All correspondence between the government, or any department or official thereof, and the Saskatchewan Valley Land Company, or any officer or person purporting to act for that company, or any person or persons, firm or firms, syndicate or syndicates, from whom the Saskatchewan Valley Land Company acquired any portion of the land grant of the Qu'Appelle, Long Lake and Saskatchewan Railroad and Steamboat Company. 5. All correspondence between any shareholders or persons interested in the Qu'Appelle, Long Lake and Saskatchewan Railroad and Steamboat Company, with the government or any department or official thereof, and all claims and demands made by that company, or by any person interested therein against the government, in respect of the said land grant, or the selection thereof, or any of the matters above referred to. Presented 1st May, 1906.—*Mr. Borden (Carleton)*..... *Not printed.*
- 112c. Supplementary return to No. 112b. Presented 11th May, 1906 ..... *Not printed.*
113. Return to an order of the House of Commons, dated 28th March, 1906, showing the original tenders received by the department of the interior in connection with the leasing of timber berths Nos. 1158, 1175, 1192, 1219, 1231, and 1232, during the years 1904 and 1905, with copies of all correspondence in reference thereto, had with the minister of the interior, the department itself, or any officer thereof; and the various transfers, if any, made of the leases after they were granted to the successful tenderers, giving name of transferee and date of transfer, in each case. Presented 23rd April, 1906.—*Mr. Foster*..... *Not printed.*
114. Return to an order of the House of Commons, dated 23rd April, 1906, showing the number of permanent employees at present in the service of the House of Commons, the names and duties of each; the salary and length of service in each case; the number of sessional employees at present in the service of the House of Commons, the daily pay of each, and the names and duties of each; the number of employees of both classes who were employed in the session of 1896. Presented 24th April, 1906.—*Mr. Sproule*..... *Not printed.*

---

 CONTENTS OF VOLUME 14—*Continued.*

---

- 114a. Return giving the information asked for by the House of Commons in their message, dated 30th April, 1906, requesting their honours to furnish to the Commons a return showing the number of permanent employees at present in the service of the Senate, the names and duties of each, and the salary and length of service in each case; the number of sessional employees at present in the service of the Senate, the daily pay of each, and the names and duties of each; the number of employees of both classes who were employed in the session of 1896. Presented 11th May, 1906.—*Mr. Sproule*. . . . . *Not printed.*
- 114b. Return to an order of the Senate, dated 8th instant, showing payments made to permanent and sessional employees during the fiscal year 1895-6, and 1904-5. Presented 14th May, 1906.—*Hon. Sir Mackenzie Bowell*. . . . . *Not printed.*
115. Return to an order of the House of Commons, dated 28th March, 1906, for copies of all correspondence between the Collingwood Dry Dock Company and any department in reference to bounty payable to said company; also a copy of the valuation of said dock, if any, made on behalf of the department of public works. Presented 24th April, 1906.—*Mr. Bennett*. . . . . *Not printed.*
116. Return to an order of the House of Commons, dated 2nd April, 1906, showing: (a) what quantities of fish of different classifications, naming them, were entered for export at the ports of Port Arthur, Fort William, Sault Ste. Marie, Manitoulin Island and all Georgian Bay ports, respectively, during the fiscal years ending 30th June, 1890, 1891, 1892, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900, 1901, 1902, 1903, 1904, 1905; (b) the value of such consignments so entered; (c) the amount of duty paid thereon; (d) the county or counties to which the said consignments were exported. Presented 24th April, 1906.—*Mr. Boyce*. . . . . *Not printed.*
117. A copy of a Treaty of Commerce and Navigation between Great Britain and Japan. Presented 24th April, 1906, by Sir Wilfrid Laurier. . . . . *Printed for sessional papers.*
118. Return to an order of the House of Commons, dated 28th March, 1906, for copies of all contracts for supplies of food for the permanent military forces and mounted police of the Dominion; also for all the supplies of food to the volunteers at their annual drill camps last summer; also for the supplies to the military schools of the Dominion. Presented 26th April, 1906.—*Mr. Smith (Wentworth)*. . . . . *Not printed.*
- 118a. Supplementary return to No. 118. Presented 1st May, 1906. . . . . *Not printed.*
119. Return to an order of the House of Commons, dated 23rd April, 1906, for copies of all reports, letters, communications, surveys, papers and documents respecting any defects in the Peterborough lift-lock, or any difficulties in the operation of the said lock, or any defects in the Trent Valley canal in the vicinity of or in connection with the Peterborough lift-lock. Presented 26th April, 1906.—*Mr. Barker*. . . . . *Not printed.*
- 119a. Return to an order of the House of Commons, dated 14th May, 1906, for copies of all correspondence, inquiries, reports, or other data bearing upon the Trent canal in connection with the lift lock at Peterborough and the works at Kirkfield; together with all correspondence with engineers, solicitors and contractors, in connection with the same. Presented 13th June, 1906.—*Mr. Hughes (Victoria)*. . . . . *Not printed.*
120. Return to an order of the House of Commons, dated 25th April, 1906, for a copy of all contracts with steamship companies for steamboat service between Canada and Mexico. Presented 27th April, 1906.—*Mr. McLean (Queen's)*. . . . . *Printed for both distribution and sessional papers.*
121. Extract from a Report of the Committee of the Privy Council approved by the Governor General on the 21st April, 1891, on a report from the minister of the interior in relation to the case of 'The Temperance Colonization Society (Limited).' Presented 27th April, 1906, by Sir Wilfrid Laurier. . . . . *Not printed.*
- 121a. Certified copy of a Report of a Committee of the Honourable the Privy Council, approved by His Excellency the Governor General in Council, on the 21st April, 1901, respecting "The Temperance Colonization Society, Limited," and defining in general terms the mode of dealing with colonization companies desiring to have their agreements cancelled and their accounts with the government closed. Presented 29th May, 1906, by Hon. F. Oliver. . . . . *Not printed.*

## CONTENTS OF VOLUME 14—*Continued.*

- 122.** Return to an address of the House of Commons, dated 2nd April, 1906, for copies of all orders in council, or other authority, for the survey of a branch line of railway from the main line of the Prince Edward Island Railway to Stanley Bridge; also for copies of all engineers' reports, memoranda, &c., correspondence, telegrams, or other documents in relation thereto; including the claims of Austin J. Macneill and others for damages to property in connection with the said survey. Presented 30th April, 1906.—*Mr. Martin (Queen's)*..... *Not printed.*
- 123.** Return to an address of the House of Commons, dated 9th April, 1906, for copies of all letters, telegrams, communications and correspondence received since the first day of January, 1905, from any government, corporation, firm, or person, respecting the quality of fruit exported from Canada and relating to the inspection of such fruit; and copies of all letters and communications from any department of the government in reply thereto. Presented 30th April, 1906.—*Mr. Smith (Wentworth)*..... *Not printed.*
- 123a.** Partial Return (in so far as the Department of Trade and Commerce is concerned) to an address of the Senate, dated 24th April, 1906, for a statement showing: 1st. The number of barrels and boxes of apples (stated separately) exported from Canada to foreign countries, including those shipped through United States ports; 2nd. The number of packages of Canadian apples (stated as aforesaid) delivered at the following European ports: London, Liverpool, Glasgow, Manchester, Bristol, Belfast, Hamburg, Havre and Antwerp. The number of barrels and boxes (stated separately) and to be given separately, for each of the aforesaid ports; 3rd. The number of packages as aforesaid, bearing the marks required by the Fruit Marks Act, stating separately the number of packages bearing each of the different marks authorized by the said act; 4th. The number of packages as aforesaid, which were found by the inspectors appointed by the department of agriculture or the commercial agents of the department of trade and commerce, to be dishonestly packed or falsely marked; 5th. The names of all inspectors appointed by the government, or the department of agriculture operating either in Canada or elsewhere, under the provisions of the Fruit Marks Act, and the salary and other allowances paid to each, and the territory covered by each inspector; 6th. The names of all the commercial agents employed by the government or the department of trade and commerce and operating in the United Kingdom, the British Colonies and foreign countries and the salary and other allowances paid to each, and the territory covered by each agent. Presented 9th May, 1906.—*Hon. Mr. Ferguson*..... *Not printed.*
- 123b.** Supplementary return to No. 123a. Presented 9th May, 1906..... *Not printed.*
- 124.** Return to an address of the House of Commons, dated 9th April, 1906, for a copy of all contracts between the Ross Rifle Company and the government, or the department of militia, for the supply of rifles, ammunition, or other articles, and all orders in council, correspondence, reports, documents and papers relating to such contracts or to the subject-matter thereof, or to the operations of the company, or to its dealing with the government, or any of the departments thereof, including the department of customs. Presented 1st May, 1906.—*Mr. Worthington*..... *Not printed.*
- 125.** Return to an order of the House of Commons, dated 23rd April, 1906, for a copy of the report of A. E. DuBerger, on the drug and proprietary medicine trade of Canada. Presented 1st May, 1906.—*Mr. Parmelee*..... *Printed for both distribution and sessional papers.*
- 126.** Return to an order of the House of Commons, dated 23rd April, 1906, for a copy of the report made by the deputy minister of labour on the results of his investigation into the importation of Italian labourers into the city of Montreal in the spring of 1904. Presented 1st May, 1906.—*Mr. Verville*.  
*Not printed.*
- 127.** Return to an order of the House of Commons, dated 28th March, 1906, for copies of all correspondence, plans, specifications, surveys, &c., pertaining to relief from the river Thames, say between the city of London and Lake St. Clair for the overflow of water from the said river, pertaining to canal or cut off to Lake Erie or other points. Presented 1st May, 1906.—*Mr. Clements*. *Not printed.*
- 128.** Return to an order of the House of Commons, dated 18th April, 1906, for a copy of the specifications for the Victoria Memorial Museum, especially that portion thereof showing the kind, quality and dimensions of stone to be used by the contractor in the exterior walls of the same; also for a copy of all correspondence regarding stone for the said building between the government, or any department,

## CONTENTS OF VOLUME 14—*Continued.*

- minister or official, and every person or corporation, including the contractor, Mr. Goodwin, and the owners or lessees of the Read, Battery, River Phillip, and other quarries. Presented 1st May, 1906.—*Mr. Perley*. . . . . *Not printed.*
129. Return to an order of the House of Commons, dated 9th April, 1906, for a copy of all correspondence and reports relative to the sale of the Giant's Tomb Island, or timber thereon, or to any negotiations with any person or persons for the purchase of said Island or timber thereon, or both. Presented 3rd May, 1906.—*Mr. Bennett*. . . . . *Not printed.*
130. Return to an order of the House of Commons, dated 11th April, 1906, for a copy of a certain report or communication to the department of the interior, from C. W. Speers, an officer of that department, dated in or about the month of February, 1901, recommending that 10,000 acres of land, included in or situate near the land afterwards sold by the government to Colonel A. D. Davidson and his associates should be broken at the expense of the government, to establish the fact that grain could be produced in that district; also for a copy of the map submitted therewith; also for a copy of all reports, letters and communications to the said department, up to the 24th day of May, 1902, respecting the quality or value of the said lands, mentioned in the order in council of that date. Presented 3rd May, 1906.—*Mr. Barker*. . . . . *Not printed.*
- 130a. Supplementary return to No. 130. Presented 11th May, 1906. . . . . *Not printed.*
131. Return to an order of the House of Commons, dated 14th March, 1906, showing the amount of money scrip redeemed in Dominion lands, and the number of acres thus purchased from the government, (a) in Manitoba; (b) in the Northwest, the figures for each year from 1875 to 31st December, 1905, being given separately. Presented 3rd May, 1906.—*Mr. Roche (Marquette)*. . . . . *Not printed.*
132. Return to an order of the House of Commons, dated 21st March 1906, of all the valuations made in or previously to the year 1902, of the lands sold or granted in that year to the Saskatchewan Valley Land Company. Presented 3rd May, 1906.—*Mr. Borden (Carlton)*. . . . . *Not printed.*
133. Return to an order of the House of Commons, dated 14th March, 1906, showing: 1. The number of allotments of 240 acres of land, and acreage covered by the same, made between the 1st of July, 1896, and the 31st of December, 1905, to the half-breeds of Manitoba, giving separately the figures for each year, and for the final six months. 2. The land scrip, if any, issued during the aforesaid period to colonization companies, giving in the case of each such company the name and head office address, and also giving the face value of such scrip and the year of its issuance. 3. The number and acreage of land scrip issued during the same period, to the half-breeds of the Northwest (now Alberta and Saskatchewan), giving separately the figures for each year and for the final six months. 4. The number of acres of land scrip located within the limit of each of the thirteen Dominion land agencies of Manitoba and the Northwest, between the 1st of July, 1896, and the 31st of December, 1905, the figures of each agency each year to be given separately. 5. The number of acreage of land scrip granted prior to 1st July, 1896, to the half-breeds (a) in Manitoba and (b) of the Northwest. 6. The amount outstanding, granted but not located, on 1st July, 1896. Presented 3rd May, 1906.—*Mr. Roche (Marquette)*. . . . . *Not printed.*
134. Return to an order of the House of Commons, dated 14th March, 1906, showing: (1) The total number of acres of land within the present limits of Manitoba, Saskatchewan and Alberta, voted by parliament to railway companies. 2. The area of said lands in respect of which the time by law specified for earning the same has elapsed. 3. The area of said lands (a) which has been earned, selected and patented; (b) which has been earned and selected, but not patented; (c) which has been earned but neither selected nor patented. 4. The area of land which may yet be earned by any railway company, indicating the name of the company, and the amount of subsidy possible. 5. In the case of each of the following roads, the Canadian Northern Railway Company, the Manitoba and Southeastern Railway Company, and the Qu'Appelle, Long Lake and Saskatchewan Railway Company, (a) the quantity of land which may yet be earned; (b) the quantity earned but not patented; (c) the extent, location (giving township and range), and boundaries of the reserved territory wherein each of the remaining selections may be made. 6. The several orders in council by virtue of which the area of selection affecting the companies mentioned in paragraph 5 were indicated, and the date of the same. The whole of the above information to be brought up to 1st May, 1906.—*Mr. Ames*. . . . . *Not printed.*

House of Commons, dated 11th April, 1906, for a copy of any and all  
 or on behalf of A. D. Davidson, his associates, or any of them, for

CONTENTS OF VOLUME 14—*Continued.*

purchase or acquisition of lands from the government or any department thereof, and particularly the proposal referred to in Sessional Paper 132*a*, 1893, page 159, being order in council, approved 24th May, 1902, and of all correspondence and other papers in any wise relating to said proposal or proposals. Also for a copy of any and all recommendations of any such proposals or dealing therewith, made by the commissioner of immigration, or general colonization agent, or either of them, referred to in said order in council, together with all correspondence and other papers in any wise relating to such recommendations. Also for a copy of any and all acceptance and acceptances, consent and consents in writing, by or on behalf of said A. D. Davidson, or associates, or any of them; of or to the terms of disposal of lands, set out in said order in council, and bearing numbers one to nine, both inclusive, or of or to any of such terms, together with all correspondence and other papers, in any wise relating to such acceptance or consent. Also for a copy of any and all agreement and agreements in writing, at any time made by the government, or any department thereof, with said A. D. Davidson, and associates, or any of them, for sale of lands, based on said order in council, approved 24th May, 1903, or on any modification thereof, together with all correspondence and other papers in any wise relating to such agreement or agreements. Presented 3rd May, 1906.—*Mr. Alcorn*.....*Not printed.*

- 136.** Return to an address of the House of Commons, dated 2nd April, 1906, for copies of (a) all plans showing proposals of any railway or other corporation, or person, or association of persons, for and with regard to expropriation of Whitefish Island, in St. Mary's River, Ontario, or of portions thereof, and of water or land covered by water, surrounding the same; (b) of all correspondence between this government and the government of the province of Ontario, or any department thereof, and with any other person, firm or corporation, relating thereto, and of all reports, decisions, or findings upon such applications or proposals; (c) of all reports of and correspondence with the International Waterways Commission, with respect to erection, maintenance or alteration of dams, water-powers, and other works or erections in St. Mary's River. Presented 3rd May, 1906.—*Mr. Boyce.*

*Not printed.*

- 137.** Return to an order of the House of Commons, dated 25th April, 1906, showing imports and exports between United States and Canada for the last fiscal year, on the following agricultural products, showing Canadian duty and United States duty, also showing any of the following articles, and amount admitted free between United States and Canada: tobacco, corn, potatoes, barley, beans, oats, hay, eggs, fowls, butter, pork, beef, vegetables, apples, wood, cattle, hogs, sheep, horses, hay, canned vegetables, canned fruits, evaporated and dried apples, lard, hides and cheese. Presented 3rd May, 1906.—*Mr. Clements* . . . . . *Not printed.*

- 138.** Return to an address of the House of Commons, dated 23rd April, 1906, for a copy of all orders in council, reports, correspondence, documents and papers, relating to the proposed sale, grant or disposal by the government of any lands in the province of Alberta, or in the province of Saskatchewan, to a syndicate or company in which Messieurs M. A. Walsh, E. C. Walsh, E. G. Walsh, of Clinton, Ohio ; A. W. Carrol, Charles Maher, of Iowa, and J. Brown of Neepawa, Manitoba, or any or either of them are interested, or which they or any or either of them, or any person or persons on their behalf, are promoting. Presented 7th May, 1906.—*Mr. McCarthy, (Calgary).*

*Not printed.*

- 139.** Return to an order of the House of Commons, dated 18th April, 1906, for a copy of all letters, correspondence and communications between the minister of the interior or any department of the government and the superintendent under the Children's Protection Act of British Columbia, respecting the sale and slavery in British Columbia of young girls for immoral purposes; also a copy of all reports and communications from the agents of the Indian department in British Columbia, with respect to the matters aforesaid, and all replies or communications from the department to such agents. Presented 7th May, 1906.—*Mr. Borden (Carleton)*..... *Not printed.*

140. Return to an order of the House of Commons, dated 14th March, 1906, showing: 1. The number of allotments of land scrip and the total acreage covered thereby, made to half-breeds (a) in Manitoba, and (b) in the Northwest, between 1st July, 1904, and 31st December, 1905. 2. The number of land warrants, if any, and the acreage covered thereby, issued for military services within the same period. 3. The number of scrip, if any, and the acreage covered thereby, issued to the North Mounted Police within the same period. 4. The number and acreage of all the above outlets on the 31st December, 1905. All the above information being required in order to bring the matter contained in Sessional Paper No. 67d, brought down the 13th J. '06 to the last calendar year. Presented 7th May, 1906.—*Mr. Roche* (Mar 76

# CONTENTS OF VOLUME 14—*Continued.*

141. Return to an order of the House of Commons, dated 19th March, 1906, for copies of all correspondence had with the department of the interior, or the minister of that department, or any member of the government, including all statements, charges or information, made against or concerning Philip Wagner, at one time in the employ of the government. Presented 8th May, 1906.—*Mr. Foster*.....*Not printed.*
142. Return to an order of the House of Commons, dated 30th of April, 1906, for a copy of all correspondence and papers relating to any and all applications made by or on behalf of the Great Northern Railway Company for subsidies; also what subsidies were granted to that railway, by whom or through what person such subsidies were applied for, on what dates, for what portions of the railway, and of what amounts, on what terms and conditions were subsidies granted, and to what persons, firms or corporations such subsidies, or any part or parts thereof, were paid. Presented 10th May, 1906.—*Mr. Boyce*.....*Not printed.*
143. Return to an order of the House of Commons, dated 5th April, 1906, for copies of all correspondence, reports, telegrams, valuations and memoranda in possession of the government, or any member or official thereof, with reference to damages for lands expropriated for railway purposes on the line built between Montague, and Cardigan, Prince Edward Island; also names of commissioners or valuers, or both; copies of all valuations made, by whom made, giving the names and the amounts separately awarded to each; also list of names of persons who accepted valuers' awards, and also of persons whose valuations have not been accepted by the government; also list of persons who have been paid or accepted valuations. Presented 10th May, 1906.—*Mr. McLean, (Queen's)*.....*Not printed.*
144. Return to an order of the House of Commons, dated 14th March, 1906: 1. For copies of all correspondence for the last two years on immigration between the Canadian High Commissioner, in London, England, and Mr. W. T. R. Preston, Dominion Commissioner of Immigration, at London, England. 2. For copies of all correspondence for the last two years on immigration between the said W. T. R. Preston and Mr. W. T. Griffith, Secretary, High Commissioner's office, London, England. Presented 11th May, 1906.—*Mr. Wilson (Lennox and Addington)*.....*Not printed.*
- 144a. Supplementary return to No. 144. Presented 30th May, 1906.....*Not printed.*
145. Return to an address of the Senate, dated 27th April, 1906, for a statement showing the conditions on which the Songhees Indian Reserve in Victoria has been handed over to the government of British Columbia—as to the purchase of a new reserve, the building of dwellings, church, and school house, showing also the manner in which it is intended to dispose of the money in the hands of the Dominion government to the credit of the Songhees Indians. Presented 9th May, 1906.—*Hon. Mr. Macdonald (Victoria)*.....*Not printed.*
146. Return to an order of the House of Commons, dated 9th April, 1906, for a copy of all correspondence, papers, &c., between the superintendent of the Prince Edward Island Railway, or other official, with other interested parties, relative to the acquiring of the Hodgson property on the St. Peters Road, near Charlottetown, and at the entrance of the new bridge, for the purposes of straightening the road. Presented 14th May, 1906.—*Mr. Lefurgey*.....*Not printed.*
147. Return to an order of the House of Commons, dated 30th April, 1906, for a copy of all telegrams, petitions, orders and correspondence with reference to the removal of the post office from North Lake to Blake Point, Prince Edward Island, and to the return of the office to its original location. Presented 15th May, 1906.—*Mr. McLean, (Queen's)*.....*Not printed.*
148. Return to an order of the House of Commons, dated 18th April, 1906, for a copy of all reports regarding the Riding Mountain timber reserve, since 1st January, 1900, by any officers of the government. Presented 15th May, 1906.—*Mr. Roche (Marquette)*.....*Not printed.*
- 148a. Supplementary return to No. 148. Presented 22nd May, 1906.....*Not printed.*
149. Return to an order of the House of Commons, dated 9th April, 1906, for a copy of the contract with the Chicoutimi Pulp Company regarding the building, maintenance and operation of the piers and booms above Chicoutimi, on the Saguenay River; also a copy of the reports from the officers of the government under which it was decided to build these works, and of all correspondence relating thereto. Presented 15th May, 1906.—*Mr. Perley*.....*Not printed.*
150. Return to an order of the House of Commons, dated 14th March, 1906, showing the amounts voted and the amounts expended, under their proper heading, each year since 30th June, 1896, on Port George harbour; the date of such payments, to whom the payments were made, and the amount paid

## CONTENTS OF VOLUME 14—*Continued.*

to each person ; the amount paid for actual labour performed ; the amount paid for material not used, and when, and the amount paid for material used ; quantity and kind of material purchased, and the price, and from whom purchased ; the present actual condition of the harbour ; a copy of the estimated cost of the harbour, including dredging and breakwater ; also copies of all advertisements calling for tenders, as well as all tenders and contracts and correspondence on the subject. The names of all dredges employed since 30th June, 1896, and their owners ; also copies of all telegrams, letters, reports, petitions, documents, correspondence, investigations and communications of every description in connection with said harbour work ; also a copy of the pay-roll for each year since 30th June, 1896, the names of all foremen, superintendents and inspectors, with their length of service as such, and by whom recommended, and all correspondence in connection with their appointment, the names of all civil engineers employed on the works, and by whom recommended, and all correspondence in connection therewith ; also the name of the person or persons who paid the respective amounts at Port Bruce for material furnished and labour performed. Presented 15th May, 1906.—*Mr. Ingram*.....*Not printed.*

151. Return to an order of the House of Commons, dated 6th March, 1905, showing the names of residents of the Northwest Territories, not entitled to a second homestead, for whom the sanction of the department has been given, allowing them to purchase additional quarter sections, subject to ordinary cultivation conditions : the dates upon which such sanctions were given, the lands which have been purchased by such settlers in consequence of this authority, with the price agreed upon, and the sum paid down ; also the form in which the authority to make the sale was made known to the local agents of Dominion lands. Presented 17th May, 1906.—*Mr. Lake*.....*Not printed.*

152. Return to an order of the House of Commons, dated 9th May, 1906, showing the number of Indian agents in the employ of the government ; the number of Indians in the Yukon ; the number of Indian schools in the Yukon ; the number of officials of the Indian department in the employ of the government in the Yukon ; the number of Indian reserves in the Yukon ; the number of Indians in British Columbia ; the number of Indian schools in British Columbia ; the number of officials of the Indian department in the employ of the government in British Columbia ; the number of medical officials who have received remuneration of any kind out of the Indian department, and the total amount thus paid by the government in each province ; the amount of the Indian reserve land disposed of since 1896, and the price per acre received in each case ; the total amount expended in the year 1905 on the following reserves, respectively : Kettle Point, Stony Point, and Sarnia Reserve, and the population on each reserve, and the number of schools and teachers ; the amount of salary paid to the Indian agents in the Yukon and British Columbia ; the average Indian population in the reserves in each province of the Dominion ; the number of reserves in the Dominion having a population of less than each respective number given, viz.: 100, 75, 50, 30, 20, 10, 5, 3, in the year 1905 ; the total amount paid to Indian department officials of this government in each province of the Dominion. Presented 17th May, 1906.—*Mr. Armstrong*.....*Not printed.*

153. Return to an order of the House of Commons, dated 17th July, 1905, for copies of all correspondence, petitions, memorials, reports of inspectors, and all papers whatsoever, relating to the closing of Lake Manitoba from summer fishing. Presented 17th May, 1906.—*Mr. Crawford*.....*Not printed.*

154. Return to address of the Senate, dated 14th March, 1906, for all correspondence between the pilot commissioners, the secretary of the board of pilot commissioners, or any of the officials of that board, at Sydney, Cape Breton, and the department of marine and fisheries, or any of the officials of the said department, showing : 1st. The amount paid into the pilots' retiring fund in each year, from 31st December, 1896, to 31st December, 1905, respectively. 2nd. The amount paid into the pilots' widows' and orphans' relief fund from 31st December, 1896, to 31st December, 1905, respectively. 3rd. The disposition made of the said funds in each year during the above-mentioned period ; the amount on hand on 31st December, 1905, the interest it bears ; where it is deposited ; the security for its safety for the benefit of the widows and the orphans of the pilots. 4th. The amount on hand in these funds, respectively, on 31st December, 1896 ; also all other correspondence, if any, bearing on this matter. Presented 17th May, 1906.—*Hon. Mr. McDonald (Cape Breton)*.....*Not printed.*

155. Return to an order of the House of Commons, dated 18th of April, 1906, showing all coal lands leased, sold or otherwise disposed of during each year from 1896 to 1905, inclusive, giving the area disposed of, the party to whom, the consideration therefor, the assignments made, if any, and the date thereof, and the name of the assignee in each case. Presented 22nd May, 1906.—*Mr. Foster*  
*Not printed.*

Presented 29th May, 1906.—*Mr. Lefurgey*.  
*Not printed.*
- 161.** Report of the commissioners appointed to hold an investigation and report upon the accident which occurred on the 5th April, 1906, by the collapse of part of the tower on the west block extension of the departmental buildings. Presented 29th May, 1906, by Hon. C. S. Hyman.  
*Printed for both distribution and sessional papers.*
- 161a.** The evidence taken before the commissioners appointed to hold an investigation and report upon the accident which occurred on the 5th April, 1906, by the collapse of part of the tower on the west block extension of the departmental buildings. Presented 19th June, 1906, by Hon. C. S. Hyman.  
*Not printed.*
- 161b.** Correspondence in relation to the west block extension and the collapse of the tower. Presented 22nd June, 1906, by Hon. C. S. Hyman. . . . . *Not printed.*
- 162.** Return to an order of the House of Commons, dated 9th May, 1906, showing the total number of land patents issued, together with the acreage covered thereby, in and for the territory included within the limits of the present provinces of Manitoba, Saskatchewan and Alberta, between the 1st of July, 1901, and the 31st of December, 1905, under each of the following forms of grant: (a) commutation grants, (b) homesteads, (c) Manitoba Act grants, (d) military bounty grants, (e) Northwest half-breed grants, (f) parish sales, (g) quit claim special grants, (h) railways, (i) sales of mining, farming, ranching, &c., (j) school land sales, (k) special grants, (l) and all others. Presented 29th May, 1906.—*Mr. Ames*. . . . . *Not printed.*
- 163.** Return to an order of the House of Commons, dated 23rd April, 1906, showing what information is in possession of the department of the interior, or any department or member of the government, regarding alleged irregular or improper dealings, acts, charges, payments, or accounts of any officer, agent or other person in Great Britain or Ireland, or in Europe, in connection with immigration to Canada: what period is covered thereby; also what communications, if any, upon or in relation to such matters have been had from or with the High Commissioner for Canada, the commissioner of immigration or others, in writing or otherwise; also a copy of all correspondence, reports and papers, if any, relating to such matters. Presented 29th May, 1906.—*Mr. Barker*. . . . . *Not printed.*
- 164.** Return to an address of the Senate, dated 15th May, 1906, calling for a statement showing: 1st. The amount paid for the railway known as the Canada Eastern in New Brunswick, and the name of the person or persons to whom the purchase money was paid. 2nd. The amount of money expended on said railway since its purchase by the government to the 1st of April, 1906, on buildings, repairs,

## CONTENTS OF VOLUME 14—*Continued.*

grading, culverts, bridges, ties, rails, and all other expenditures incurred in the improvement of said railway. 3rd. The total amount earned and received from the passengers, and for freights, separately, to the 1st of April, 1906. 4th. The total expenditure for operating said road, as a branch of the Intercolonial, from the date of purchase to the 1st of April, 1906. Presented 29th May, 1906.—*Hon. Sir Mackenzie Bowell*.....*Not printed.*

165. Return to an address of the Senate, dated 8th May, 1906, for a statement showing : 1. What amount has been paid out annually during the last five years for salaries and expenses of the staff chargeable with the inspection duties of the life insurance branch of the finance department. 2. Did such staff perform any duties other than those pertaining to inspection. 3. Names of the officers of such staff. 4. Salaries paid each such officer. 5. Amounts collected annually from all life insurance companies doing business in Canada during the last five years for inspection charges or maintenance charges of such branch, or for such other charges incident thereto. 6. On what basis have such charges been made and collected. 7. The names of all companies and amounts paid each year by such companies. Presented 29th May, 1906.—*Hon. Mr. Lougheed*.....*Not printed.*
166. Return to an order of the House of Commons, dated 20th February, 1906, showing the number of miles of land in the Northwest Territories surveyed in block outlines, and the cost per mile; the number of miles of township outlines, and the cost per mile; the number of acres subdivided, and the cost per acre; the proportion of open prairie to the whole of the land surveyed; the contract survey rate per mile of section line in open prairie; the rate of pay of surveyors employed by the day, for the years 1880, 1881, 1882, 1883, 1900, 1901, 1902, 1903; the average for the first four years, and the average for the latter four years. Presented 13th June, 1906.—*Mr. Roche (Marquette)*.....*Not printed.*
167. Return to an address of the Senate, dated 16th May, 1906, for copies of the North Sydney Harbour Commissioners' Report for the calendar years 1897, 1899, 1901 and 1905, showing collections and disbursements of the said harbour commissioners during these years; also correspondence, if any, respecting purchase of land for harbour commissioners' purposes, with plans of the said land and harbour. Presented 29th May, 1906.—*Hon. Mr. McDonald*.....*Not printed.*
168. Return to an address of the Senate, dated 8th May, 1906, for a statement relating to the Mutual Life Insurance Company of New York, showing : 1. The amount of life insurance in force in the Dominion on 31st December, 1905. 2. The amount of security deposited with the Dominion government. 3. The nature of the security. 4. If in gold, how much. 5. If in bonds, how much. 6. Who are the issuers of the bonds. 7. Are the bonds given in security taken at par or face value, or at the supposed market value. 8. How is the market value ascertained. 9. What means are taken to know if the makers or issuers of bonds taken as security are solvent from year to year. 10. In the event of the value of bonds falling below that at which they are taken as security, how would the deficiency in the security necessary to be held be made up. 11. Has the security deposited by the Mutual Life Insurance Company of New York fallen in value at any time below that necessary to be deposited according to law. Presented 29th May, 1906.—*Mr. Macdonald (Victoria)*.....*Not printed.*
169. Papers relating to chapter 16, 4 Edward VII, intituled : 'An Act respecting an arbitration between His Majesty and the Grand Trunk Company of Canada.' Presented 29th May, 1906, by the Hon. R. W. Scott.....*Not printed.*
170. A copy of a Report of the Committee of the Honourable the Privy Council, approved by His Excellency the Governor General on the 14th March, 1906, relating to the extension of the contract with the American Bank Note Company for a further period of five years; and correspondence relating thereto. Presented 30th May, 1906, by Hon. W. S. Fielding.....*Not printed.*
171. Return to an order of the House of Commons, dated 14th March, 1906, showing the amounts voted, and the amounts expended, under their proper headings, each year since 30th June, 1896, on Port Stanley harbour; the date of such payments, to whom payments were made, and the amount paid to each person; the amount paid for actual labour performed; the amount paid for material not used; the quantity and kind of material purchased, with the price, and from whom purchased; the present actual condition of the harbour. A copy of the estimated cost of the harbour, the statement to include dredging and the breakwater; also copies of all advertisements calling for tenders, as well as all tenders and contracts and correspondence on the subject; the names of all dredges employed on the work since 30th June, 1896, and their owners; also copies of all telegrams, letters, report petitions, documents, correspondence, investigations and communications of every description;

## CONTENTS OF VOLUME 14—*Continued.*

- connection with said harbour works; also a copy of the pay-roll for each year since 30th June, 1896; the names of all foremen, superintendents and inspectors, their length of service as such, and by whom recommended, giving all correspondence in connection with their appointment; and if dismissed or resigned, state reason for said dismissal or resignation; the names of all civil engineers employed on the works, and by whom recommended, and all correspondence in connection therewith; also the name of the person or persons who paid the respective amounts at Port Stanley for material furnished and labour performed. Presented 31st May, 1906.—*Mr. Ingram*.... *Not printed.*
172. Return to an order of the House of Commons, dated 9th May, 1906, for a copy of the instructions issued to each grade of civil engineers on the survey of the Montreal, Ottawa and Georgian Bay Ship Canal; also the names of each of the engineers engaged in the several grades, respectively, including transit men, levellers, rod men, and chain men, and the salaries of each. Presented 31st May, 1906.—*Mr. Taylor*..... *Not printed.*
173. Return to an order of the House of Commons, dated 30th April, 1906, for a copy of all papers, vouchers and statements in connection with the expenditure of \$1,438.54 on Miminegash harbour, as per Auditor General's Report, 1905, giving names and amounts paid severally for labourers, names, prices and amounts for supplies of stone, brick, poles, plank, and small payments, &c. Presented 31st May, 1906.—*Mr. Lefurgey*..... *Not printed.*
174. Copy of an agreement of Charles M. Hatfield to increase the natural rainfall in any locality in the Yukon Territory. Presented 31st May, 1906, by Sir Wilfrid Laurier.  
*Printed for both distribution and sessional papers.*
175. Return to an order of the House of Commons, dated 26th March, 1906, for copies of all correspondence pertaining to complaints received by the government protesting against quarantine from hog plague, in Kent County, Ontario. Presented 4th June, 1906.—*Mr. Clements*..... *Not printed.*
176. Return to an order of the House of Commons, dated 25th April, 1906, for a copy of all reports, evidence, correspondence, documents and papers relating to charges against any of the customs officials at Emerson, in the province of Manitoba, during the past two years. Presented 4th June, 1906.—*Mr. Roche (Marquette)*..... *Not printed.*
177. Return to an order of the House of Commons, dated 18th April, 1906, for a copy of all applications from C. F. Caldwell for himself, or by C. F. Caldwell on behalf of any clients, together with their names, or by any other person or persons, together with copies of all correspondence or other papers in connection with permission to purchase coal mining lands in the province of Alberta. Presented 4th June, 1906.—*Mr. Reid (Grenville)*..... *Not printed.*
178. Return to an order of the House of Commons, dated 23rd April, 1906, for a copy of all correspondence, memoranda, reports and telegrams in possession of the government or any member or official thereof, in reference to the construction of a new steamer for the winter navigation of the Straits of Northumberland, including Mr. Duguid's report or recommendations, and those of others co-operating with him, and the expenses connected therewith, and to whom paid. Presented 5th June, 1906.—*Mr. Martin (Queen's)*..... *Not printed.*
179. Return to an order of the House of Commons, dated 23rd April, 1906, for a copy of the plans and specifications of the new steamer now being constructed in England. Presented 5th June, 1906.—*Mr. McLean (Queen's)*..... *Not printed.*
180. Return to an address of the Senate, dated 31st May, 1906, for a copy of the certificate obtained by Commander Spain in the month of February, 1903. Presented 1st June, 1906.—*Hon. Mr. Landry*.  
*Not printed.*
181. Return to an order of the House of Commons, dated 9th May, 1906, for a statement showing the wages paid in different departments of the Prince Edward Island Railway, in the same manner as published in the Auditor's General's Report with reference to the Intercolonial Railway. Presented 13th June, 1906.—*Mr. Lefurgey*..... *Not printed.*
182. Return to an order of the House of Commons, dated 14th May, 1906, for a copy of the memorial received from the Dominion Marine Association, calling the attention of the Government to delays  
     in carrying out of the contract with M. P. Davis or the St. Lawrence Power  
     of vessels by electrical power in and out of the locks of the Cornwall Canal.  
     —*Mr. Ames*..... *Not printed.*

---

## CONTENTS OF VOLUME 14—*Continued.*

- 183.** Return to an order of the House of Commons, dated 14th March, 1906, showing the amounts voted and the amounts expended, under their proper headings, each year since 30th June, 1896, on Port Burwell harbour; the date of such payments; to whom the payments were made, and the amount paid to each person; the amount paid for actual labour performed; the amount paid for material not used, and when; the amount paid for material used; the quantity and kind of material purchased, and the price, and from whom purchased; the present actual condition of the harbour. A copy of the estimated cost of the harbour, and a statement showing how much it will cost to finish said harbour; the above statement to include breakwater and dredging. Also copies of all advertisements calling for tenders, as well as all tenders and contracts, and correspondence on the subject; the names of all dredges employed on the works since 30th June, 1906, and their owners. And copies of all telegrams, letters, reports, petitions, documents, correspondence and communications of every description in connection with the said harbour works. Also a copy of the pay-roll for each year since 30th June, 1906; the names of all foremen, superintendents and inspectors; their length of service as such, and by whom recommended; with all correspondence in connection with their appointment; and if dismissed or resigned, the reason for said dismissal or resignation; the names of all civil engineers who are or have been employed on the works, and by whom recommended; the said return to include Mr. John H. Teall, resident engineer, the date of appointment, dismissal or resignation, as the case may be, and the reason for same; and all correspondence, petitions, telegrams, letters and communications connected therewith. Presented 15th June, 1906.—*Mr. Ingram.*  
*Not printed.*
- 184.** The King's regulations and orders for the militia of Canada, 1904, 1905 and 1906. Presented 19th June, 1906, by Sir Frederick Borden..... *Not printed.*
- 184a.** Regulations respecting pay, allowances, &c., to the Canadian militia. Presented 19th June, 1906, by Sir Frederick Borden..... *Not printed.*
- 185.** Return to an order of the House of Commons, dated 9th May, 1906, showing: In respect of any or all ties purchased by the department of railways and canals during the years 1903-4 and 1904-5, from each of the following: D. J. and J. D. Buckley, of Rogersville; John Mahony, of Rogersville; and Jude F. Gallant, of Rogersville; (a) the classes and quantities of ties; (b) prices paid; (c) the places of delivery; (d) the number rejected; (e) the name of the inspectors who represented the government; (f) the quantity and value of the ties in store at Rogersville at the time of stock taking for the fiscal year 1904-5; (g) a copy of all correspondence, orders or papers of any nature in the possession of the department of railways and canals, or any official thereof, relating to the ordering, purchasing, receiving, checking, inspecting, or refusing of any of said ties. Presented 19th June, 1906.—*Mr. Ames.*..... *Not printed.*
- 186.** Return to an order of the House of Commons, dated 28th May, 1906, showing the number of mail contracts in Elgin County, giving location, number of miles, names of couriers, and prices paid; also date of commencement, date of expiration, and names of bondsmen; also particulars of tenders, if any were called for; the name of each preceding contractor, with the name of courier, and the price paid. Presented 19th June, 1906.—*Mr. Ingram.*..... *Not printed.*
- 187.** Return to an order of the House of Commons, dated 14th May, 1906, showing: (1) What aid has been given by the Dominion government to the governments of the various provinces of the Dominion since confederation, for or towards the building of provincial railways, either by original aid or by ultimately bearing a share of the cost of such undertakings. (2) What railway subsidies or aids originally granted or agreed to be granted, by the provinces respectively, have been ultimately paid or borne by the Dominion in aid of such railways during such period. (3) What moneys have been paid by the Dominion to the several provinces, respectively, during each such period for or in respect of such railways or the stock or bonds thereof, respectively, purchased, acquired or taken over in whole or in part by the Dominion. Presented 21st June, 1906.—*Mr. Macdonell.*  
*Printed for sessional papers.*
- 188.** Return to an order of the House of Commons, dated 14th May, 1906, showing what lands have been selected by the Canadian Northern Railway Company, in accordance with the order in council of 10th August, 1903, in townships 15 to 20, both included, in ranges 9, 10, 11 and 12, west of 1st meridian. Also any lands reserved for selection by the Canadian Northern Railway Company, in the territory mentioned above, that may have reverted to the government by reason of the said company not exercising its right of selection thereto before 31st December, 1905, in accordance with the visions of order in council of the 10th August, 1903. Presented 22nd June, 1906.—*Mr. J. (Marquette)*..... *Not printed.*

---

---

## CONTENTS OF VOLUME 14—*Continued.*

- 188a.** Return to an order of the House of Commons, dated 9th May, 1906, showing all lands selected by the Canadian Northern Railway Company from that portion of the lands reserved for selection by the said company, in townships 15 to 20, both included, in ranges 9, 10, 11 and 12, west of 1st meridian. Also a return of all lands patented to the nominees of the Canadian Northern Railway Company in the territory above-mentioned, and the names of the patentees, since 29th June, 1905. Presented 22nd June, 1906.—*Mr. Roche (Marquette)*..... *Not printed.*
- 189.** Return to an order of the House of Commons, dated 21st May, 1906, for a copy of all petitions and papers of every kind concerning the claims of certain retired servants of the Hudson's Bay Company, under a deed of sale by the said company to Lord Selkirk in 1811. Presented 22nd June, 1906.—*Mr. McCraney*..... *Not printed.*
- 189a.** Return to an order of the House of Commons, dated 17th July, 1905, for copies of all correspondence, documents, and memorials between the government or any member thereof, and the Rev. James Taylor, or any other person, on behalf of the retired servants of the Hudson's Bay Company, in reference to their claim to a portion of the estate of the late Lord Selkirk. Presented 27th June, 1906.—*Mr. Lamont*..... *Not printed.*
- 190.** Return in part to an address of the Senate, dated 27th April, 1906, for a statement of all accidents that occurred on the Intercolonial Railway during the years 1897, 1898, 1899, 1900, 1901, 1902, 1903, 1904 and 1905, specifying each accident, whether by collision, derailing, fire or otherwise, and the amount of damages of each such accident, mentioning the localities where such accidents occurred. Also the amount of losses each year, by theft or otherwise, of goods or freight, in transit, on the Intercolonial Railway, for each year as above. Presented 22nd June, 1906—*Hon. Mr. McDonald (Cape Breton)*..... *Not printed.*
- 191.** Return showing : 1. What sums have been paid Messrs. Ahearn & Soper of Ottawa, in each year since 1896. 2. For what supplies or services were these payments made. Presented 25th June, 1906, by *Hon. C. S. Hyman*..... *Not printed.*
- 192.** Return showing the total sums that have been paid by the government to the Manitoba *Free Press* and *Der Nordwester* Publishing Companies, for all services, for each of the financial years commencing 1st July, 1900, and ending 30th June, 1905. Presented 25th June, 1906, by *Sir Wilfrid Laurier*.  
*Not printed.*
- 193.** Return to an order of the House of Commons, dated 9th May, 1906, for a copy of all correspondence, inquiries with officials, engineers, solicitors, contractors and others, bearing upon the accident to the wharf at Sorel, together with all documents in connection with the same. Presented 25th June, 1906.—*Mr. Blain*..... *Not printed.*
- 194.** Return to an address of the Senate, dated 19th June, 1906, calling for a statement since 1st March, 1904, showing : 1. Which are, more particularly at Quebec, Montreal and Ottawa, the newspapers, or the printing companies or firms, which publish advertisements or printed documents on account of the commissioners of the Transcontinental Railway. 2. How much has each of these newspapers or of these companies or firms received, and what is the date of each payment. 3. For what kind of services, advertisements, printing or puffs, and how much for each kind, have these newspapers or these companies or firms been paid. Presented 25th June, 1906.—*Hon. Mr. Landry*. *Not printed.*
- 195.** Return to an order of the House of Commons, dated 23rd April, 1906, for a copy of all letters, correspondence, papers, reports and accounts relating to the construction of a fish ladder at Cowie's Dam, lower pulp mill, Milton, Queen's County, N.S., and of the accounts showing the cost of construction of the said ladder, the amount paid for labour and material, and to whom paid. Presented 30th June, 1906.—*Mr. Crockett*..... *Not printed.*
- 196.** Return to an order of the House of Commons, dated 30th April, 1906, showing, by townships, all Indian lands sold or disposed of within the boundaries of the present electoral district of East and West Algoma, during the years 1896 to 1905, both inclusive, with the names and addresses of purchasers or lessees, and the prices paid or agreed to be paid, for such lands, by way of rental or purchase money ; also showing, by townships, when the said purchases were completed, or when the final payments were made and the total amount paid for such lands ; also showing, by townships, what agreements for sale are in default, and for what period the same have been in default ; also showing what agreements for sale or lease, by townships, have been cancelled for non-payment of performance of conditions. Presented 3rd July, 1906.—*Mr. Boyce*.  
*Not printed.*

---

---

 CONTENTS OF VOLUME 14—*Continued.*

- 196a.** Return to an order of the House of Commons, dated 30th April, 1906, for a copy of all the returns and reports made by Indian agents or other officials in the employment of the government, having charge of Indian lands in the territory now included within the boundaries of the present electoral districts of East and West Algoma, showing all sales, transactions and cancellations of lands in such territory, from the 1st July, 1896, to the 1st April, 1906. Presented 3rd July, 1906.—*Mr. Boyce.*  
*Not printed.*
- 197.** Return to an order of the House of Commons, dated 28th May, 1906, for a copy all correspondence between Joseph Rirm and the government in reference to the surface right for coal on the northeast  $\frac{1}{4}$  of section 26, township 1, range 6, west of the 2nd meridian. Also a copy of all letters, papers and telegrams, from any other party or parties in reference to the same. Presented 5th July, 1906.—*Mr. Roche (Marquette)* ..... *Not printed.*
- 198.** Return to an order of the House of Commons, dated 14th March, 1906, for copies of all letters, telegrams, reports or other communications which, between the 1st of July, 1904, and the 31st December, 1905, passed between the Minister of the Interior, or any official of his department, on the one hand, and (a) the Canadian Northern Railway Company; (b) the Manitoba and Southeastern Railway Company; (c) the Qu'Appelle, Long Lake and Saskatchewan Railway Company, or any company to whom any of said companies shall have transferred its land rights, in regard to the area in which any of said companies were to be permitted to select land due by way of subsidy. Presented 5th July, 1906.—*Mr. Ames* ..... *Not printed.*
- 199.** Return to an order of the House of Commons, dated 21st March, 1906, showing: 1. The description of all lands in Manitoba and the Northwest, formerly reserved for timber or hay purposes, to which homestead entries have been granted since 1st January, 1905. 2. The date of decisions to open such reservations for settlement. 3. The names of applicants, in order of application, on the books of the various agencies and sub-agencies, for each quarter section, at the date when the entry was granted. Presented 5th July, 1906.—*Mr. Lake* ..... *Not printed.*
- 200.** Return to an order to the House of Commons, dated 21st March, 1906, showing the number of applications for inspection received at the several land agencies in Manitoba and the Northwest for each month of the years 1904 and 1905, from homesteaders desiring to secure their patents. 2. The number of inspections made monthly from each agency. 3. The number of applications for inspection on file 1st January, 1906, at each agency. Presented 5th July, 1906.—*Mr. Lake* ..... *Not printed.*
- 201.** Return to an address of the House of Commons, dated 2nd April, 1906, for copies of all correspondence between the pilotage commissioners, the secretary of the Board of Pilot Commissioners, or any of the officials of that board, at Sidney, Cape Breton, and the department of marine and fisheries, or any of the officials of the said department, and all orders in council, regulations, memoranda, books, documents and papers, showing: (1) the amount paid into the pilots' retiring fund in each year from the 31st December, 1896, to 31st December, 1905, respectively; (2) the amount paid into the pilots' widows' and orphans' relief fund from 31st December, 1896, to 31st December, 1905, respectively; (3) the disposition made of the said funds in each year during the above-mentioned period; the amount on hand on the 31st December, 1905; the interest it bears; where it is deposited; the security for its safety for the benefit of the widows and orphans of the pilots; (4) the amount on hand in these funds, respectively, on 31st December, 1896. Also all other correspondence, if any, bearing on this matter. Presented 5th July, 1906.—*Mr. Boyce* ..... *Not printed.*
- 202.** Return to an order of the House of Commons, dated 14th March, 1906, showing (a) how many wrecks occurred in the river and gulf of St. Lawrence during the season of 1905; (b) the names, tonnage and character of the vessels so wrecked; (c) whether such wreck resulted in a total loss of the ship and cargo, or either, in any and what cases; (d) to what causes each of said wrecks were attributable; (e) whether any inquiry was held in any and what cases. Also for a copy of all reports, evidence, correspondence, documents and papers, relating to or connected with the said wrecks, the inquiries concerning the same, and the loss thereby occasioned. Presented 5th July, 1906.—*Mr. Borden (Carleton)* ..... *Not printed.*
- 202a.** Return to an address of the Senate, dated 15th March, 1906, for a copy of all the instructions given, of all the evidence heard, of the judgment rendered, and of all communications exchanged on the subject of the wreck of the steamer *Bavarian* last autumn upon the Wye rocks, and of the inquiry held thereinto, as well as of the correspondence exchanged between the department of marine and fisheries and any person whomsoever regarding the choice of the judge holding the inquiry and of his assessors. Presented 23rd April, 1906.—*Hon. Mr. Landry* ..... *Not printed.*

---

---

## CONTENTS OF VOLUME 14—*Concluded.*

- 203.** Return to an order of the House of Commons, dated 28th May, 1906, for copies of all correspondence between any minister of any department and the company of the port of Chicoutimi or any other company or person regarding the dredging of the Saguenay down to the present year. Presented 7th July, 1906.—*Mr. Girard* ..... *Not printed.*
- 204.** Return to an address of the House of Commons, dated 23rd April, 1906, for a copy of all orders in council, reports, letters, telegrams, communications, documents and papers of every kind, relating to the establishment, acquisition, construction, enlargement and maintenance of a hospital for trachoma patients at or near Halifax, N.S., including a statement of all sums of money expended in connection therewith, whether for establishment, acquisition, construction, enlargement or maintenance; also a statement of the person or persons to whom such moneys were paid, the amount paid in each instance, as well as the date of payment, and generally all particulars concerning the said hospital from the time when it was first established. Presented 7th July, 1906.—*Mr. Wilson, (Lennox and Addington)* ..... *Not printed.*
- 205.** Return to an order of the House of Commons, dated 14th March, 1906, showing in the case of every homestead against which, during the year 1904 and 1905 a report of non-compliance with the law, or a demand for cancellation has been received by the Dominion land office or offices: giving (a) the location of said quarter section range, township and meridian; (b) the name and address of the party by whom the original entry was made; (c) the name and address of the party or parties (if there have been several) who endeavoured to lodge cancellations; (d) the reason alleged by complaints why cancellation of entry should be allowed; (e) whether warning of threatened cancellation was served upon the alleged delinquent; (f) the action taken by the department in each case. Presented 9th July, 1906.—*Mr. Ames* ..... *Not printed.*
- 206.** Return to an order of the House of Commons, dated 30th April, 1906, showing in detail for each year from 1891 to 1895, inclusive: 1. A statement of all goods supplied to Mr. Speaker's apartments, and the amount paid therefor. 2. An inventory of all goods in the apartments taken on the vacation of the office of Speaker, by Mr. Bain, Mr. Brodeur and Mr. Belcourt and any reports of the Clerk of the House, the Serjeant-at-Arms, or other officer, with reference to the inventories, the goods supplied, their condition and the care and disposition of the same. 3. A copy of all correspondence had by the Speaker, any member of the Internal Economy Commission, the Clerk of the House, the Auditor General, or any of the other officers of the House of Commons, in reference to the purchase, payment, checking, distribution, replenishing, disposal or care of the same. 4. A copy of all resolutions passed by the Internal Economy Commission in reference to the above matters. Presented 9th July, 1906.—*Mr. Lancaster* ..... *Not printed.*
- 207.** Return to an address of the House of Commons, dated 23rd April, 1906, for copies of all correspondence since 1896 between the Government of Canada, or any member thereof, and the German or British Governments, or any person or persons officially or otherwise representing those governments; and copies of all documents and papers in possession of the government, respecting the tariffs of Germany and Canada, in relation to each other. Presented 11th July, 1906.—*Mr. Armstrong* ..... *Not printed.*

FOURTH CENSUS

OF CANADA 1901

---

VOLUME III MANUFACTURES

OTTAWA

ED BY S. E. DAWSON, PRINTER TO THE KING'S MOST  
EXCELLENT MAJESTY

1905

## REPORT ON MANUFACTURES

---

### FOURTH CENSUS OF CANADA 1901

The tables of the third volume of the Census of 1901 relate to the Manufactures of the Dominion, and are given for all industrial establishments having five employees and over.

ARCHIBALD BLUE,  
Special Census Commissioner.

The Census Office,  
Ottawa, April, 1904.

# FOURTH CENSUS OF CANADA, 1901.

## MANUFACTURES.

The census of manufactures is presented in tables i. to xxiv. of this volume (pp. 2-371).

In tables i. to vi. (pp. 2-105) statistics of classes of industries are given to show (1) values of real estate, plant and working capital, (2) salaries and wages of persons employed, (3) working time of employees, (4) miscellaneous expenses, including rent of works, of power and heat and of offices, cost of fuel and light, taxes, interest and contract work, (5) cost of materials and value of products, and (6) mechanical power employed in works; in tables vii. to xii. (pp. 106-155) statistics by the same classification are given for the Dominion; and in tables xiii. to xv. (pp. 156-271) statistics of capital, wages, materials and products are given for census districts, provinces and the Dominion.

Tables xvi., xvii., xix., xx. and xxi. present comparative statistics for the census years 1881, 1891 and 1901.

In tables xvi. and xvii. (pp. 272-293) comparison is made for those years by number of establishments and value of products. In tables xviii. and xix. (pp. 294-325) are shown groups of values of production for districts, provinces and the Dominion,—in the first of these for 1901 only and in the second for the three census years. Comparison is made in tables xx. and xxi. (pp. 326-341) of population, value of capital, number of wage-earners and cost of wages and materials and value of products (1) in towns and cities of 5,000 inhabitants and over, and (2) in villages and towns of 1,500 to under 5,000.

In preparing a scheme for the census of manufactures it was decided to limit its scope to statistics of the factory or workshop system as distinguished from those of the domestic or hand system of labour, and in the instruction to enumerators a manufacturing establishment or factory was described as 'any premises, building, room or place where steam, water or other power is used to move or work machinery employed in preparing, manufacturing or finishing any article, substance, material, fabric or compound, or to aid the manufacturing process carried on there, or any premises, building, room or place wherein the employer of the persons working there has the right of access and control, and in which any manual labour is exercised by way of trade or for purposes of gain, in making, altering, repairing, ornamenting or finishing any article or part of article to adapt it for sale.' As defined in Murray's New English Dictionary, a factory is a building or range of buildings with plant for the manufacture of goods; and Johnson's Universal Cyclopædia defines it to be 'an establishment where several workmen are collected for the purpose of obtaining greater and cheaper conveniences of labour than could be obtained individually in their homes, for producing results by their co-operation which they could not accomplish separately, and for preventing the removal of articles from place to place during the several processes of manufacture.' The factory system of manufacture, according to the instruction, is distinguished from the domestic or hand system of labour. In the

English, Ontario and Quebec statutes the term as used for inspection purposes is given specific definition, differing in some particulars in each statute, but implying in all of them the employment of several persons in one establishment. In Ontario the provisions of the Factory Act do not apply unless more than five persons are employed in any establishment of a kind named in the schedules to the Act, nor where children, young girls or women are employed at home when neither steam, water nor other mechanical power is used in aid of manufacturing processes. Under the Quebec Act every establishment of a kind named in the schedules is a factory for the purposes of inspection; and this is now the case also under the English Act. But in the new English Act provision is made for the inspection of outworkers in a way that promises to be practical and helpful, so that if factory owners and inspectors and the local health authorities but do their duty under it the condition of outworkers will be nearly as well looked after as the employees in the ordinary kind of factory or shop. Our census, however, is not concerned with the health of employees in shops or factories. It undertakes to deal only with the statistics of industries, but in so doing it takes account of all the workers of an establishment, whether their operations are carried on in a building provided and equipped by the owner of the works, or at their own homes, or elsewhere. The instructions to enumerators therefore provided, as qualifying the meaning of the term 'manufacturing establishment or factory' that 'no manufacturing establishment or factory will be so recognized for census purposes which does not employ at least five persons, either in the establishment itself or as piece-workers employed out of it.' The use of this minimum number of employees to constitute a recognized factory is purely conventional, just as in the statistics of agriculture a minimum area of five acres has been taken as constituting a farm. But the instructions provided that the limitation should not apply to cheese and butter factories, nor to certain mineral products, in which industries large operations may be carried on with less than five employees; and the limitation being conventional it is no doubt the case that some industries (flour and grist mills and electric light plants, for example) have not been enumerated with sufficient fullness. The plan however has served the purpose of keeping the statistics of the hand and domestic trades—such as baking, blacksmithing, basket-making, carpentry, dressmaking, shoemaking, spinning, tailoring and weaving—out of the statistics of manufacturing establishments, and data have been gathered and compiled with which proper comparisons may be made in studying the manufacturing industries of the country.

With the object of utilizing the census of manufactures in 1891 for comparative purposes, table xxii. (pp. 342-353) has been prepared with the help of the returns for that year. It shows the statistics of (1) works employing less than 5 persons, (2) works employing 5 persons and over, and (3) all works, grouped by kinds of industries. Finally, table xxiii. (pp. 354-361) presents the comparative statistics of manufactures in the Dominion in 1891 and 1901 for all works employing five persons and over, grouped by kinds of industries.

The names or kinds of the various industries whose statistics are presented in tables i. to xxiii. for the census year 1901 and the number of establishments comprised in each industry are given in table xxiv. (pp. 362-371) for provinces and the Dominion. All of the twenty-four tables have been compiled from the schedule of manufactures in so far as they relate to the census of 1901, and the data for them were collected directly from manufacturers.

The schedules used in taking the census of manufactures were approved and endorsed by the Canadian Manufacturers' Association, and in a circular letter issued to manufacturers the Association stated that it was a matter of the greatest importance that accurate information on the manufacturing industries of Canada should be obtained, and that to this end they had urged upon the Government the advisability of appointing special agents for the census of manufactures. 'Manufacturers may be assured,' the letter said, 'that all information will be absolutely private and will not be used in any way individually, but simply in totals for statistical purposes.' This assurance was already given in the book of instructions issued by the Census Office, which dealt with the obligations of all officers, clerks, enumerators and other persons employed in census work. 'Every officer or other person employed in any capacity on census work,' Instruction 23 reads, 'is required to keep inviolate the secrecy of the information gathered by the enumerators and entered on the schedules or forms. An enumerator is not permitted to show his schedules to any person, nor to make or keep a copy of them, nor to answer any question respecting their contents, directly or indirectly; and the same obligation of secrecy is imposed upon commissioners and other officers or employees of the outside service, as well as upon every officer, clerk or other employee of the Census Office at Ottawa. The facts and statistics of the census may not be used except for statistical compilations, and positive assurance should be given on this point if a fear is entertained by any person that they may be used for taxation or any other object.' In keeping with this pledge the compilations of returns for publication have been so made as to preserve the confidence of every owner of works, and whenever less than three returns have been made for any class or kind of industry in a census district, a province or the Dominion, they have been compiled under the general head of 'all other industries.'

Special agents for the census of manufactures were employed only in the larger or more important centres of industry, and elsewhere the work was done by the regular enumerators. Special agents were appointed in the following places, some of which are small counties with many establishments:—

*British Columbia—*

Nanaimo  
New Westminster  
Vancouver  
Victoria

*Manitoba—*

In Quebec one special agent had charge of the work for the whole province, who directed the operations of sub-agents; but elsewhere the Census Office kept in close touch with agents by correspondence.

#### GLOSSARY OF TERMS.

For a proper understanding of terms used in the tables of manufactures and elsewhere throughout this report, the following glossary has been prepared :

- Abrasive goods.** Includes wheels made of carborundum, corundum and emery.
- Artificial limbs and trusses.** Under this head surgical appliances are included.
- Axes and tools.** Includes files, forks, machine knives, shovels and spades.
- All other industries.** This term is used to indicate all establishments of which less than three of their kind have been reported, but whose several kinds and respective numbers are given in footnotes to the various tables for census districts, provinces and the Dominion.
- Baking powder and flavouring extracts.** Includes also essences and perfumes.
- Boots and shoes.** Under this head is included footwear of all descriptions, whether of leather, rubber, felt or cloth.
- Boxes, wooden.** Includes also packing cases, cheese boxes and butter packages.
- Brass castings.** Includes brass finishings and brass fittings.
- Bread, biscuits and confectionery.** Includes the baking of biscuits, bread, cakes, pastry and the manufacture of candies and confections of all kinds.
- Capital.** Includes buildings, land, machinery and motive power, tools, implements and working capital.
- Cardboard.** Includes cards and paper board.
- Carriage and wagon materials.** Includes axles, bent goods, carriage tops, hubs, spokes, springs, supplies and trimmings, and wheels.
- Cars and car works.** Includes rolling stock for railways.
- Clothing, men's.** Includes custom work and repairing, and factory products.
- Clothing, women's.** Includes dress and mantle making, millinery and repairing.
- Clothing, women's (factory product).** Includes costumes, shirtwaists, skirts, skirt-binding, white-wear and wrappers.
- Coffee and spices.** Includes chicory.
- Coffins and caskets.** Includes undertakers' supplies.
- Cost of materials.** Except where otherwise specified in the tables of manufactures, this term includes the value of all materials whether in the raw or partly manufactured state.
- Drugs.** Includes chemicals and glycerine.
- Electrical apparatus and supplies.** Includes electric motors.
- Explosives.** Includes blasting powder, dynamite, gunpowder, nitro-glycerine, etc.
- Fish, preserved.** Includes the canning, drying, salting and otherwise curing of fish of all kinds.
- Flouring and grist mill products.** Includes cereal foods, cornmeal and oatmeal.
- Foundry and machine shop products.** Includes furnaces, heaters, iron pipe, machinery of all kinds, radiators and stoves.
- Fruit and vegetable canning.** Includes preserved fruits.
- Furnishing goods.** Includes men's collars, shirts, suspenders and ties.
- Gas machines.** Includes acetylene gas generators and meters.
- Hairwork.** Includes hair cloth and hair goods.
- Harness and saddlery.** Includes trunks, valises and whips.
- Interior decorations.** This term is used to denote the interior fittings used in banks and offices ; also stair-building and other decorative designs and constructions.
- Iron and steel products.** Includes bolts and nuts, forgings, hinges, nails and tacks, rivets and spikes and rolling mill products.
- Lead bar and pipe.** Includes sheet lead and shot.
- Log products.** All products of the log-lath, lumber, pulp, shingles, staves and spool wood.
- Lumber products.** Includes the products of planing mills and sash, door and blind factories and excelsior.
- Manufacturing industry.** See definition of factory or manufacturing establishment, page v.
- Mats and rugs.** Includes matting.
- Mechanical power.** This term indicates the various kinds of power used to move the machinery and other accessory aids for promoting the interests of the establishment, with their total of actual horse power, whether owned, leased or rented.

**Miscellaneous expenses.** Includes contract work, cost of fuel and heat, interest, municipal and provincial taxes, rent of heat, offices, power and works, and any other expenses of the establishment not included under the foregoing heads.

**Musical instruments.** Includes band instruments.

**Musical instrument materials.** Includes piano actions, supplies and strings.

**Officers, managers and salesmen.** This term denotes employees to whose charge is given the conduct, management and supervision of operations and the placing of products on the market.

**Oils.** Includes fish, linseed and lubricating oils and refined petroleum.

**Optical goods.** Includes spectacles and eye glasses.

**Owners.** Includes managing directors when the establishment is operated by joint stock or limited liability companies.

**Plumbing and tinsmithing.** Includes steamfitting, gasfitting, can-making, tinsmithing, sheet metal working and coppersmithing.

**Printing and bookbinding.** Includes engraving, lithographing and embossing.

**Raw materials.** Includes materials in the natural state.

**Roofing and roofing materials.** Includes asphalt and felt roofing.

**Rubber and elastic goods.** Includes rubber stamps, tires, and rubber goods other than footwear.

**Salaries.** Payments to managers, officers and salesmen, and allowances to owners or partners for service in the conduct of operations.

**Silversmithing.** Includes electroplating and gold and silver-plating.

**Value of products.** The value as fixed at the factory or workshop of the finished products, including the amount received for custom work and repairing.

**Vinegar and pickles.** Includes cider.

**Visible capital.** The capital invested in buildings, land, machinery and tools and implements.

**Wage-earners.** Includes those workers actually engaged in the manufacturing processes of the establishment, either in it or as piece-workers out of it (outworkers).

**Wages for labour.** The sum paid to wage-earners working in the establishment, or as piece-workers at home or elsewhere.

**Wire.** Includes wire rope and all wire goods except wire for fencing.

**Woodworking and turning.** Includes bobbins, handles, rollers and spools.

**Working capital.** Includes cash on hand, bills receivable, unsettled ledger accounts, raw materials, stock in process of manufacture and finished products on hand.

**Working time.** Includes the aggregate number of days worked by each employee in the year, the average number of hours that operatives are employed in the week, and the number of months in the year that an establishment is kept in operation.

The schedule of manufactures was prepared with a view to procure a statement of the quantity and value of each class of manufactured goods produced by a factory or workshop when more than one line was made; but in many cases only the leading article has been given in the returns, with the total value for all products. The glossary shows the various classes of products included in a general term, as made apparent by the details of many returns, and obviously the kinds of goods made in the country have a much wider range than is indicated by the lists of manufactures in the printed tables.

#### STATISTICS OF MANUFACTURES.

The census of manufactures has been taken for 14,650 establishments in the Dominion, representing 264 classes of industries. The value of total capital employed is \$446,916,487, consisting of \$209,378,638 in lands, buildings, machinery and motive power, tools and implements, and \$237,537,849 in working capital. The number of persons employed on salaries is 30,691 with salaries of \$23,676,146, and the number on wages 313,344 with wages of \$89,573,204, making the number of employees of all classes 344,035 and the cost of salaries and wages \$113,249,350. The aggregate working time of wage-earners in the census year is for men sixteen years and over 55,454,024 days, for women sixteen years and over 15,482,934 days and for children under 16 441 days, being for the three classes of wage-earners a work-

ing time of 73,737,399 days, and the average of working time per week is 56.70 hours. Of the whole number of 14,650 establishments, 6,328 were employed full time in the census year, 1,277 three-quarters time, 4,778 half time, 1,506 quarter time, and of 761 no working time is given. The miscellaneous expenses of all factories and shops comprise \$1,511,608 for rent of works, \$541,480 for rent of power and heat, \$6,529,697 for fuel and light, \$1,385,119 for municipal taxes, \$363,753 for provincial taxes, \$12,557,427 for rent of offices, interest, insurance, internal revenue tax, etc., and \$1,799,753 for contract work, being a total of \$24,688,837. The cost of materials used is \$266,527,858, being \$149,508,062 for crude and \$117,019,796 for partly manufactured materials. Summed up under principal heads of expenditure, the outlay of manufacturing establishments in the census year is found to be:—

For salaries and wages.....	\$113,249,350
For materials, raw and partly manufactured.....	266,527,858
For miscellaneous expenses.....	24,688,837

Making a total of \$404,466,045 The value of total products is \$481,053,375, being for goods manufactured in establishments \$469,258,351 and for custom work and repairing \$11,795,024.

#### FIXED AND WORKING CAPITAL.

The fixed and working capital of manufacturing establishments is shown by provinces in table 1,—the former consisting of land, buildings, machinery and motive power, tools and implements to the value of \$209,378,638, and the latter of money invested, cash on hand, bills receivable, unsettled ledger accounts, raw materials, stock in process of manufacture and finished products on hand, to the value of \$237,537,849.

1. VALUES OF REAL ESTATE, PLANT AND WORKING CAPITAL.

Provinces.	Establishments.	Lands.	Buildings.	Machinery and motive power.	Tools and implements.	Working capital.	Total capital.
	No.	\$	\$	\$	\$	\$	\$
B. Columbia...	392	2,231,764	3,563,442	3,538,399	1,817,565	11,700,722	22,901,892
Manitoba.....	324	532,615	1,335,189	1,619,006	255,225	3,797,756	7,539,691
New Brunswick	919	982,604	3,928,498	5,202,803	1,047,945	9,579,320	20,741,170
Nova Scotia...	1,188	1,455,884	6,677,926	10,607,179	3,555,180	12,290,247	34,586,416
Ontario.....	6,543	10,562,536	31,317,539	40,989,517	9,674,045	122,428,638	214,972,275
P. E. Island...	334	80,600	391,088	217,000	313,018	1,086,060	2,081,766
Quebec.....	4,845	11,109,795	22,036,527	28,273,590	5,148,887	75,835,008	142,403,407
The Territories.	105	53,521	335,399	382,407	92,445	826,098	1,689,870
Totals ...	14,650	27,059,219	69,585,608	90,829,901	21,903,910	237,537,849	446,916,487

The value of lands is 6.06 per cent of the whole capital, of buildings 15.57 per cent, of machinery and motive power 20.32 per cent, of tools and implements 4.90 per cent, and of working capital 53.15 per cent. The average value of fixed capital per

establishment is \$14,292 and of working capital \$16,214, making an average for both fixed and working capital of \$30,506. In British Columbia the average value of fixed and working capital per establishment is \$58,423, in Manitoba \$23,270, in New Brunswick \$22,569, in Nova Scotia \$29,113, in Ontario \$32,855, in Prince Edward Island \$6,232, in Quebec \$29,392, and in the Territories \$16,093.

## EMPLOYEES, SALARIES AND WAGES.

The employees of manufacturing establishments consist of three principal classes, viz: (1) owners and firm members taking an active part in management or work who draw a living or other allowance out of revenue; (2) officers, managers, salesmen, etc. with functions of administration; (3) the working class, who may be employed either in the establishment or out of it. Payment for service to the first and second of these classes is put under the head of salaries, and to the third class under the head of wages.

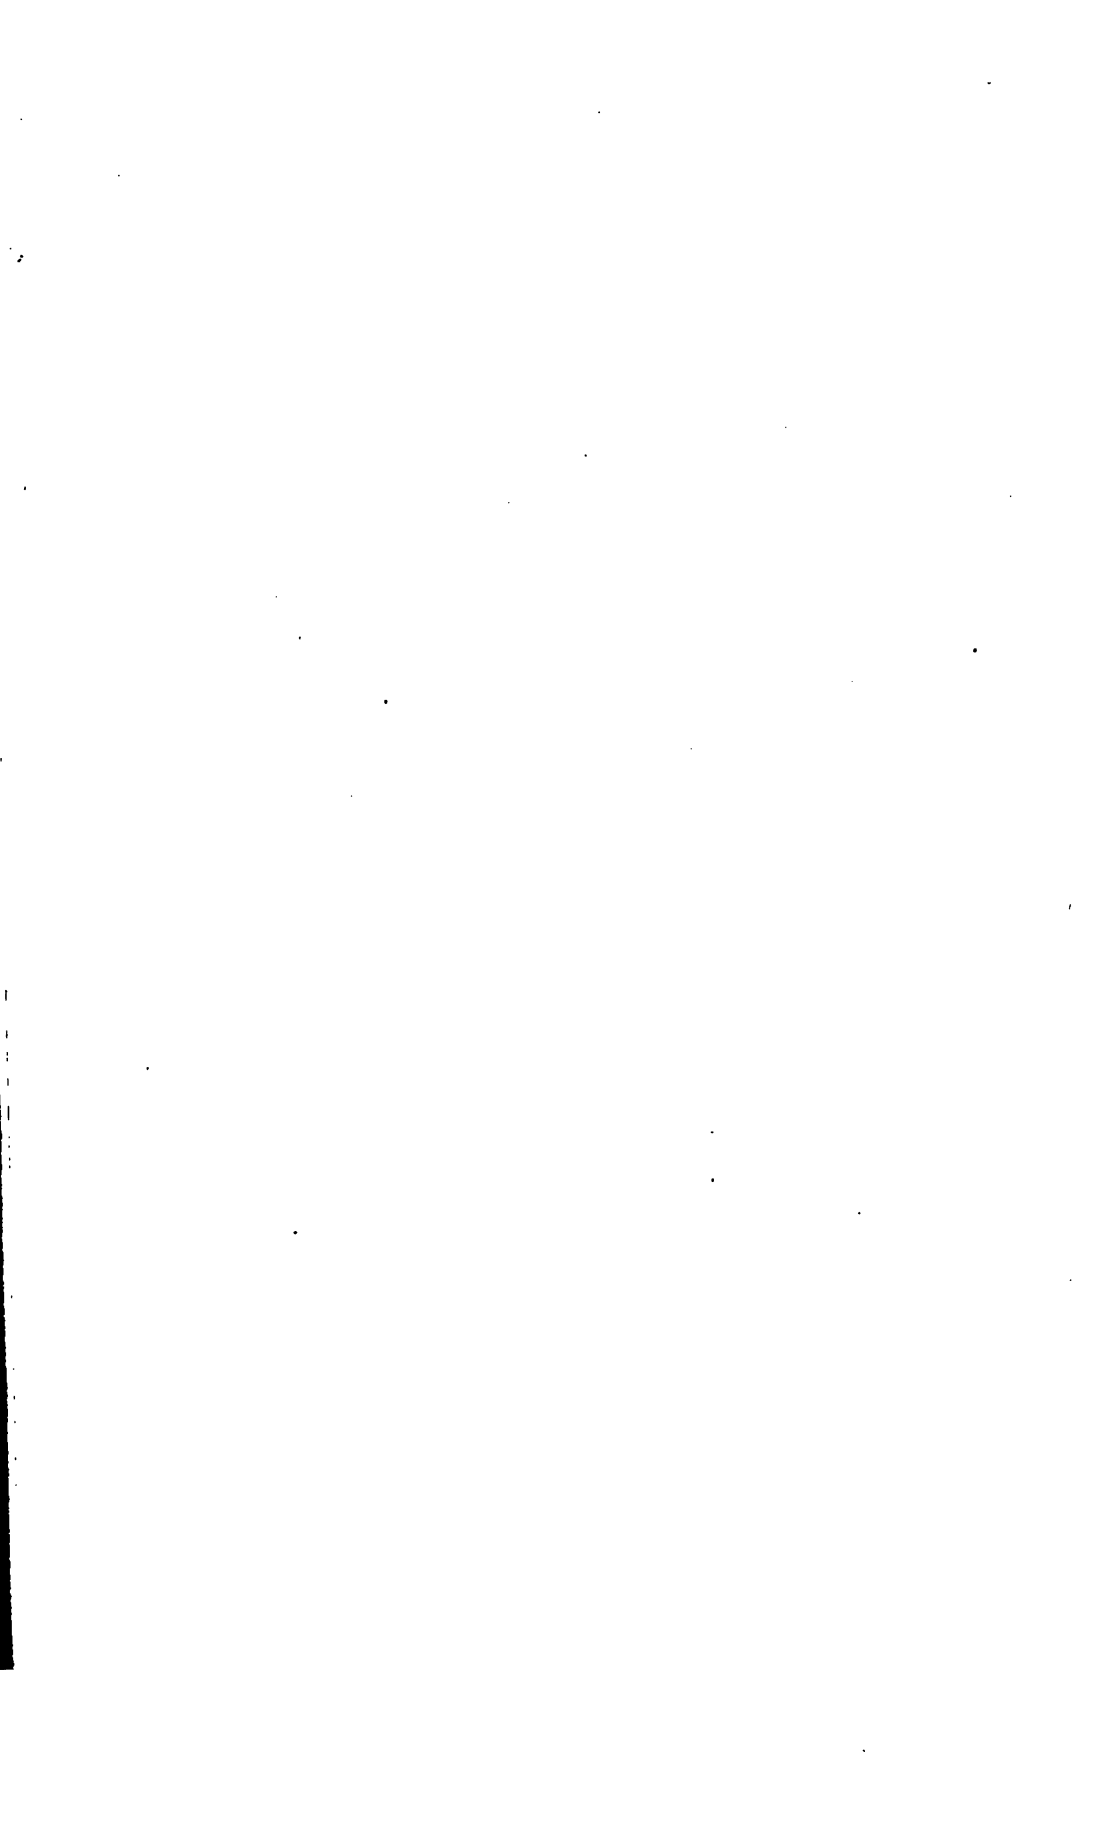

## 2. PERSONS EMPLOYED ON SALARIES.

Provinces.	Owners and firm members.		Salaried officers, managers, salesmen, etc.			
	Men.	Salaries.	Men.	Salaries.	Women.	Salaries.
	No.	\$	No.	\$	No.	\$
British Columbia.....	493	458,706	583	653,002	25	12,385
Manitoba.....	243	208,861	354	310,979	39	16,967

Prince Edward Island..	331	73,849	111	40,023	3	364
Quebec.....	3,166	3,197,556	5,137	4,272,165	547	164,523
The Territories.....	88	64,585	39	35,109	4	1,500
Totals.....	13,227	10,231,854	15,313	12,762,720	2,151	681,572

As shown in table 2, the number of owners and firm members receiving salaries is 13,227 or less than an average of one for each manufacturing establishment, and they are paid \$10,231,854 or an average of \$774. Quebec shows the highest average, \$1,003, and British Columbia the second, \$930. Nearly one-half of all owners and firm members drawing salaries are in Ontario, and they receive nearly one-half of all that is paid.

The officers, managers and others on salaries comprise 15,313 men, with an average of \$833, and 2,151 women with an average of \$317. The average salary in British Columbia is \$1,120 per man and \$495 per woman, in Manitoba \$878 per man and \$435 per woman, in New Brunswick \$721 per man and \$230 per woman, in Nova Scotia \$638 per man and \$273 per woman, in Ontario \$845 per man and \$324 per woman, in Prince

## REPORT ON MANUFACTURES

---

### FOURTH CENSUS OF CANADA 1901

The tables of the third volume of the Census of 1901 relate to the Manufactures of the Dominion, and are given for all industrial establishments having five employees and over.

ARCHIBALD BLUE,  
Special Census Commissioner.

The Census Office,  
Ottawa, April, 1904.

# FOURTH CENSUS OF CANADA, 1901.

## MANUFACTURES.

The census of manufactures is presented in tables i. to xxiv. of this volume (pp. 2-371).

In tables i. to vi. (pp. 2-105) statistics of classes of industries are given to show (1) values of real estate, plant and working capital, (2) salaries and wages of persons employed, (3) working time of employees, (4) miscellaneous expenses, including rent of works, of power and heat and of offices, cost of fuel and light, taxes, interest and contract work, (5) cost of materials and value of products, and (6) mechanical power employed in works; in tables vii. to xii. (pp. 106-155) statistics by the same classification are given for the Dominion; and in tables xiii. to xv. (pp. 156-271) statistics of capital, wages, materials and products are given for census districts, provinces and the Dominion.

Tables xvi., xvii., xix., xx. and xxi. present comparative statistics for the census years 1881, 1891 and 1901.

In tables xvi. and xvii. (pp. 272-293) comparison is made for those years by number of establishments and value of products. In tables xviii. and xix. (pp. 294-325) are shown groups of values of production for districts, provinces and the Dominion,—in the first of these for 1901 only and in the second for the three census years. Comparison is made in tables xx. and xxi. (pp. 326-341) of population, value of capital, number of wage-earners and cost of wages and materials and value of products (1) in towns and cities of 5,000 inhabitants and over, and (2) in villages and towns of 1,500 to under 5,000.

In preparing a scheme for the census of manufactures it was decided to limit its scope to statistics of the factory or workshop system as distinguished from those of the domestic or hand system of labour, and in the instruction to enumerators a manufacturing establishment or factory was described as 'any premises, building, room or place where steam, water or other power is used to move or work machinery employed in preparing, manufacturing or finishing any article, substance, material, fabric or compound, or to aid the manufacturing process carried on there, or any premises, building, room or place wherein the employer of the persons working there has the right of access and control, and in which any manual labour is exercised by way of trade or for purposes of gain, in making, altering, repairing, ornamenting or finishing any article or part of article to adapt it for sale.' As defined in Murray's *New English Dictionary*, a factory is a building or range of buildings with plant for the manufacture of goods; and Johnson's *Universal Cyclopædia* defines it to be 'an establishment where several workmen are collected for the purpose of obtaining greater and cheaper conveniences of labour than they could procure individually in their homes, for producing results by their combined efforts which they could not accomplish separately, and for preventing the loss occasioned by carrying articles from place to place during the several processes necessary to complete their manufacture.' The factory system of manufacture, according to this authority, has displaced the domestic or hand system of labour. In the

English, Ontario and Quebec statutes the term as used for inspection purposes is given specific definition, differing in some particulars in each statute, but implying in all of them the employment of several persons in one establishment. In Ontario the provisions of the Factory Act do not apply unless more than five persons are employed in any establishment of a kind named in the schedules to the Act, nor where children, young girls or women are employed at home when neither steam, water nor other mechanical power is used in aid of manufacturing processes. Under the Quebec Act every establishment of a kind named in the schedules is a factory for the purposes of inspection; and this is now the case also under the English Act. But in the new English Act provision is made for the inspection of outworkers in a way that promises to be practical and helpful, so that if factory owners and inspectors and the local health authorities but do their duty under it the condition of outworkers will be nearly as well looked after as the employees in the ordinary kind of factory or shop. Our census, however, is not concerned with the health of employees in shops or factories. It undertakes to deal only with the statistics of industries, but in so doing it takes account of all the workers of an establishment, whether their operations are carried on in a building provided and equipped by the owner of the works, or at their own homes, or elsewhere. The instructions to enumerators therefore provided, as qualifying the meaning of the term 'manufacturing establishment or factory' that 'no manufacturing establishment or factory will be so recognized for census purposes which does not employ at least five persons, either in the establishment itself or as piece-workers employed out of it.' The use of this minimum number of employees to constitute a recognized factory is purely conventional, just as in the statistics of agriculture a minimum area of five acres has been taken as constituting a farm. But the instructions provided that the limitation should not apply to cheese and butter factories, nor to certain mineral products, in which industries large operations may be carried on with less than five employees; and the limitation being conventional it is no doubt the case that some industries (flour and grist mills and electric light plants, for example) have not been enumerated with sufficient fullness. The plan however has served the purpose of keeping the statistics of the hand and domestic trades—such as baking, blacksmithing, basket-making, carpentry, dressmaking, shoemaking, spinning, tailoring and weaving—out of the statistics of manufacturing establishments, and data have been gathered and compiled with which proper comparisons may be made in studying the manufacturing industries of the country.

With the object of utilizing the census of manufactures in 1891 for comparative purposes, table xxii. (pp. 342-353) has been prepared with the help of the returns for that year. It shows the statistics of (1) works employing less than 5 persons, (2) works employing 5 persons and over, and (3) all works, grouped by kinds of industries. Finally, table xxiii. (pp. 354-361) presents the comparative statistics of manufactures in the Dominion in 1891 and 1901 for all works employing five persons and over, grouped by kinds of industries.

The names or kinds of the various industries whose statistics are presented in tables i. to xxiii. for the census year 1901 and the number of establishments comprised in each industry are given in table xxiv. (pp. 362-371) for provinces and the Dominion. All of the twenty-four tables have been compiled from the schedule of manufactures in so far as they relate to the census of 1901, and the data for them were collected directly from manufacturers.

The schedules used in taking the census of manufactures were approved and endorsed by the Canadian Manufacturers' Association, and in a circular letter issued to manufacturers the Association stated that it was a matter of the greatest importance that accurate information on the manufacturing industries of Canada should be obtained, and that to this end they had urged upon the Government the advisability of appointing special agents for the census of manufactures. 'Manufacturers may be assured,' the letter said, 'that all information will be absolutely private and will not be used in any way individually, but simply in totals for statistical purposes.' This assurance was already given in the book of instructions issued by the Census Office, which dealt with the obligations of all officers, clerks, enumerators and other persons employed in census work. 'Every officer or other person employed in any capacity on census work,' Instruction 23 reads, 'is required to keep inviolate the secrecy of the information gathered by the enumerators and entered on the schedules or forms. An enumerator is not permitted to show his schedules to any person, nor to make or keep a copy of them, nor to answer any question respecting their contents, directly or indirectly; and the same obligation of secrecy is imposed upon commissioners and other officers or employees of the outside service, as well as upon every officer, clerk or other employee of the Census Office at Ottawa. The facts and statistics of the census may not be used except for statistical compilations, and positive assurance should be given on this point if a fear is entertained by any person that they may be used for taxation or any other object.' In keeping with this pledge the compilations of returns for publication have been so made as to preserve the confidence of every owner of works, and whenever less than three returns have been made for any class or kind of industry in a census district, a province or the Dominion, they have been compiled under the general head of 'all other industries.'

Special agents for the census of manufactures were employed only in the larger or more important centres of industry, and elsewhere the work was done by the regular enumerators. Special agents were appointed in the following places, some of which are small counties with many establishments :—

*British Columbia—*

Nanaimo  
New Westminster  
Vancouver

In Quebec one special agent had charge of the work for the whole province, who directed the operations of sub-agents; but elsewhere the Census Office kept in close touch with agents by correspondence.

#### GLOSSARY OF TERMS.

For a proper understanding of terms used in the tables of manufactures and elsewhere throughout this report, the following glossary has been prepared :

- Abrasive goods.** Includes wheels made of carborundum, corundum and emery.
- Artificial limbs and trusses.** Under this head surgical appliances are included.
- Axes and tools.** Includes files, forks, machine knives, shovels and spades.
- All other industries.** This term is used to indicate all establishments of which less than three of their kind have been reported, but whose several kinds and respective numbers are given in footnotes to the various tables for census districts, provinces and the Dominion.
- Baking powder and flavouring extracts.** Includes also essences and perfumes.
- Boots and shoes.** Under this head is included footwear of all descriptions, whether of leather, rubber, felt or cloth.
- Boxes, wooden.** Includes also packing cases, cheese boxes and butter packages.
- Brass castings.** Includes brass finishings and brass fittings.
- Bread, biscuits and confectionery.** Includes the baking of biscuits, bread, cakes, pastry and the manufacture of candies and confections of all kinds.
- Capital.** Includes buildings, land, machinery and motive power, tools, implements and working capital.
- Cardboard.** Includes cards and paper board.
- Carriage and wagon materials.** Includes axles, bent goods, carriage tops, hubs, spokes, springs, supplies and trimmings, and wheels.
- Cars and car works.** Includes rolling stock for railways.
- Clothing, men's.** Includes custom work and repairing, and factory products.
- Clothing, women's.** Includes dress and mantle making, millinery and repairing.
- Clothing, women's (factory product).** Includes costumes, shirtwaists, skirts, skirt-binding, white-wear and wrappers.
- Coffee and spices.** Includes chicory.
- Coffins and caskets.** Includes undertakers' supplies.
- Cost of materials.** Except, where otherwise specified in the tables of manufactures, this term includes the value of all materials whether in the raw or partly manufactured state.
- Drugs.** Includes chemicals and glycerine.
- Electrical apparatus and supplies.** Includes electric motors.
- Explosives.** Includes blasting powder, dualin, dynamite, gunpowder, nitro-glycerine, etc.
- Fish, preserved.** Includes the canning, drying, salting and otherwise curing of fish of all kinds.
- Flouring and grist mill products.** Includes cereal foods, cornmeal and oatmeal.
- Foundry and machine shop products.** Includes furnaces, heaters, iron pipe, machinery of all kinds, radiators and stoves.
- Fruit and vegetable canning.** Includes preserved fruits.
- Furnishing goods.** Includes men's collars, shirts, suspenders and ties.
- Gas machines.** Includes acetylene gas generators and meters.
- Hairwork.** Includes hair cloth and hair goods.
- Harness and saddlery.** Includes trunks, valises and whips.
- Interior decorations.** This term is used to denote the interior fittings used in banks and offices; also stair-building and other decorative designs and constructions.
- Iron and steel products.** Includes bolts and nuts, forgings, hinges, nails and tacks, rivets and spikes and rolling mill products.
- Lead bar and pipe.** Includes sheet lead and shot.
- Log products.** All products of the log-lath, lumber, pulp, shingles, staves and spool wood.
- Lumber products.** Includes the products of planing mills and sash, door and blind factories and excelsior.
- Manufacturing industry.** See definition of factory or manufacturing establishment, page v.
- Mats and rugs.** Includes matting.
- Mechanical power.** This term indicates the various kinds of power used to move the machinery and other accessory aids for promoting the interests of the establishment, with their total of actual horse power, whether owned, leased or rented.

**Miscellaneous expenses.** Includes contract work, cost of fuel and heat, interest, municipal and provincial taxes, rent of heat, offices, power and works, and any other expenses of the establishment not included under the foregoing heads.

**Musical instruments.** Includes band instruments.

**Musical instrument materials.** Includes piano actions, supplies and strings.

**Officers, managers and salesmen.** This term denotes employees to whose charge is given the conduct, management and supervision of operations and the placing of products on the market.

**Oils.** Includes fish, linseed and lubricating oils and refined petroleum.

**Optical goods.** Includes spectacles and eye glasses.

**Owners.** Includes managing directors when the establishment is operated by joint stock or limited liability companies.

**Plumbing and tinsmithing.** Includes steamfitting, gasfitting, can-making, tinsmithing, sheet metal working and coppersmithing.

**Printing and bookbinding.** Includes engraving, lithographing and embossing.

**Raw materials.** Includes materials in the natural state.

**Roofing and roofing materials.** Includes asphalt and felt roofing.

**Rubber and elastic goods.** Includes rubber stamps, tires, and rubber goods other than footwear.

**Salaries.** Payments to managers, officers and salesmen, and allowances to owners or partners for service in the conduct of operations.

**Silversmithing.** Includes electroplating and gold and silver-plating.

**Value of products.** The value as fixed at the factory or workshop of the finished products, including the amount received for custom work and repairing.

**Vinegar and pickles.** Includes cider.

**Visible capital.** The capital invested in buildings, land, machinery and tools and implements.

**Wage-earners.** Includes those workers actually engaged in the manufacturing processes of the establishment, either in it or as piece-workers out of it (outworkers).

**Wages for labour.** The sum paid to wage-earners working in the establishment, or as piece-workers at home or elsewhere.

**Wire.** Includes wire rope and all wire goods except wire for fencing.

**Woodworking and turning.** Includes bobbins, handles, rollers and spools.

**Working capital.** Includes cash on hand, bills receivable, unsettled ledger accounts, raw materials, stock in process of manufacture and finished products on hand.

**Working time.** Includes the aggregate number of days worked by each employee in the year, the average number of hours that operatives are employed in the week, and the number of months in the year that an establishment is kept in operation.

The schedule of manufactures was prepared with a view to procure a statement of the quantity and value of each class of manufactured goods produced by a factory or workshop when more than one line was made; but in many cases only the leading article has been given in the returns, with the total value for all products. The glossary shows the various classes of products included in a general term, as made apparent by the details of many returns, and obviously the kinds of goods made in the country have a much wider range than is indicated by the lists of manufactures in the printed tables.

#### STATISTICS OF MANUFACTURES.

The census of manufactures has been taken for 14,650 establishments in the Dominion, representing 264 classes of industries. The value of total capital employed is \$446,916,487, consisting of \$209,378,638 in lands, buildings, machinery and motive power, tools and implements, and \$237,537,849 in working capital. The number of persons employed on salaries is 30,691 with salaries of \$23,676,146, and the number on wages 313,344 with wages of \$89,573,204, making the number of employees of all classes 344,035 and the cost of salaries and wages \$113,249,350. The aggregate working time of wage-earners in the census year is for men sixteen years and over 55,454,024 days, for women sixteen years and over 15,482,934 days and for children under sixteen years 2,800,441 days, being for the three classes of wage-earners a work-

ing time of 73,737,399 days, and the average of working time per week is 56.70 hours. Of the whole number of 14,650 establishments, 6,328 were employed full time in the census year, 1,277 three-quarters time, 4,778 half time, 1,506 quarter time, and of 761 no working time is given. The miscellaneous expenses of all factories and shops comprise \$1,511,608 for rent of works, \$541,480 for rent of power and heat, \$6,529,697 for fuel and light, \$1,385,119 for municipal taxes, \$363,753 for provincial taxes, \$12,557,427 for rent of offices, interest, insurance, internal revenue tax, etc., and \$1,799,753 for contract work, being a total of \$24,688,837. The cost of materials used is \$266,527,858, being \$149,508,062 for crude and \$117,019,796 for partly manufactured materials. Summed up under principal heads of expenditure, the outlay of manufacturing establishments in the census year is found to be:—

For salaries and wages .....	\$113,249,350
For materials, raw and partly manufactured .....	266,527,858
For miscellaneous expenses .....	24,688,837

Making a total of \$404,466,045 The value of total products is \$481,053,375, being for goods manufactured in establishments \$469,258,351 and for custom work and repairing \$11,795,024.

#### FIXED AND WORKING CAPITAL.

The fixed and working capital of manufacturing establishments is shown by provinces in table 1,—the former consisting of land, buildings, machinery and motive power, tools and implements to the value of \$209,378,638, and the latter of money invested, cash on hand, bills receivable, unsettled ledger accounts, raw materials, stock in process of manufacture and finished products on hand, to the value of \$237,537,849.

1. VALUES OF REAL ESTATE, PLANT AND WORKING CAPITAL.

Provinces.	Establishments.	Lands.	Buildings.	Machinery and motive power.	Tools and implements.	Working capital.	Total capital.

The Territories.	105	53,521	335,399	382,407	92,445	826,098	1,689,870
Totals ..	14,650	27,059,219	69,585,608	90,829,901	21,903,910	237,537,849	446,916,487

The value of lands is 6.06 per cent of the whole capital, of buildings 15.57 per cent, of machinery and motive power 20.32 per cent, of tools and implements 4.90 per cent, and of working capital 53.15 per cent. The average value of fixed capital per

establishment is \$14,292 and of working capital \$16,214, making an average for both fixed and working capital of \$30,506. In British Columbia the average value of fixed and working capital per establishment is \$58,423, in Manitoba \$23,270, in New Brunswick \$22,569, in Nova Scotia \$29,113, in Ontario \$32,855, in Prince Edward Island \$6,232, in Quebec \$29,392, and in the Territories \$16,093.

#### EMPLOYEES, SALARIES AND WAGES.

The employees of manufacturing establishments consist of three principal classes, viz: (1) owners and firm members taking an active part in management or work who draw a living or other allowance out of revenue; (2) officers, managers, salesmen, etc. with functions of administration; (3) the working class, who may be employed either in the establishment or out of it. Payment for service to the first and second of these classes is put under the head of salaries, and to the third class under the head of wages.

#### 2. PERSONS EMPLOYED ON SALARIES.

Provinces.	Owners and firm members.		Salaried officers, managers, salesmen, etc.			
	Men.	Salaries.	Men.	Salaries.	Women.	Salaries.
	No.	\$	No.	\$	No.	\$
British Columbia.....	493	458,706	583	653,002	25	12,385
Manitoba.....	243	208,861	354	310,979	30	16,967
New Brunswick.....	1,006	580,073	655	472,564	55	12,658
Nova Scotia.....	1,429	705,939	742	473,847	103	28,167
Ontario.....	6,471	4,942,285	7,692	6,504,961	1,375	445,008
Prince Edward Island..	331	73,849	111	40,083	3	364
Quebec.....	3,166	3,197,556	5,137	4,272,165	547	164,523
The Territories.....	88	64,585	39	35,109	4	1,500
Totals.....	13,227	10,231,854	15,313	12,762,720	2,151	681,572

As shown in table 2, the number of owners and firm members receiving salaries is 13,227 or less than an average of one for each manufacturing establishment, and they are paid \$10,231,854 or an average of \$774. Quebec shows the highest average, \$1,003, and British Columbia the second, \$930. Nearly one-half of all owners and firm members drawing salaries are in Ontario, and they receive nearly one-half of all that is paid.

The officers, managers and others on salaries comprise 15,313 men, with an average of \$833, and 2,151 women with an average of \$317. The average salary in British Columbia is \$1,120 per man and \$495 per woman, in Manitoba \$878 per man and \$435 per woman, in Nova Scotia \$638 per man and \$230 per woman, in Ontario \$845 per man and \$324 per woman, in Prince

Edward Island \$361 per man and \$121 per woman, in Quebec \$832 per man and \$300 per woman, and in the Territories \$900 per man and \$375 per woman. Fifty per cent of all the male and 51 per cent of all the female officers of establishments are employed in Ontario; and of the whole amount of salaries to male and female officers respectively 51 per cent is paid to men and 65 per cent to women in this province. In Quebec the proportion of salaried officers employed in establishments is 33 per cent men and 25 per cent women, and the proportion of salaries paid is 34 per cent to men and 24 per cent to women. Therefore 83 per cent of all male and 76 per cent of all female officers of manufacturing establishments in the Dominion are employed in these two provinces; and, computed on the total salaries for administration by sexes, the proportion paid to men in these provinces is 85 per cent and to women 89 per cent.

Compared by total number of officers employed in establishments, males are in the proportion of 87.70 and females of 12.30 per cent; and compared by total salaries, males are in the proportion of 94.92 and women of 5.08 per cent. But including owners and firm members with all employees of establishments receiving salaries, males are in the proportion by total number of 93 and females of 7 per cent, and by total salaries males are in the proportion of 97.12 and females of 2.88 per cent.

## 3. PERSONS EMPLOYED ON WAGES.

Provinces.	In establishments.						Out of establishments.	
	Men 16 years and over.	Wages.	Women 16 years and over.	Wages.	Children under 16 years.	Wages.	Piece-workers.	Wages.

Totals. ....	226,663	75,626,888	61,220	10,757,590	12,143	1,288,488	13,318	1,900,238

Employees on wages are of three classes, viz: (1) men 16 years of age and over, (2) women 16 years of age and over, and (3) children under 16 years, and in table 3 they are further classified as workers employed in establishments and as piece-workers out of establishments; but the earnings of the latter as well as those of the former are counted as wages. The workers in establishments number 300,026 and comprise 226,663 men, 61,220 women and 12,143 children, while those out of establishments number 13,318, making an aggregate of 313,344 or an average of 21 per establishment. In British Columbia the average number of all classes of workers per establishment is 27, in Manitoba

14, in New Brunswick 22, in Nova Scotia 18, in Ontario 23, in Prince Edward Island 10, in Quebec 21, and in the Territories 10. The average earnings of workers employed in establishments in the Dominion is \$292, being \$334 for men, \$176 for women and \$106 for children, while the average earnings of piece-workers employed out of establishments is only \$143. The average earnings of all classes of workers in British Columbia is \$418, in Manitoba \$411, in New Brunswick \$229, in Nova Scotia \$209, in Ontario \$295, in Prince Edward Island \$99, in Quebec \$285, and in the Territories \$351. Table 4 shows the average by provinces of each of the three classes of workers employed in establishments.

4. AVERAGE WAGES OF INWORKERS.

Provinces.	Men.	Women.	Children.
	\$	\$	\$
British Columbia.....	465	116	105
Manitoba.....	443	230	113
New Brunswick.....	256	144	93
Nova Scotia.....	254	103	60
Ontario.....	347	190	113
Prince Edward Island.....	140	45	32
Quebec.....	330	187	114
The Territories.....	358	335	115

The highest averages of earnings for men are in British Columbia, Manitoba and in the Territories; but, as has been shown, it is in Ontario and Quebec that the large aggregates of wages are earned. The average for women is abnormally high in the Territories (where they are mostly employed in men's clothing works), and excepting in the maritime provinces the averages for children are near an equality.

But a better comparison of the earnings of workers employed in establishments is obtained when working time and wages are used for the making of averages. Table 5 shows the aggregate working days in the census year of the three classes of working employees, viz.: men 16 years and over, women 16 years and over and children under 16 years, and table 3 gives the earnings of these classes respectively.

5. WORKING TIME OF WAGE-EARNERS.

Provinces.	Aggregate working days in year of			Average hours of working time per week.
	men 16 yrs. and over.	women 16 yrs. and over.	children under 16 yrs.	
British Columbia.....	1,963,113	138,091	32,771	56·34

Totals.....	55,454,024	15,482,334	2,800,441	56·70

For men employed in all industrial establishments of the Dominion the average wage per day is \$1.36, of women \$0.69 and of children \$0.46. The average wage per day for each of the three classes of workers is shown in table 6 by provinces.

6. AVERAGE WAGE-EARNINGS PER DAY.

Provinces.	Men.	Women.	Children.
	\$	\$	\$
British Columbia .....	2.12	0.98	0.67
Manitoba .....	1.93	0.92	0.50
New Brunswick .....	1.22	0.68	0.43
Nova Scotia .....	1.23	0.60	0.42
Ontario .....	1.38	0.72	0.48
Prince Edward Island .....	0.99	0.50	0.40
Quebec .....	1.29	0.66	0.44
The Territories .....	1.79	1.24	0.69

The highest average rate of wages for men is in British Columbia, Manitoba and the Territories, and the lowest in Prince Edward Island; the highest for women is in the Territories, British Columbia and Manitoba, and the lowest in Prince Edward Island and Nova Scotia; and the highest for children is in the Territories and British Columbia, and the lowest in Prince Edward Island, Nova Scotia and New Brunswick. The averages in Ontario and Quebec are close to the general average for the Dominion.

The average of working time per week, shown in table 5, is 56.70 hours—ranging from 55.8 hours in Nova Scotia, 56.34 in British Columbia, 57.7 in New Brunswick and 59.2 in Ontario, to 60.3 hours in Manitoba, 60.8 in the Territories, 61.6 in Quebec and 61.7 in Prince Edward Island.

Totals .....	14,650	30,691	23,676,146	313,344	89,573,204	113,249,350

The statistics of salaries and wages for all employees are presented in table 7,—the former including owners and firm members as well as officers and managers, and the latter all workers employed in and out of establishments. The average cost of salaries per establishment in the census year is \$1,616 and per employee \$771, and the average cost of wages per establishment is \$6,114 and per employee \$286. Table 8 shows the averages of salaries and wages per establishment and per employee in each province of the Dominion.

8. AVERAGES OF SALARIES AND WAGES.

Provinces.	Salaries		Wages		Salaries and wages	
	per establishment.	per employee.	per establishment.	per employee.	per establishment.	per employee.
	\$	\$	\$	\$	\$	\$
British Columbia.....	2,868	1,021	11,652	418	13,920	476
Manitoba . . . . .	1,657	844	5,811	411	7,468	463
New Brunswick. . . . .	1,159	621	5,096	229	6,255	259
Nova Scotia . . . . .	1,017	531	3,708	209	4,725	240
Ontario.....	1,818	766	6,825	295	8,643	339
Prince Edward Island....	342	257	993	99	1,335	117
Quebec.....	1,575	862	5,968	285	7,544	331
The Territories.....	964	772	3,472	351	4,436	399

Once more the highest average of salaries is in British Columbia, both per establishment and per employee. Ontario, Manitoba and Quebec are next in the order named in average salaries per establishment, and Quebec, Manitoba and Ontario in the order named in averages per employee, while Prince Edward Island is the lowest in average of salaries per establishment and per employee. The average of wages is also highest in British Columbia, reckoned per establishment and per employee; and, reckoned per employee, the averages of British Columbia, Manitoba, the Territories, Ontario and Quebec come in order. The lowest average per establishment and also per employee is in Prince Edward Island. Averages computed on the total of salaries and wages show the highest per establishment to be in British Columbia, followed by Ontario, Quebec, Manitoba and New Brunswick, and the highest per employee is in British Columbia, with Manitoba a near second, and the Territories, Ontario and Quebec in their order as named.

The working time of establishments in the census year is shown in table 9, classed as full, three-quarters, half and quarter time. Leaving out of the account 761 establishments or five per cent which made no return of time in operation during the census year, 43 per cent of the 14,650 were running the whole year, 9 per cent three-quarters time or nine months, 33 per cent half time or six months and 10 per cent quarter time or three months. The large number on half time includes many cheese and butter factories, which are operated chiefly during the grazing season. It will be understood, however, that working time is not a positive period. For example, half time means any period less than nine but not less than six months. In British Columbia 58 per cent of all establishments are working full time, in Ontario 51 per cent and in Quebec 39 per

## CENSUS OF CANADA, 1901.

cent; but in Ontario 26 per cent and in Quebec 47 per cent of all factories show a half time record, and in these provinces the manufacture of butter and cheese is one of the foremost industries.

## 9. WORKING TIME OF ESTABLISHMENTS IN YEAR.

## MISCELLANEOUS EXPENSES, MATERIALS AND PRODUCTS.

The miscellaneous expenses of manufacturing establishments are shown in table 10. They include (1) rent of works, (2) rent of power and heat, (3) cost of fuel and light, (4) municipal taxes, (5) provincial taxes, (6) the rent of offices, interest, insurance, internal revenue tax, etc., and (7) amount paid for contract work. The whole sum of these expenses is \$24,688,837 whereof the sixth item constitutes nearly one-half. The next highest item is fuel and light, which makes up 26 per cent of the miscellaneous expenses.

## 10. MISCELLANEOUS EXPENSES.

The materials used in the production of manufactured goods are of two classes, viz., those in the crude or natural and those in the partly manufactured state. The value of the former is \$149,508,062 and of the latter \$117,019,796, making a total of \$266,527,858.

## 11. COST OF MATERIALS AND VALUE OF PRODUCTS.

Provinces.	Crude materials.	Partly manufactured materials.	Total cost of materials.	Goods manufactured.	Custom work and repairs.	Total products.

The Territories .....	792,731	328,611	1,121,342	1,937,510	27,477	1,964,987
Totals.....	149,508,062	117,019,796	266,527,858	469,258,351	11,795,024	481,053,375

The products of establishments are shown under the heads of goods manufactured and custom work and repairs—the value of the former being \$469,258,351, and of the latter \$11,795,024, or a total of \$481,053,375.

In relation to the manufactures of the whole Dominion, the share of British Columbia is 4·04 per cent, of Manitoba 2·69 per cent, of New Brunswick 4·36 per cent, of Nova Scotia 4·90 per cent, of Ontario 50·22 per cent, of Prince Edward Island 0·48 per cent, of Quebec 32·90 per cent, and of the Territories 0·41 per cent; and although the highest averages of values of products per establishment are shown to be in British Columbia and Manitoba, the provinces of Ontario and Quebec are shown to have 83·12 per cent of the total value of products.

To facilitate comparison of the most important statistics of manufactures by provinces, the total capital invested in establishments, the cost of salaries and wages, miscellaneous expenses and materials and the value of products, together with averages per establishment, are brought together in table 12.

The cost of salaries and wages, miscellaneous expenses and materials in British Columbia is 70·4 per cent of the value of products, 86·6 per cent in Manitoba, 83 per cent in New Brunswick, 84 per cent in Nova Scotia, 85 per cent in Ontario, 81 per cent in Prince Edward Island, 84·3 per cent in Quebec and 85·66 per cent in the Territories, and for the whole Dominion it is 84 per cent. These percentages indicate that the largest margin for profits is in British Columbia, where the cost of salaries and wages, miscellaneous expenses and materials is 13·6 per cent less than the average for the Dominion, and 15·26 less than in the Territories, where the per cent for margin is lowest.

The relation of the value of products to the value of fixed and working capital is another interesting matter of comparison. In British Columbia it is 85 per cent, in Manitoba 171·46, in New Brunswick 101·11, in Nova Scotia 68·21, in Ontario 112·37, in Prince Edward Island 111·76, in Quebec 111·15, and in the Territories 116·28, while the average for the Dominion is 107·64 per cent.

The value of products less the cost of production embraced under the heads of salaries and wages, miscellaneous expenses and materials is 25 per cent of the value of capital employed in manufactures in British Columbia, 23 per cent in Manitoba, 17 per cent in New Brunswick, 11 per cent in Nova Scotia, 17 per cent in Ontario, 21 per cent in Prince Edward Island, 17 per cent in Quebec and 17 per cent in the Territories, and for the whole Dominion it is 17 per cent. The low ratio in Nova Scotia is owing to the fact that capital in that province includes large investments in iron and steel works which were only commencing to become productive in the census year. The per-

centages here given, however, must not be understood to represent the profits of the manufacturing industries in the country, as there are many small elements of cost for the collection of which the census schedule made no provisions.

## MECHANICAL POWER.

The motive power employed in manufacturing establishments consists mainly of steam, gas and gasoline, water and electricity, the statistics of which are given in table 13.

13. POWER EMPLOYED IN MANUFACTURING ESTABLISHMENTS.

Totals.....	2,206	46,461	79	2,232	25,839	28,358

The whole number of establishments reporting power is 6,620, which is 45.2 per cent of the 14,650 establishments whose statistics have been compiled into the tables. The other 8,030 include 3,576 butter and cheese factories and 573 brick, tile and pottery works whose schedules did not provide for taking records of power used, and the rest consist very largely of works in which mechanical power is rarely used, such as boot and shoe shops, bakeries, carriage and wagon works, cigar factories, men's and women's clothing establishments, etc.; but in some cases the entry of motive power was not made on the schedule.

## CENSUS OF CANADA, 1901.

The total volume of horse-power employed in manufactures is 652,653, which is developed by 11,770 powers of various kinds,—engines, water wheels, motors, etc. The number of establishments reporting power, the quantity of power expressed in h.p. and the average horse-power per establishment are shown in table 14, by provinces.

14. HORSE POWER AGGREGATES AND AVERAGES.

Provinces.	Establishments.	Horse-power used.	Average h.p. per establishment.
	No.	No.	p. c.
British Columbia .....	237	23,646	99·8
Manitoba .....	152	11,616	76·4
New Brunswick .....	473	43,742	92·5
Nova Scotia .....	493	56,691	115·0
Ontario .....	3,468	284,175	81·9
Prince Edward Island .....	52	1,778	34·2
Quebec .....	1,691	227,834	134·7
The Territories .....	54	3,171	59·0
Totals .....	6,620	652,653	98·6

The highest average of horse-power per establishment is shown to be in Quebec, the next highest in Nova Scotia, and the lowest in Prince Edward Island. In British Columbia 60 per cent of all establishments report the employment of power, in Manitoba 47 per cent, in New Brunswick 51·5 per cent, in Nova Scotia 41·5 per cent, in Ontario 53 per cent, in Prince Edward Island 15·6 per cent, in Quebec 34·9 per cent, and in the Territories 51·4 per cent. The average power employed per establishment in the Dominion is 98·6 h.p., and in the United States for the last census year (1900) it was 66·7 h.p.

Statistics of classes of power used, showing the number and power of each class and the percentage of power in each class computed on total power for all classes, are presented in table 15.

15. CLASSES OF POWER.

Classes of power.	Engines, motors, etc.	Horse-power.	Rate of power.
	NO.	NO.	p. c.
Steam engines .....	6,558	380,240	58·26
Gas engines .....	244	2,078	0·32
Water wheels .....	2,683	221,642	33·96
Electric motors .....	2,206	46,461	7·12
Other powers .....	79	2,232	0·34
Totals .....	11,770	652,653	100·00

Compared with the last United States census figures, the ratio of steam engine power to total power employed is 58.26 per cent in Canada and 77.40 per cent in the United States, of gas engine power 0.32 per cent and 1.30 per cent, of water wheels 33.96 per cent and 15.30 per cent, of electric motors 7.12 per cent and 2.80 per cent, and of other powers 0.34 per cent and 0.50 per cent in Canada and the United States respectively. The proportion of establishments reporting power in the United States is 31.1 and in Canada 45.2 per cent.

## GROUPS OF INDUSTRIES.

The 14,650 returns of manufacturing establishments have been compiled to show the statistics of each kind or class of industry in the Dominion; but where an industry embraces less than three returns it has been put into the class of 'all other industries', so that the figures of no one establishment may be given out, or become known to competitors in the same line of business.

Altogether there are in the country 264 kinds of industries, not counting the different productions of an establishment as separate industries, but taking its principal one as representing all. Of these 179 are specified by name in the tables, each comprising the statistics of three or more and in the aggregate of 14,544 establishments. In the 85 'all other industries' are given the statistics of 106 establishments, comprising 21 kinds of industries of two establishments each and 64 of one each.

A further classification is shown in table 16 by groups of industries, each group comprising the statistics of all related industries in the general table. There are altogether 14 groups of specified designation and one of 'miscellaneous industries.'

Food, clothing and housing are the three chief necessities of man, and naturally the most important groups of industries in the country are the ones concerning these wants. Food products have the chief place, and the establishments employed in them are 38 per cent of all. The materials of production in the group cost 37 per cent of all materials used in manufactures, and the value of their products is 26 per cent of the products of all industries. Timber and lumber are used for various other purposes besides the construction of buildings; and while in number of establishments, cost of materials and value of products this group of industries has the second place, it cannot be shown from the data supplied that they are entitled to rank so in the production of materials required for buildings alone. The textile group is third in number of establishments and value of products, followed at a long interval by the groups of iron and steel products and leather with its finished products, of nearly equal value. Three groups of industries, whose values range around \$20,000,000, are paper and printing, metals and metal products other than steel, and vehicles for land transportation. The chemical and tobacco groups show products exceeding \$11,000,000 in value, and three other groups (liquors and beverages, clay and glass and stone products, and vessels for water transportation) range from \$9,000,000 to \$2,000,000. The industries of the hand trades group alone fall in value of production below \$1,000,000.

Averages of all groups...		30,506	21.4	6,114	18,193	32,836

Table 17 shows the averages per establishment of capital, wage-earners, wages, cost of materials and value of products for each of the several groups of industries. The group showing the highest average of capital per establishment is liquors and beverages, and is closely followed by the group of miscellaneous industries. The food, timber and lumber, clay, glass and stone and hand trades groups alone are below the average of

capital for all industries. The lowest average of wage-earners per establishment is found in the food, clay, glass and stone groups, and the highest in the iron and steel, vessels for water transportation and leather groups; while in averages per establishment of wages for labour the highest are found in the iron and steel, vehicles for land and vessels for water groups, and the lowest in the food, clay, glass and stone and hand trades groups. The group of chemical industries presents the highest average per establishment for cost of materials, in diametric opposition to the popular conception, and closely following it is the average of the leather group. The lowest averages of cost of materials are in the clay, glass and stone and the hand trades groups. Only four groups of industries exhibit averages of value of products per establishment below the average for all industries, viz: the clay, glass and stone, the hand trades, the food and the timber and lumber groups. The highest value of products per establishment is found to be in the chemicals group, where it is \$89,354,—the leather group coming next with \$80,558 and the tobacco group third with \$73,763.

In table 18 the statistics are for establishments employing not less than five persons, except in the case of the butter and cheese factories, which under the instructions to enumerators were taken without this limitation. Inevitably therefore a large portion of the country's products are not accounted for in such industries as baking and milling grain, where usually the number of employees in a shop or mill does not exceed two or three, and in bakeries is often limited to one. Yet the products of bread,

biscuit and confectionery shops employing five hands and over is \$11,637,808, and of flouring and grist mills \$31,835,873. Two other industries in this group show large values of products,—butter and cheese with \$29,462,402, and slaughtering and meat packing with \$22,217,984. These industries as well as flour making are closely allied to the agricultural industry, which supplies their raw materials. The total value of their products is \$83,516,259, while the value of raw materials used is \$71,173,295 or 83 per cent of the finished articles at the works. The average capital of the 5,594 establishments constituting the group is \$10,219, the average rate of wage per wage-earner is \$189.44 and the ratio of wages to value of products is 6.42 per cent. The average cost of materials per establishment is \$17,722 and the average value of products \$22,382,—the highest average value per establishment being in the sugar refining industry, \$3,148,750, and the second highest in the slaughtering and meat packing industry, \$389,789. The highest averages of wages for labour are in the sausage casings industry, \$600, slaughtering, \$583.33, and sugar refining, \$510.57; but in the first of these the ratio of wages to value of products is only 2.50, in the second 1.35, and in the third 4.86 per cent. In the bread, biscuits and confectionery industry, with an average wage of \$308.56, the ratio of wages to value of products is 15.53 per cent, and in the evaporated fruits and vegetables industry, with an average wage of only \$68.33, the ratio is 26.35 per cent. The group of food products includes 27 kinds of industries, 13 of which are in the 'all other' class, viz.: chewing gum, confectioners' supplies, cottolene, egg concentrate, macaroni and vermicelli, pop corn, prepared cheese, prepared flour, rice cleaning, sausage casings, slaughtering apart from meat packing, tallow refining and yeast cakes.

The group of textiles comprises chiefly the wool, cotton and flax industries, and besides the 23 kinds of industries specified in the table the 'all other' class of 12 establishments covers 8 others, viz.: blankets and sweat pads, cotton and wool waste, embroidery, laces and braids, quilted goods, regalias and society emblems, silk and silk goods and thread. The average value of capital per establishment is \$35,989, of materials used \$20,734 and of goods produced \$40,217, while the average number of wage-earners employed is 38 and the average wages for labour \$9,101 per establishment, and an average wage per labourer of \$238.77, which represents 22.63 per cent of the value of products. The largest single industry in the group is the manufacture of cottons, in which 20 factories are employed. The average capital of these factories is \$914,935, the average cost of materials \$291,363 and the average value of products \$601,653. The wage-earners average 594 per factory and the wages for labour \$167,623. The ratio of wages to value of product is 27.86 per cent, and the average earnings of labour is \$282.14. The second largest industry is the manufacture of woollen goods, which employs 6,388 workmen at an average cost of labour per factory of \$10,983 and of \$269.93 per worker. The average capital per factory is \$66,791, cost of materials \$24,200 and value of products \$46,876. The clothing industries (men's and women's) for ordered and factory work have a total product of \$24,314,937, being an average per establishment of \$21,088. The whole number of establishments employing 5 hands and over is 1,153, of which 1,069 are shops and 84 are factories. The total capital is \$12,807,542, with an average of \$7,400 for shops and \$58,277 for factories. The shops employ 13,775 workers, or an average per shop of 12.8, at an average wage per shop of \$3,305; and the factories employ 15,215 workers, or an average of 181 per factory, at an average

wage of \$31,007 per factory. The three industries of men's furnishing goods—hats, caps and furs and hosiery and knit goods—employ 11,936 wage-earners at a cost for wages of \$2,842,988, or an average per establishment of 54.5 workers and of \$12,982 for wages.

Table 20 is the iron and steel group of industries, which besides the 17 kinds of industries named in the table include car wheels, chains, knitting machines, knitting needles, needles, skates, stamps and stencils, under the head of 'all other industries.' Therefore the group is composed of 24 kinds of industries, and the number of separate establishments is 517. The average per establishment of capital is \$79,035, of cost of materials \$28,659, and of value of products \$67,463. The wage-earners average 47.9 and the wages for labour \$19,045 per establishment. The leading industry of the group is the manufacture of furnaces, heaters, iron pipe, machinery of all kinds, radiators and stoves, classed in the table as foundry and machine shop products. There are altogether 315 establishments, with an average capital of \$51,665, employing 11,784 wage-earners at an average wage of \$390.71 and with an average output per establishment of \$48,547.

<b>Totals.....</b>	<b>517</b>	<b>40,861,164</b>	<b>24,766</b>	<b>9,846,247</b>	<b>14,816,891</b>	<b>34,878,402</b>

The second industry of chief importance is included under the head of iron and steel products, consisting of bolts and nuts, forgings, hinges, nails and tacks, rivets and spikes and rolling mill products. The average capital per establishment is \$338,950, the average number of wage-earners 142, and the average product \$238,360. The highest average of wages is paid by the makers of safes and vaults, \$450.63, the second is by makers of knitting machines, \$449.70, and the third by makers of sewing machines, \$445.51; while the lowest is by makers of carriage and saddlery hardware, \$272.38. In ratio of wages to value of products the industry of needle-making stands highest, being 55.50 per cent. Then follow knitting needles making with a ratio of 45 per cent, cutlery and edge tools with a ratio of 44.70 per cent, sewing machines with a ratio of 36.65 per cent, and axes and tools with a ratio of 36.41 per cent. The last named industry includes files, forks, machine knives, shovels and spades. The industry with the lowest ratio of cost of wages to value of products is wire, in which it is only 10.73 per cent. In the industries showing the highest value of products and the highest cost of wages, the ratio of wages to value of products is 39.10 per cent for foundry and machine shops, 24.49 for iron and steel works and 33.83 per cent for boiler and engine works.

## 21. GROUP IV: TIMBER AND LUMBER AND THEIR RE-MANUFACTURES.

Timber and lumber and their re-manufactures constitute the fourth group of industries in table 21, and statistics are given for 3,034 establishments representing 25 kinds of industries. Six of these industries are classed under the head of 'all other,' being carpet sweepers, charcoal, cider presses, show cases, spinning wheels and woodenware. The average capital invested in the 3,034 establishments is \$29,650, the average value of materials used \$12,883 and the average value of products \$23,480. The average number of wage-earners per establishment is 25, and the average cost for wages \$6,251, with an average wage per worker of \$250.53. The chief industries of the group are wood pulp, furniture and upholstered goods, log products and lumber products. Wood pulp includes the chemical and mechanical products, and the average output of the 25 establishments in operation in the census year is \$169,871; the average wages per establishment is \$42,610, the average number of wage-earners 127, and the average wage per worker \$335.30. The furniture and upholstered goods industry exceeds in value of product the pulp industry by \$2,702,603, but the average per establishment is only one-quarter as much, being \$41,121. The average of wages per establishment is \$12,239 and of workers 39, and the average wage per worker is \$314.20. The industries showing the highest wage earnings per worker are the manufactures of show cases,

\$477.60, billiard tables and materials \$471.43, and carpet sweepers \$423.50; and those showing the highest ratio of cost of wages to value of products are the manufactures of baskets, 38.90 per cent, spinning wheels 33.68 per cent, and cooperage 32.01 per cent.

22. GROUP V: LEATHER AND ITS FINISHED PRODUCTS.

Name or kind of industry.	Estab- lish- ments.	Capital.	Wage- earners.	Wages for labour.	Cost of materials.	Value of products.

Leather goods . . . . .	3	15,450	76	17,675	43,000	72,600
Totals . . . . .	431	21,436,594	19,204	6,040,932	21,725,613	34,720,513

The fifth group of industries gives the statistics of leather and its finished products, including five kinds of industries compiled from returns of 431 establishments. The principal kinds of industries are boots and shoes, embracing footwear of all descriptions made of leather, rubber, felt and cloth, and leather tanned, curried and finished. The average value of capital employed in all the industries is \$49,737 per establishment, and of goods produced \$80,558. The average cost of materials per establishment is \$50,408 and of wages for labour \$14,016, and the average number of employees 44.6. The highest average cost for wages per establishment is in the boot and shoe industry, \$21,986, and the same industry has also the largest product per establishment, \$103,247. In the manufacture of leather the average cost for wages is \$8,827 and value of product \$84,396 per establishment. The production of leather belting and hose per establishment is \$102,179, but the total value of goods is less than three per cent of the value of leather. In the harness and saddlery industry the cost of wages per establishment is \$7,566, and the value of products \$36,076. The highest average earnings for labour per worker are made in the belting and hose industry, \$428.39, but the ratio of wages to value of products is least, being 8.49 per cent. The next highest average of wages per worker is made in the tanneries, \$349.96, and the ratio to value of products is only 10.46. In the harness and saddlery industry the average wage is \$332.61 and the ratio of wages to products 20.98 per cent; and in the boot and shoe industry the average wage is \$303.92 and the ratio of wages to products 21.30 per cent.

The paper and printing group of industries comprises 592 establishments, and besides the eight kinds of industries named in table 23 there are four included in 'all other industries,' namely, felt paper and pulp, fly paper, school supplies and waxed paper. The average value of capital employed in all industries of the group per establishment is \$45,308 and the average value of products \$34,887. The cost of materials per establishment is \$12,371 and of wages for labour \$9,610. The average earnings per

## 23. GROUP VI: PAPER AND PRINTING.

Wall paper.....	4	1,059,500	328	105,247	384,303	874,049
All other industries.....	4	220,393	84	16,002	81,243	198,905
Totals .....	592	26,822,420	15,413	5,689,244	7,323,854	20,653,028

worker for all the industries is \$369.12, being highest in stereotyping and electrotyping, \$572, and second in printing and publishing, \$424.25. In these industries also the ratio of wages to value of products is highest, being 31.76 per cent in the former and 31.69 per cent in the latter. The industry showing the greatest value of product per establishment is paper-making, \$156,456, and it also is the industry with the highest average of wages per establishment, \$34,124; but in the average wage per worker it is the fourth in order, being \$349.99, and the ratio of wages to cost of product is only 21.81 per cent. Taking the four chief industries of the group, in which the production exceeds \$1,000,000, printing and publishing with a total product of \$10,319,241, gives an average per establishment of \$24,628, with an average cost for wages of \$7,804 and a ratio of wages to value of products of 31.69 per cent; paper a total product of \$4,380,776, an average product of \$156,456, average wages of \$34,124, and ratio of wages to value of products of 21.81 per cent; printing and bookbinding a total product of \$2,748,356, an average product of \$32,719, average wages of \$10,063 and ratio of wages to value of products of 30.71 per cent; and paper boxes and bags a total product of \$1,256,147, an average product of \$36,946, average wages of \$8,868 and ratio of wages to value of products of 24 per cent. Three industries show a value of product larger than the capital employed, namely, paper boxes and bags, stationery goods, stereotyping and electrotyping, and in the first named of these the product is 223 per cent of the capital. In the three largest industries—paper-making, printing and bookbinding and printing and publishing—the value of products is 72.5 per cent of the value of capital.

Table 24 is the group of liquors and beverages, and comprises five kinds of industries and 183 establishments, the chief of which are malt liquors and distilled liquors. The values of these products are computed on selling prices at works, exclusive of excise duties, and are therefore far below the trade values for consumption. The average per establishment for all industries is \$50,228 and the average of capital employed \$111,843. The number of wage-earners employed per establishment is 17.5, the average cost for wages \$6,944 and the average cost for materials \$17,446. The

Totals .....	183	20,467,389	3,208	1,270,772	3,192,696	9,191,700

average wage per worker is \$396.12, and the ratio of wages to value of products 13.83 per cent. In the industry of distilled liquors the average wage per worker is \$423.67, the value of products per establishment \$180,046, and the ratio of wages to value of products 13.22 per cent. The malt liquors industry, employing 1,977 wage earners, produces \$64,628 per establishment, the average wage per worker is \$413.43, and the ratio of wages to value of products is 13.17 per cent. Aerated and mineral waters employ an average of 9 wage-earners per establishment, at an average wage of \$348.13, the value of product per establishment is \$13,906, and the ratio of wages to products is 23.01 per cent. In the production of vinous liquors, workmen are employed only part of the year, and their average wage is the lowest of any industry of the group, being \$268.96, and the ratio of wages to value of products is 11.62 per cent. The average capital employed per establishment is \$38,147, cost of materials \$9,334, and value of products \$13,906.

## 25. GROUP VIII: CHEMICALS AND ALLIED PRODUCTS.

The group of chemicals and allied products is made up of the eight classes of industries specified in table 25, and eight other industries of one establishment of a kind,

viz: alabastine, bark extract, bleaching powder, dyes and colours, insect powder, opium, vaccine and vaseline. Altogether there are 128 establishments in the group with an average capital per establishment of \$80,256, average wage-earners of 22.4, average wages for labour of \$8,109, average cost of materials of \$51,825 and average value of products of \$89,354. The average wage for labour per worker is \$361.90 for all industries, and the ratio of wages to value of products is 9.08 per cent. The manufacture of oils is the principal industry, its aggregate of products being \$3,519,493 and its average per establishment \$251,392. The average cost of wages per establishment is \$17,928, the average earnings for labour per worker \$416.24, and the ratio of wages to value of products 7.13 per cent. The second industry is the manufacture of paints and varnishes, whose aggregate value of products is \$2,786,593 and average value per establishment \$154,811. The average cost of wages per establishment is \$9,833 and per worker \$378.18, and the ratio of wages to value of products is 6.35 per cent. Drugs and patent medicines are nearly equal, measured by the value of products, that of the former being \$1,380,905 and of the latter \$1,350,993. But the average product of drugs per establishment is \$72,679 and of patent medicines \$38,600, and the average earnings for labour per worker is \$379.81 in the former industry and \$278.79 in the latter. Measured by the ratio of wages to value of products, they are as 14.41 to 8.71 per cent. The highest average of wages for labour per worker in this group of industries is paid in the manufacture of explosives, \$515.71, and the lowest in the production of vaccine, \$150. But the last named shows a higher ratio of wages to value of products than any other industry of the group, it being 60 per cent.

26. GROUP IX: CLAY, GLASS AND STONE PRODUCTS.

Name or kind of industry.	Estab-lish-ments.	Capital.	Wage-earners.	Wages for labour.	Cost of materials.	Value of products.

All other industries....*	5	100,200	92	29,658	40,720	101,500
Totals.....	855	8,697,716	10,765	2,771,142	997,754	7,318,582

The group of clay, glass and stone products comprises 15 kinds of industries, 11 of which are specified in table 26. The other four consist of one establishment each of

china and glass-decorating, mantels and grates and Rockingham ware, and two of church ornament works. The total number of establishments in the group is 855, whereof 573 are brick, tile and pottery works, 163 lime works, and 65 are works for the production of monuments and tombstones. The value of products per establishment in the group is \$8,560 and the average cost of wages \$3,241, with a ratio of wages to value of products of 37·86 per cent. The cost of materials relative to the value of products is low, being only 13·63 per cent, owing to no value being given to the materials of clay and limestone; and brick, tile, pottery and lime are among the chief products of the group. More than one-half of all the wage-earners in the group are employed in the manufacture of brick, tile and pottery, and nearly one-half of all the wages for labour. But in several other industries the averages per establishment are much higher for wages and value of products. In the manufacture of Portland cement the cost of wages per establishment is \$26,290, of glass \$45,717, and of mirrors and plate glass \$13,980, as against \$2,317 for brick, tile and pottery; and while in the latter the value of products per establishment is only \$5,759, it is in the former \$109,411 for Portland cement, \$90,491 for glass and \$66,384 for mirrors and plate glass. The average of capital per establishment is \$10,173, and the value of products is 84·14 per cent of the capital.

27. GROUP X: METALS AND METAL PRODUCTS OTHER THAN STEEL.

Totals .....	363	20,392,505	9,353	3,888,724	7,716,902	19,561,261

The industries of metals and products of metals other than steel are grouped in table 27. They consist of the ten kinds of industries named in the table and seven others made up of one establishment each making air brakes, babbitt metal, cream separators, gold leaf and foil, and spray-motors, and of two establishments each making lanterns and printing types. The whole number of establishments in the group is 363, with averages per establishment of \$56,150 for capital, \$10,713 for wages and \$53,888 for products. The average number of wage-earners per establishment is 25·8, and the average of earnings for labour per worker is \$415·55. The ratio of raw materials to finished products is 39·45 per cent and of wages to products 19·88 per cent. The plumbing and tinsmithing industry largely exceeds all others in the number of establish-

ments, being 70 per cent of the whole. It also employs 44 per cent of the wage-earners, and the value of its products is one-third of the whole. Smelting works, while only one-thirtieth of the whole in number of establishments, have invested in them one-half of the capital, and their products make up more than one-third of the products of all works in the group. The average earnings for labour is also highest in this kind of industry, being \$581.31 per worker and \$96,885 per establishment. The value of products per establishment is \$590,199, and the ratio of wages to value of products is 16.41 per cent. The highest ratio of wages to value of products is found to be in the industries of brass castings and jewelry, being 29.61 per cent in the former and 28.5 per cent in the latter, and in each one the cost of materials is a little more than 40 per cent of the value of products. In ten of the industries the average earnings for labour per worker is over \$400 and in three it is over \$500.

## 28. GROUP XI : TOBACCO AND ITS MANUFACTURES.

Name or kind of industry.	Estab- lish- ments.	Capital.	Wage- earners.	Wages for labour.	Cost of materials.	Value of products.
	NO.	\$	NO.	\$	\$	\$
Tobacco, chewing, smoking and snuff.....	22	4,747,030	2,186	565,270	2,156,987	6,469,961
Tobacco, cigars and cigarettes..	138	2,500,510	4,143	1,366,146	1,567,758	5,332,151
Totals.....	160	7,247,540	6,328	1,931,416	3,724,745	11,802,112

Tobacco and its manufactures constitute the eleventh group, which embraces two kinds of industries and 160 establishments. The 22 works employed in the production of chewing and smoking tobacco and snuff have an average value of products per establishment of \$294,089, and the average cost of wages per establishment is \$25,694, while the 138 works producing cigars and cigarettes have a product of \$38,639 per establishment, with an average cost of wages of \$9,900. The average wage per worker in establishments of the first kind is \$258.59, and of the second \$329.75; and computed on the aggregate wages of the two kinds of industries, the first is 29 per cent and the second 71 per cent. The ratio of wages to value of products is only 8.74 per cent for works making chewing and smoking tobacco and snuff, but for works making cigars and cigarettes it is 25.62 per cent. Accordingly it is the second which gives the larger share of employment to labour, both as regards the aggregate of it and the proportion of it going to make up the value of products. The ratio of wages to value of products for the group of tobacco industries is 16.36 per cent.

Group XII. includes all vehicles for land transportation whose statistics are presented in table 29, comprising five kinds of industries and 425 establishments. The industry having the largest number of establishments is the manufacture of carriages and wagons, with which is closely related the industry of carriage and wagon materials. These two comprise 376 establishments, with a capital of \$7,930,843. They give employment to 5,716 wage-earners, their cost of wages for labour is \$2,128,339 and for materials \$3,627,781, and the value of their products is \$7,920,183. The average earnings of labour per worker is \$370.03 for employees in carriage and wagon

## 29. GROUP XII: VEHICLES FOR LAND TRANSPORTATION.

Name or kind of industry.	Estab- lish- ments	Capital.	Wage- earners.	Wages for labour.	Cost of materials.	Value of products.

shops and \$372.78 in shops for making carriage and wagon materials, and the ratio of wages to value of products is nearly the same in both industries, being 26·94 per cent for the first named and 26·50 per cent for the second. The industries of car repairs and cars and car works are also closely related. There are 33 establishments, employing 8,737 wage-earners, and the wages for labour make a total of \$3,936,726. The capital of the two industries is \$7,010,859, the cost of materials used \$6,664,754 and the value of products \$11,500,816. In repair shops the average wage for labour per worker is \$479.33, and in cars and car works it is \$397.84; but while the average cost of wages per establishment is \$104,254 in the former class, it is \$175,162 in the latter. The ratio of wages to value of products is 35·92 per cent for car repairs, and 31·01 per cent for cars and car works. Sixteen establishments are employed in the manufacture of bicycles with a capital of \$1,052,700, and they employ 413 wage-earners at wages for labour of \$163,596. The cost of materials used is \$299,753, the value of products is \$550,606 and the ratio of wages to the value of products is 29·71 per cent. The average earnings for labour per worker of all industries in the group is \$418.99, and the rate of wages to value of products is 31·19 per cent,—the highest of earnings and ratios respectively obtaining in the industry of car repairs and the lowest in the industry of carriage and wagon materials.

## 30. GROUP XIII: VESSELS FOR WATER TRANSPORTATION.

Name or kind of industry.	Estab- lish- ments.	Capital.	Wage- earners.	Wages for labour.	Cost of materials.	Value of products.
	NO.	\$	NO.	\$	\$	\$
Ships and ship repairs . . . . .	39	3,156,369	2,422	750,833	699,634	1,899,836
Boats and canoes . . . . .	18	141,545	165	60,580	46,312	143,832
Totals . . . . .	57	3,297,914	2,587	811,413	745,946	2,043,668

Statistics of the manufacture of vessels for water transportation (table 30) embrace two kinds of industries, namely, ships and ship repairs and boats and canoes—the former with 39 establishments and the latter with 18. The amount of capital invested

is \$3,297,914, the number of wage-earners 2,587 and the value of products \$2,043,668. The average earnings for labour per worker is \$313.65 in the group; but while it is \$367.15 in the building of boats and canoes, it is only \$310.01 in the building of ships and the making of ship repairs. The cost of wages and value of materials is 76 per cent of the value of products for both kinds of industries, being nearly 77 per cent for vessels and 74 per cent for boats and canoes; and the ratio of wages to value of products is 39.52 per cent for the former and 42.12 for the latter.

Miscellaneous industries are brought together in the fourteenth group. They represent 72 different kinds of industries, of which 44 are specified in the table. The other 28 comprise one establishment each of works for the manufacture of axle grease, belting and hose (rubber), celluloid goods, costumes, dental supplies, enamelware, featherbone, feather goods, fire alarm supplies, firemen's supplies, fireworks, graphite, peat, rug patterns, sea-grass, soda water apparatus, steam packing, stove polish, washing blue and wax figures, and two each of carbide of calcium, coke, combs, furs (dressed), gypsum, pattern making, plaster and stucco, and various goods. Altogether there are 582 establishments constituting the group, employing 21,084 wage-earners, at a cost for wages of \$7,482,981 and for materials of \$15,781,268, with capital of \$63,089,415 and output of \$35,607,212. The average value of capital per establishment is \$108,401 and of products \$61,181, and the average cost of wages for labour \$12,857 and of materials \$27,115. The average earnings of labour per worker is \$354.91, and the ratio of wages to value of products 21.01 per cent. The largest industry in this group is the manufacture of agricultural implements, representing the statistics of 114 works. Its capital per establishment is \$159,713, cost of labour and materials \$54,893, and value of products \$84,188. The average earnings of labour per worker is \$367.87 and the ratio of wages to value of products 22.19 per cent. Electrical apparatus and supplies and electric light and power works have together a capital of \$17,158,422, employ 2,821 wage-earners and show a product of \$5,040,269. The average value of products per establishment is \$121,290 for electrical apparatus, and supplies works with a ratio of wages to value of products of 27.92 per cent, while in electric light and power works the value of products per establishment is \$34,621 and the ratio of wages to value of products is 22.46 per cent. The average earnings of wages per worker in the first named kind of industry is \$440.49 and in the second \$501.72. Musical instruments and musical instrument materials are industries closely related. The 46 establishments comprising them have a total capital of \$4,290,847, and their products have a value of \$3,380,727. They employ 2,669 wage earners, the cost of wages for labour is \$1,096,309 and the cost of materials is \$1,333,323. The average earnings for labour in musical instrument works is \$423.75, the value of products per establishment is \$77,532 and the ratio of wages to value of products is 33.51 per cent. In works for the manufacture of musical instrument materials the average earnings for labour is \$298.99, the value of products per establishment is \$51,000 and the ratio of wages to value of products is 23.28 per cent. Bringing together two other related kinds of industries—rubber clothing and rubber and elastic goods—we have 13 establishments with a total capital of \$1,523,971 and products of \$1,574,422, employing 629 wage-earners at a cost for wages of \$220,189. The average earnings for labour per worker is \$390.39 in the rubber clothing works and \$336.31 in the rubber and elastic goods works, and the ratio of wages to value of products is 15.57 in the former and 13.44 per cent in the latter. The cost of materials is 50 per

cent of the value of products in rubber clothing and 65 per cent in rubber and elastic goods. In the production of gas for lighting and heating 27 establishments are employed, whose capital is \$7,692,101 and whose value of products is \$2,327,466. The number of wage-earners is 856, with average earnings for labour per worker of \$473.97 and per establishment of \$15,027, and the ratio of wages to value of products is 17.43 per cent. The ratio of raw materials to value of products is 32.30 per cent. The manufacture of soap is another important industry. The number of establishments is 23, the amount of capital is \$2,321,207 and the value of products is \$2,143,945. It employs 478 wage-earners at a cost for wages of \$164,717, and the cost of materials is \$1,424,228. The value of products per establishment is \$93,215, the average earnings for labour per worker is \$344.59, the ratio of wages to value of products is 7.68 per cent and the ratio of the cost of materials to value of products is 66.43 per cent. The only other industry in the group whose product exceeds a million dollars is the manufacture of gloves and mittens, and it comprises 22 establishments with a capital of \$778,003 and value of products of \$1,024,245. There are 974 wage-earners employed in it with wages for labour of \$209,608, and the cost of materials used is \$623,612. The average earnings for labour per worker is \$215.20, the cost of wages per establishment \$9,528 and the ratio of wages to value of products 20.47 per cent.

## 32. GROUP XV.: HAND TRADES.

Name or kind of industry.	Estab- lish- ments.	Capital.	Wage- earners.	Wages for labour.	Cost of materials.	Value of products.

Totals .....	45	613,328	605	248,290	135,197	599,329

The group of hand trades comprises five kinds of industries and 45 establishments. This group is necessarily small as a consequence of the limitation of the statistics to works employing five hands and over. In the blacksmithing industry, for example, a great majority of shops employ one or at most two workmen, and these have been excluded in the enumeration. Only 11 establishments have been enumerated under the rule followed in taking the census of manufactures, although the number of shops in the country is not much less than 10,000. Carpenters are excluded also, and the only related industry recorded is that of interior decorations. The average capital per establishment in the group is \$13,630 and the average value of products \$13,318. The average earnings for labour per worker ranges from \$295.19 for bicycle repairs to \$488.27 for blacksmithing, and the value of products per establishment ranges from \$7,087 for blacksmithing to \$23,788 for lock and gunsmithing. The ratio of wages to value of products is high in all the industries of this group—the lowest being 30.17 per cent for bicycle repairs and the highest 44.76 per cent for interior decorations.

Liquors, malt. ....	90	10,925,679	1,977	817,350	2,067,069	6,204,250
Liquors, vinous. ....	14	534,055	125	33,620	130,675	289,350
Malt. ....	6	227,190	67	19,868	210,740	271,150
Totals .....	183	20,467,380	3,208	1,270,772	3,192,696	9,191,700

average wage per worker is \$396.12, and the ratio of wages to value of products 13.4 per cent. In the industry of distilled liquors the average wage per worker is \$423.6, the value of products per establishment \$180,046, and the ratio of wages to value of products 13.22 per cent. The malt liquors industry, employing 1,977 wage earners produces \$64,628 per establishment, the average wage per worker is \$413.43, and the ratio of wages to value of products is 13.17 per cent. Aerated and mineral waters employ an average of 9 wage-earners per establishment, at an average wage of \$348.1, the value of product per establishment is \$13,906, and the ratio of wages to products 23.01 per cent. In the production of vinous liquors, workmen are employed only part of the year, and their average wage is the lowest of any industry of the group, being \$268.96, and the ratio of wages to value of products is 11.62 per cent. The average capital employed per establishment is \$38,147, cost of materials \$9,334, and value of products \$13,906.

## 25. GROUP VIII: CHEMICALS AND ALLIED PRODUCTS.

Name or kind of industry.	Estab- lish- ments.	Capital.	Wage- earners.	Wages for labour.	Cost of materials.	Value of products.

The group of chemicals and allied products is made up of the eight classes of industries specified in table 25, and eight other industries of one establishment of a kind

viz: alabastine, bark extract, bleaching powder, dyes and colours, insect powder, opium, vaccine and vaseline. Altogether there are 128 establishments in the group with an average capital per establishment of \$80,256, average wage-earners of 22.4, average wages for labour of \$3,109, average cost of materials of \$51,825 and average value of products of \$89,354. The average wage for labour per worker is \$361.90 for all industries, and the ratio of wages to value of products is 9.08 per cent. The manufacture of oils is the principal industry, its aggregate of products being \$3,519,493 and its average per establishment \$251,392. The average cost of wages per establishment is \$17,928, the average earnings for labour per worker \$416.24, and the ratio of wages to value of products 7.13 per cent. The second industry is the manufacture of paints and varnishes, whose aggregate value of products is \$2,786,593 and average value per establishment \$154,811. The average cost of wages per establishment is \$9,833 and per worker \$378.18, and the ratio of wages to value of products is 6.35 per cent. Drugs and patent medicines are nearly equal, measured by the value of products, that of the former being \$1,380,905 and of the latter \$1,350,993. But the average product of drugs per establishment is \$72,679 and of patent medicines \$38,600, and the average earnings for labour per worker is \$379.81 in the former industry and \$278.79 in the latter. Measured by the ratio of wages to value of products, they are as 14.41 to 8.71 per cent. The highest average of wages for labour per worker in this group of industries is paid in the manufacture of explosives, \$515.71, and the lowest in the production of vaccine, \$150. But the last named shows a higher ratio of wages to value of products than any other industry of the group, it being 60 per cent.

26. GROUP IX: CLAY, GLASS AND STONE PRODUCTS.

Name or kind of industry.	Estab- lish- ments.	Capital.	Wage- earners.	Wages for labour.	Cost of materials.	Value of products.

All other industries....*	5	100,200	92	29,658	40,720	101,500
Totals.....	855	8,697,716	10,765	2,771,142	997,754	7,318,582

The group of clay, glass and stone products comprises 15 kinds of industries, 11 of which are specified in table 26. The other four consist of one establishment each of

china and glass-decorating, mantels and grates and Rockingham ware, and two of church ornament works. The total number of establishments in the group is 855, whereof 573 are brick, tile and pottery works, 163 lime works, and 65 are works for the production of monuments and tombstones. The value of products per establishment in the group is \$8,560 and the average cost of wages \$3,241, with a ratio of wages to value of products of 37·86 per cent. The cost of materials relative to the value of products is low, being only 13·63 per cent, owing to no value being given to the materials of clay and limestone; and brick, tile, pottery and lime are among the chief products of the group. More than one-half of all the wage-earners in the group are employed in the manufacture of brick, tile and pottery, and nearly one-half of all the wages for labour. But in several other industries the averages per establishment are much higher for wages and value of products. In the manufacture of Portland cement the cost of wages per establishment is \$26,290, of glass \$45,717, and of mirrors and plate glass \$13,980, as against \$2,317 for brick, tile and pottery; and while in the latter the value of products per establishment is only \$5,759, it is in the former \$109,411 for Portland cement, \$90,491 for glass and \$66,384 for mirrors and plate glass. The average of capital per establishment is \$10,173, and the value of products is 84·14 per cent of the capital.

Totals .....	363	20,382,505	9,358	3,888,724	7,716,902	19,561,261

The industries of metals and products of metals other than steel are grouped in table 27. They consist of the ten kinds of industries named in the table and seven others made up of one establishment each making air brakes, babbitt metal, cream separators, gold leaf and foil, and spray-motors, and of two establishments each making lanterns and printing types. The whole number of establishments in the group is 363, with averages per establishment of \$56,150 for capital, \$10,713 for wages and \$53,888 for products. The average number of wage-earners per establishment is 25·8, and the average of earnings for labour per worker is \$415·55. The ratio of raw materials to finished products is 39·45 per cent and of wages to products 19·88 per cent. The plumbing and tinsmithing industry largely exceeds all others in the number of establish-

ments, being 70 per cent of the whole. It also employs 44 per cent of the wage-earners, and the value of its products is one-third of the whole. Smelting works, while only one-thirtieth of the whole in number of establishments, have invested in them one-half of the capital, and their products make up more than one-third of the products of all works in the group. The average earnings for labour is also highest in this kind of industry, being \$581.31 per worker and \$96,885 per establishment. The value of products per establishment is \$590,199, and the ratio of wages to value of products is 16.41 per cent. The highest ratio of wages to value of products is found to be in the industries of brass castings and jewelry, being 29.61 per cent in the former and 28.5 per cent in the latter, and in each one the cost of materials is a little more than 40 per cent of the value of products. In ten of the industries the average earnings for labour per worker is over \$400 and in three it is over \$500.

## 28. GROUP XI : TOBACCO AND ITS MANUFACTURES.

Name or kind of industry.	Estab- lish- ments.	Capital.	Wage- earners.	Wages for labour.	Cost of materials.	Value of products.
	No.	\$	No.	\$	\$	\$
Tobacco, chewing, smoking and snuff.....	22	4,747,030	2,186	565,270	2,156,987	6,469,961
Tobacco, cigars and cigarettes..	138	2,500,510	4,143	1,366,146	1,567,758	5,332,151
Totals.....	160	7,247,540	6,328	1,931,416	3,724,745	11,802,112

Tobacco and its manufactures constitute the eleventh group, which embraces two kinds of industries and 160 establishments. The 22 works employed in the production of chewing and smoking tobacco and snuff have an average value of products per establishment of \$294,089, and the average cost of wages per establishment is \$25,694, while the 138 works producing cigars and cigarettes have a product of \$38,639 per establishment, with an average cost of wages of \$9,900. The average wage per worker in establishments of the first kind is \$258.59, and of the second \$329.75; and computed on the aggregate wages of the two kinds of industries, the first is 29 per cent and the second 71 per cent. The ratio of wages to value of products is only 8.74 per cent for works making chewing and smoking tobacco and snuff, but for works making cigars and cigarettes it is 25.62 per cent. Accordingly it is the second which gives the larger share of employment to labour, both as regards the aggregate of it and the proportion of it going to make up the value of products. The ratio of wages to value of products for the group of tobacco industries is 16.36 per cent.

Group XII. includes all vehicles for land transportation whose statistics are presented in table 29, comprising five kinds of industries and 425 establishments. The industry having the largest number of establishments is the manufacture of carriages and wagons, with which is closely related the industry of carriage and wagon materials. These two comprise 376 establishments, with a capital of \$7,930,843. They give employment to 5,716 wage-earners, their cost of wages for labour is \$2,128,339 and for materials \$3,627,781, and the value of their products is \$7,920,183. The average earnings of labour per worker is \$370.03 for employees in carriage and wagon

## 29. GROUP XII : VEHICLES FOR LAND TRANSPORTATION.

Name or kind of industry.	Estab- lish- ments	Capital.	Wage- earners.	Wages for labour.	Cost of materials.	Value of products.
	No.	\$	No.	\$	\$	\$
Bicycles . . . . .	16	1,052,700	413	163,596	299,753	550,606
Car repairs . . . . .	26	4,535,257	5,655	2,710,591	4,412,415	7,546,644
Carriages and wagons . . . . .	349	6,615,525	4,807	1,791,981	2,972,648	6,650,912

shops and \$372.78 in shops for making carriage and wagon materials, and the ratio of wages to value of products is nearly the same in both industries, being 26.94 per cent for the first named and 26.50 per cent for the second. The industries of car repairs and cars and car works are also closely related. There are 33 establishments, employing 8,737 wage-earners, and the wages for labour make a total of \$3,936,726. The capital of the two industries is \$7,010,859, the cost of materials used \$6,664,754 and the value of products \$11,500,816. In repair shops the average wage for labour per worker is \$479.33, and in cars and car works it is \$397.84; but while the average cost of wages per establishment is \$104,254 in the former class, it is \$175,162 in the latter. The ratio of wages to value of products is 35.92 per cent for car repairs, and 31.01 per cent for cars and car works. Sixteen establishments are employed in the manufacture of bicycles with a capital of \$1,052,700, and they employ 413 wage-earners at wages for labour of \$163,596. The cost of materials used is \$299,753, the value of products is \$550,606 and the ratio of wages to the value of products is 29.71 per cent. The average earnings for labour per worker of all industries in the group is \$418.99, and the rate of wages to value of products is 31.19 per cent,—the highest of earnings and ratios respectively obtaining in the industry of car repairs and the lowest in the industry of carriage and wagon materials.

## 30. GROUP XIII : VESSELS FOR WATER TRANSPORTATION.

Name or kind of industry	Estab- lish- ments.	Capital.	Wage- earners.	Wages for labour.	Cost of materials.	Value of products.
	No.	\$	No.	\$	\$	\$
Ships and ship repairs . . . . .	39	3,156,369	2,422	750,833	699,634	1,899,836
Boats and canoes . . . . .	18	141,545	165	60,580	46,312	143,832
Totals . . . . .	57	3,297,914	2,587	811,413	745,946	2,043,668

Statistics of the manufacture of vessels for water transportation (table 30) embrace two kinds of industries, namely, ships and ship repairs and boats and canoes—the former with 39 establishments and the latter with 18. The amount of capital invested

is \$3,297,914, the number of wage-earners 2,587 and the value of products \$2,043,668. The average earnings for labour per worker is \$313.65 in the group; but while it is \$367.15 in the building of boats and canoes, it is only \$310.01 in the building of ships and the making of ship repairs. The cost of wages and value of materials is 76 per cent of the value of products for both kinds of industries, being nearly 77 per cent for vessels and 74 per cent for boats and canoes; and the ratio of wages to value of products is 39.52 per cent for the former and 42.12 for the latter.

Miscellaneous industries are brought together in the fourteenth group. They represent 72 different kinds of industries, of which 44 are specified in the table. The other 28 comprise one establishment each of works for the manufacture of axle grease, belting and hose (rubber), celluloid goods, costumes, dental supplies, enamelware, featherbone, feather goods, fire alarm supplies, firemen's supplies, fireworks, graphite, peat, rug patterns, sea-grass, soda water apparatus, steam packing, stove polish, washing blue and wax figures, and two each of carbide of calcium, coke, combs, furs (dressed), gypsum, pattern making, plaster and stucco, and various goods. Altogether there are 582 establishments constituting the group, employing 21,084 wage-earners, at a cost for wages of \$7,482,981 and for materials of \$15,781,268, with capital of \$63,089,415 and output of \$35,607,212. The average value of capital per establishment is \$108,401 and of products \$61,181, and the average cost of wages for labour \$12,857 and of materials \$27,115. The average earnings of labour per worker is \$354.91, and the ratio of wages to value of products 21.01 per cent. The largest industry in this group is the manufacture of agricultural implements, representing the statistics of 114 works. Its capital per establishment is \$159,713, cost of labour and materials \$54,893, and value of products \$84,188. The average earnings of labour per worker is \$367.87 and the ratio of wages to value of products 22.19 per cent. Electrical apparatus and supplies and electric light and power works have together a capital of \$17,158,422, employ 2,821 wage-earners and show a product of \$5,040,269. The average value of products per establishment is \$121,290 for electrical apparatus, and supplies works with a ratio of wages to value of products of 27.92 per cent, while in electric light and power works the value of products per establishment is \$34,621 and the ratio of wages to value of products is 22.46 per cent. The average earnings of wages per worker in the first named kind of industry is \$440.49 and in the second \$501.72. Musical instruments and musical instrument materials are industries closely related. The 46 establishments comprising them have a total capital of \$4,290,847, and their products have a value of \$3,380,727. They employ 2,669 wage-earners, the cost of wages for labour is \$1,096,309 and the cost of materials is \$1,333,323. The average earnings for labour in musical instrument works is \$423.75, the value of products per establishment is \$77,532 and the ratio of wages to value of products is 33.51 per cent. In works for the manufacture of musical instrument materials the average earnings for labour is \$298.99, the value of products per establishment is \$51,000 and the ratio of wages to value of products is 23.28 per cent. Bringing together two other related kinds of industries—rubber clothing and rubber and elastic goods—we have 13 establishments with a total capital of \$1,523,971 and products of \$1,574,422, employing 629 wage-earners at a cost for wages of \$220,189. The average earnings for labour per worker is \$390.39 in the rubber clothing works and \$336.31 in the rubber and elastic goods works, and the ratio of wages to value of products is 15.57 in the former and 13.44 per cent in the latter. The cost of materials is 50 per

cent of the value of products in rubber clothing and 65 per cent in rubber and elastic goods. In the production of gas for lighting and heating 27 establishments are employed, whose capital is \$7,692,101 and whose value of products is \$2,327,466. The number of wage-earners is 856, with average earnings for labour per worker of \$473.97 and per establishment of \$15,027, and the ratio of wages to value of products is 17.43 per cent. The ratio of raw materials to value of products is 32.30 per cent. The manufacture of soap is another important industry. The number of establishments is 23, the amount of capital is \$2,321,207 and the value of products is \$2,143,945. It employs 478 wage-earners at a cost for wages of \$164,717, and the cost of materials is \$1,424,228. The value of products per establishment is \$93,215, the average earnings for labour per worker is \$344.59, the ratio of wages to value of products is 7.68 per cent and the ratio of the cost of materials to value of products is 66.43 per cent. The only other industry in the group whose product exceeds a million dollars is the manufacture of gloves and mittens, and it comprises 22 establishments with a capital of \$778,003 and value of products of \$1,024,245. There are 974 wage-earners employed in it with wages for labour of \$209,608, and the cost of materials used is \$623,612. The average earnings for labour per worker is \$215.20, the cost of wages per establishment \$9,528 and the ratio of wages to value of products 20.47 per cent.

Totals.....	45	613,328	605	248,290	135,197	599,329

The group of hand trades comprises five kinds of industries and 45 establishments. This group is necessarily small as a consequence of the limitation of the statistics to works employing five hands and over. In the blacksmithing industry, for example, a great majority of shops employ one or at most two workmen, and these have been excluded in the enumeration. Only 11 establishments have been enumerated under the rule followed in taking the census of manufactures, although the number of shops in the country is not much less than 10,000. Carpenters are excluded also, and the only related industry recorded is that of interior decorations. The average capital per establishment in the group is \$13,630 and the average value of products \$13,318. The average earnings for labour per worker ranges from \$295.19 for bicycle repairs to \$488.27 for blacksmithing, and the value of products per establishment ranges from \$7,087 for blacksmithing to \$23,788 for lock and gunsmithing. The ratio of wages to value of products is high in all the industries of this group—the lowest being 30.17 per cent for bicycle repairs and the highest 44.76 per cent for interior decorations.

<sup>1</sup> Less than three establishments employed in the industry.

Table 33 gives for the various kinds of industries of the 15 groups into which the statistics of manufactures have been classed (1) the average earnings for labour per worker, (2) the average cost of wages for labour per establishment, and (3) the value of products per establishment.

The average earnings of labour per worker in all industries is \$285.86, and it is exceeded by all the groups except those of food products, textiles, timber and lumber and their re-manufactures, and clay, glass and stone products. The lowest average of earnings is shown to be for the class of food products, where it is levelled down by the small earnings of employees in the industries of evaporated fruits and vegetables and preserved fish, whose number is relatively large and working season short. In four of the industries of this class the average earnings are over \$500, and in six they range from \$350 to \$500. The group showing the highest average of earnings for labour is vehicles for land transportation, \$418.99; the second is metals and metal products other than steel, \$415.55; and the third is hand trades, \$410.40. But averages of this sort have substantial value only when studied in relation to the number of employees and the aggregates of wage-earnings and value of products. The highest wage for labour in the first group, for example, is \$600 and is earned in the insignificant industry of sausage casings, with total earnings of \$6,000; while in the class of refined sugar in the same group, with an average wage of \$510.57, the earnings are \$612,680, and in the bread, biscuit and confectionery class with an average per worker of \$308.56 the total earnings are \$1,807,805. The earnings for all industries in this group bring it into the fourth place in the list, with aggregate wages of \$8,032,580—the place of first rank being taken by the group of timber, lumber and their re-manufactures with \$18,966,763, the second place by textiles with \$15,326,107 and the third by iron and steel products with \$9,846,247.

In the group of the textile industries the two classes of men's clothing (tailor and factory) employ 20,983 workers, the wages for labour are \$4,467,806, the value of products is \$17,755,733, and the average wage per worker is \$213. The cottons class of the same group has 11,882 workers, with wage earnings of \$3,352,464 and products of \$12,033,052, and the average wage per worker is \$282.14. The value of the products of these classes is 44 per cent of the total value of products in the group, but the average wage of clothing workers is less than in 23 and of cotton workers less than in nine other classes of the same group. So in the iron and steel group, the wages of workers in foundry and machine shops are 50 per cent of all earnings in that group, but the average per worker is less than in 13 of the other classes of industries. So also in the group of timber and lumber and their re-manufactures, the wages in the log and lumber classes are 73 per cent of the aggregate wages of the group and the average wage is exceeded in 20 other classes. So also in the leather group, the wages in the boot and shoe class constitute 65 per cent of wages for the group, and the average wage is less than in any other class of the group save two. In the paper and printing group, the wages in the printing and publishing class are 57 per cent of the whole, and they are exceeded only in one other class of the group, that of stereotyping and electrotyping. It is useful to know the general rates of wages for labour in the various classes of industries; but for a proper appreciation of their meaning as economic factors in production, averages ought to be considered in their relation to aggregates, and not simply in their relation to each other.

The average cost of wages per establishment in all industries is \$6,114, and ranges from \$1,436 for food supplies to \$19,045 for iron and steel products. There are seven groups of industries in which the average exceeds \$10,000, these being iron and steel products, leather and its finished products, metals and metal products other than steel, tobacco and its manufactures, vehicles for land transportation, vessels for water transportation, and the miscellaneous industries; in six others, embracing textiles, timber and lumber and their re-manufactures, paper and printing, liquors and beverages, chemicals and allied products and the hand trades, the average ranges from \$5,000 to \$10,000; and in two others, comprising food products, and clay, glass and stone products, the average is under \$5,000. The highest cost of wages per establishment in any class of industries is \$175,162, in cars and car works; the second is \$167,623, in cottons; the third is \$153,170, in sugar refining; and the fourth is \$104,254, in car repairs. These are the only classes of industries in which the average cost of wages per establishment exceeds \$100,000. In the five classes of dyeing and finishing textiles, iron and steel bridges, iron and steel products, sewing machines and smelting works, the average ranges from \$50,000 to \$100,000; and in the 13 classes of men's clothing (factory), wood pulp, paper, wall paper, Portland cement, glass, plumbers' supplies, watch cases, chewing and smoking tobacco and snuff, ammunition, electrical apparatus and supplies, musical instruments and railway supplies, the average is from \$25,000 to \$50,000. In all other classes of industries the average cost of wages per establishment is under \$25,000. In one class only, that of log products, the total cost of wages for labour is over \$10,000,000; in the four classes of cottons, foundry and machine shop products, boots and shoes and printing and publishing, the totals lie between \$3,000,000 and \$5,000,000; in the 24 classes of bread, biscuits and confectionery, butter and cheese, preserved fish, flouring and grist mill products, men's tailoring, men's factory clothing, men's furnishing goods, women's dressmaking, woollen goods, boilers, and engines, iron and steel products, furniture and upholstering, lumber products, wood pulp, leather, brick, tile and pottery, plumbing and tinsmithing, smelting, cigars and cigarettes, carriages and wagons, car repairs, cars and car works, agricultural implements and musical instruments, the total wages are between \$1,000,000 and \$3,000,000, and in the 13 classes of slaughtering and meat packing, sugar refining, women's factory clothing, hats, caps and furs, hosiery and knit goods, harness and saddlery, paper making, printing and bookbinding, malt liquors, glass making, chewing and smoking tobacco and snuff, ships and ship repairs and electrical apparatus and supplies, the total wages are between \$500,000 and \$1,000,000. In 54 of the remaining classes the total wages are between \$100,000 and \$500,000, and in each of 92 others they are under \$100,000. The group of industries which occupies the first place in relation to labor and wages is that of timber and lumber and their re-manufactures, which gives employment to 75,704 workers at a cost for labour of \$18,966,763.

The value of products per establishment is highest in the group of chemicals and allied products and lowest in the group of clay, glass and stone products, being for the former an average of \$89,354 and for the latter \$8,560 per establishment. In the seven groups of iron and steel products, leather and its finished products, liquors and beverages, chemicals and allied products, metals and metal products other than steel, tobacco and the miscellaneous industries the average value of products per establishment is over \$50,000; in the five groups of textiles, timber and lumber and their re-manu-

factures, paper and printing, vehicles for land transportation and vessels for water transportation the average is between \$25,000 and \$50,000 per establishment, and in the two groups of food products and hand trades the average is under \$25,000 per establishment. The group of food products shows the greatest value of products, being \$125,202,620, although it stands one of the three lowest in the average value of products per establishment. The group of timber and lumber and their re-manufactures is the second in value of products, being \$80,341,204; and the group of textiles is third, with \$67,724,839. In the three groups of iron and steel products, leather and its finished products and the miscellaneous industries the value of products is between \$25,000,000 and \$50,000,000; and in nine others it is below \$25,000,000.

In the three industries of butter and cheese, flouring and grist mill and log products the value of products per industry is over \$25,000,000; in the nine industries of bread, biscuits and confectionery, slaughtering and meat packing, refined sugar, cottons, foundry and machine shop products, lumber products, boots and shoes, leather and printing and publishing, the value of products lies between \$10,000,000 and \$25,000,000; and in the fifteen industries of preserved fish, men's clothing (tailor), men's clothing (factory), hats, caps and furs, woollen goods, iron and steel products, furniture and upholstered goods, malt liquors, plumbing and tinsmithing, smelting, chewing and smoking tobacco and snuff, cigars and cigarettes, car repairs, carriages and wagons and agricultural implements, the value of products is between \$5,000,000 and \$10,000,000. These make a total of 27 kinds of industries in which the value of products exceeds \$5,000,000 per industry. In 39 other kinds of industries (including one of the 'all others') the value of products per industry ranges from \$1,000,000 to \$5,000,000, and in the remaining 122 classes the value per class is below \$1,000,000.

Table 33 shows that for the 15 groups of industries the average earnings for labour per worker are \$285.86, the average cost of labour per establishment is \$6,114, and the value of products per establishment \$32,836. In only two of the groups, viz.: food products and clay, glass and stone products, are the several averages lower than those for the 15 groups; in the two groups of textiles and timber and lumber and their re-manufactures they are lower for earnings of labour per worker; and in the group of hand trades they are lower for cost of wages and value of products per establishment.

The average earnings of labour per worker is greater in 177 kinds of industries and less in 88 than the average of \$285.86 for the 265 kinds of industries named in the table; and in the 180 kinds of industries having three establishments and over of a kind, there are 109 with averages of cost of wages and value of products per establishment greater than the averages for all the 265 kinds of industries in the table and 71 with less.

But average earnings are modified by the number of days in which labourers are employed, depending on the nature of the industries. For examples, in butter and cheese factories the aggregate time is 1,140,702 days and the average 165 days, in fruit and vegetable canning the aggregate time of labour is 520,430 days and the average per worker 112 days, and in the industry of fish preserving the aggregate time is 1,334,175 days and the average 86 days, while in the manufacture of bread, biscuits and confectionery the aggregate time of labour is 1,727,394 days and the average per worker 295 days, and in the slaughtering and meat packing factories the aggregate time is 598,874 days and the average 282 days. Corresponding with these averages of days per worker in the several kinds of industries are the averages of earnings in the census year, viz.: in butter and cheese making \$212.62, in fruit and vegetable canning \$81.28, in fish

preserving \$78.42, in bread, biscuit and confectionery making \$308.56, and in slaughtering and meat packing \$369.64.

The average cost of labour per establishment depends on the number of workers and the rate of wages, and the value of products per establishment largely on the cost of labour and of materials; and of course an important element in these averages is the time of operation.

Table 34 shows for industries and groups of industries the relations expressed by per cent ratios which the principal items of cost in manufactures bear to the value of products.

Under the head of materials is included all articles in the crude or partly manufactured state used in the production of finished articles. Expenses include the rent of works, of power and heat and of offices, the cost of fuel and light, of municipal, provincial and internal revenue taxes, of interest and insurance, and of payments for contract work. Wages include the earnings of labour, whether employed in or out of establishments, on time or piece-work. Salaries are payments to officers, managers, salesmen, etc., and to owners and firm members, for administrative service, or for work at trade by such persons, as is often the practice in small establishments. Capital includes the values of lands, buildings, machinery and motive power, and of tools and implements necessary for a manufacturing industry, together with cash on hand, bills receivable, unsettled ledger accounts, raw materials, stock in process of manufacture and finished products on hand, on the basis of the last annual stock taking. These, however, are the usual terms of business rather than the scientific terms of political economy, which are exact and comprehensive.

The various items named above do not constitute all the costs of an industrial business, and therefore they do not reveal the profits of a business when compared with the values of products. The ratios under the first five heads are calculated on totals compiled from the returns of manufacturers for each group and kind of industry. The sixth ratio is calculated on the value of capital shown in the returns at an assumed rate of six per cent allowance for interest—which rate is the only hypothetical element

employed in the table. The first, second, third, fourth and fifth ratios represent definite proportions of cost in manufactures, which the capitalist, owner or employer is required to provide, although the whole of the fifth and possibly a portion of the fourth reverts to himself for service; and the sixth ratio represents the portion of the value of product which is the earnings of capital or investment. In the case of the last it is not to be assumed that interest varies according to the group or kind of industry, for as a rule the rate of interest at the same time and place is practically the same on equally good security. But what is implied is that the smaller the ratio of interest on capital to value of product for any industry the larger is the value of product relatively to the capital employed. For example, the ratio of interest on capital at six per cent to the value of products in all industries is 5.57, and in industries of the group of food products (which are industries closely allied to natural products) it is only 2.74. For every \$1,000 of interest on capital at six per cent in all industries the product is \$17,940, while in industries of the food products group it is \$36,500, and the example helps to show where the possibility of profit lies in the employment of capital. The difference between the sum of the six ratios and the complete number of 100 is a ratio representing costs of production not specified and a margin (if any) for depreciation of plant, contingencies, rest, profits, replacement of capital, or any other object to which in the interest of the investment it may be applied.

There are disparities necessarily in the ratios for different classes of industries, as there are also for establishments of the same kind of industry, dependent on various causes of inequality; but it is no doubt true that ratios of the same sort tend to an equality. Therefore the table of ratios has value in comparing one industry or group of industries with another in the principal items of cost and the relation of such items to each other. They will be useful also for comparative study with the statistics of previous and succeeding enumerations in the Dominion, or in other countries, in so far as a uniform plan for collecting the data of manufacturing industries enables comparisons to be made. Besides, they will possess a personal value to the owner of every manufacturing concern in the standards which they supply for measuring his own business in the various details of capital, cost and production.

The data from which the ratios have been derived are in table VIII. (pp. 114-123) for salaries and wages, in table X. (pp. 132-139) for miscellaneous expenses, and in table XL (pp. 140-147) for cost of crude and partly manufactured materials and value of products, whose statistics are for the whole of Canada.

For all kinds of industries the ratio of the cost of materials to value of products is 55.40, of miscellaneous expenses 5.13, of wages of workers 18.62, of salaries of officers, salesmen, etc. 2.79, of salaries of owners and firm members 2.14 and of interest on capital at six per cent 5.57, being a total of 89.65 or 10.35 less than a complete ratio. Leaving out the interest ratio, which is suppositional, there remains an average ratio of 15.92 (being 15.92 per cent of the value of products) out of which to provide for unknown items of cost, interest on capital, profits, depreciation of plant, losses on bad debts, etc., the showing of which in their exact details appears to be a matter of confidential book-keeping, not of a census.

Exclusive of the ratio of interest on capital, the ratio of the cost of materials, miscellaneous expenses, wages and salaries to the value of products is 90.71 for the

group of food products, 84·51 for textiles, 82·23 for iron and steel products, 81·70 for timber and lumber and their re-manufactures, 86·51 for leather and its finished products, 81·23 for paper and printing, 73·55 for liquors and beverages, 79·50 for chemicals and allied products, 61·18 for clay, glass and stone products, 69·27 for metals and metal products other than steel, 83·17 for tobacco and its manufactures, 91·27 for vehicles for land transportation, 84·05 for vessels for water transportation, 79·81 for miscellaneous industries, and 82·12 for hand trades.

The highest ratio in the cost of materials to value of products is seen to be in the group of food products, 79·18, and the lowest in the group of clay, glass and stone products, 13·63. The ratio of the cost of wages and salaries to value of products is greatest in the group of hand trades, 53·10, and least in the group of food products, 8·64. The ratio of miscellaneous expenses to value of products is 29·54 in the tobacco industries, and only 2·54 in leather and its finished products. In the group of food products and chemicals and allied products the ratio of wages and salaries to value of products is under 20, in the groups of textiles, timber and lumber and their re-manufactures, leather and its finished products, liquors and beverages, metals and metal products other than steel, tobacco and its manufactures, and the miscellaneous industries the ratio is 20 to 30; in the groups of iron and steel products, paper and printing and vehicles for land transportation the ratio is 30 to 40; and in the groups of clay, glass and stone products, vessels for water transportation and the hand trades the ratio is over 40.

#### COMPARATIVE STATISTICS.

Tables xvi. to xxi. present statistics of manufactures in Canada for the census years 1881, 1891 and 1901; but they are not strictly comparative as those of 1881 and 1891 are for all manufacturing and mechanical works, while those for 1901 are for factory works employing five hands and over.

Tables xvi. and xvii. show for provinces and the Dominion the number of establishments and the value of products as enumerated for each census year. In 1881 the number was 49,722 and the value \$309,731,867, in 1891 the number was 75,964 and the value \$469,847,886, and in 1901 the number was 14,650 and the value \$481,053,375. New Brunswick, Nova Scotia and Prince Edward Island are the only provinces in which the products of factories employing five hands and over in 1901 are less in value than the products of all works in 1891; and in all provinces the value of products in 1901 was \$171,321,508 more than in 1881 for 35,072 works less, and \$11,205,489 more than in 1891 for 61,314 works less.

Tables xviii., xix., xx. and xxi. present the principal statistics of manufactures for census districts, provinces and the Dominion, and also for cities and towns and the principal villages in the census years 1881, 1891 and 1901 by five groups of values of products, viz.: (1) under \$2,000, (2) \$2,000 to under \$12,000, (3) \$12,000 to under \$25,000, (4) \$25,000 to under \$50,000 and (5) \$50,000 and over, - the statistics for 1881 and 1891 being for all industrial works unlimited by the number of persons employed, and those for 1901 being for works employing five hands and over.

Children under 16 years . . . . . "	7.74	7.19	3.55

The statistics of works, employees and wages in table 35 exhibit totals, averages and ratios for the three census years,—of totals for establishments, employees and wages, and of employees by classes of sex and age, of averages for employees and wages per establishment and of wages per employee, and of ratios for employees by classes of sex and age to total employees. In this comparison managers, officers, clerks, etc., are counted as employees and salaries are included with wages.

For 1901, with 30 per cent of the number of works reported for 1881, the employees were more by 89,100, and with 19 per cent of the number of works for 1891 the employees were less by 25,560; but the wages of employees in 1901 were \$53,820,348 more than in 1881, and \$12,834,000 more than in 1891.

The averages show, as was certain to be the case, large increases in the number of employees and in wages per establishment in 1901 over 1881 and 1891; and they also show, what was not so certain to follow, a large increase in the wages per employee. From 1881 to 1891 the increase was \$38.58, and from 1891 to 1901 it was \$57.47, while the ratios of men, women and children to total employees was practically unchanged during the period except that in the case of children the ratio of number employed fell in the last decade by fifty per cent.

A comparison of number of manufacturing establishments and value of products for provinces and the Dominion is shown in tables xvi. and xvii. by kinds of industries. The totals are presented in table 36.

From 1881 to 1891, when the census of all industrial works was taken, the number of establishments in British Columbia increased 355, in Manitoba 687, in New Brunswick 2,424, in Nova Scotia 5,002, in Ontario 9,081, in Prince Edward Island 1,062, in Quebec, 7,280, in the Territories 351, and in all Canada 26,242. The average product per establishment increased during the same period in British Colum-

bia from \$7,052 to \$15,584, and in Ontario from \$6,851 to \$7,441, but there was a decrease of the average product per establishment in Manitoba from \$9,922 to \$9,849, in New Brunswick from \$6,160 to \$4,393, in Nova Scotia from \$3,381 to \$2,958, in Prince Edward Island from \$2,102 to \$1,632, in Quebec from \$6,643 to \$6,404, and for the Dominion the decrease was from \$6,229 to \$6,186. For 1901, when the census was taken for factory works employing five hands and over, the average product per establishment in British Columbia was \$49,612, in Manitoba \$39,900, in New Brunswick \$22,821, in Nova Scotia \$19,859, in Ontario \$36,914, in Prince Edward Island \$6,966, in Quebec \$32,670, in the Territories \$18,714, and in the Dominion \$32,836. The high average of British Columbia is made up by the large production of fish canneries, saw mills and smelting works, and of Manitoba by that of flouring mills.

In table xviii. statistics of industries are brought together by groups of values of products for districts in 1901, and in table xix. for provinces in 1881, 1891 and 1901. Works with an output under \$2,000 comprise the first group, with \$2,000 to under \$12,000 the second, with \$12,000 to under \$25,000 the third, with \$25,000 to under \$50,000 the fourth, and with \$50,000 and over the fifth. Two-thirds in number of all industrial establishments reported for 1881 and 1891 are counted in the group whose value of products is under \$2,000, about one-fourth of the whole in the group of \$2,000 to under \$12,000, and less than one-twelfth of the whole in the group of \$12,000 and over. Of the establishments reported for 1901, one-tenth of the whole number have values of less than \$2,000, one-half or more have values of \$2,000 to under \$12,000, and about two-fifths have values of \$12,000 and over.

An obvious tendency in the manufacturing industries is in the direction of works of larger capacity, as indicated by the statistics of capital and the value of products.

Taking for illustration the capital of works in the two groups whose products are \$25,000 to under \$50,000 and \$50,000 and over—which doubtless exclude all establish-

ments employing less than five persons—the number of such works was 2,075 in 1881, 2,879 in 1891, and 3,185 in 1901. The capital employed in works of the two groups was \$101,104,322 in 1881, being an average per establishment of \$48,725; in 1891 it was \$235,891,991, or an average of \$81,878; and in 1901 it was \$377,943,990, or an average of \$118,663. Compared by per cent ratio with the capital of all industries, the capital of works having a product of \$25,000 and over in 1881 was 61·03, in 1891 it was 66·78, and in 1901 it was 84·56.

Taking the product of works in the same two groups for a second illustration, it is found that in 1881 it was \$187,249,941, or an average per establishment of \$90,241; that in 1891 it was \$297,222,732, or an average of \$103,166; and that in 1901 it was \$393,262,128, or an average of \$123,473. Compared by per cent ratio with the products of all industries, as was done with capital, these works of \$25,000 and over show a ratio of 60·46 for 1881, of 63·26 for 1891, and of 81·75 for 1901.

For all works having a product of \$25,000 and over, therefore, the average increase of capital per establishment was \$33,153 and of product \$12,925 from 1881, to 1891, and from 1891 to 1901 the increase of capital was \$36,785, and of product \$20,307 per establishment.

#### MANUFACTURES OF CITIES, TOWNS AND VILLAGES.

Tables xx. and xxi, exhibit a comparison of statistics of manufactures in towns and cities of 5,000 inhabitants and over and in villages and towns of 1,500 to under 5,000 for the three census years 1881, 1891 and 1901, in so far as a comparison may be made of the statistics of works employing five hands and over with those of works without relation to the number of employees. Where the statistics are less in 1901 than in either of the former years, it cannot be affirmed that those of all works, if enumerated small and great, would be less; but where they are greater as taken, there is no manner of doubt. And in the aggregate there is no doubt, because 5,832 works in cities, towns and villages of 1,500 inhabitants and over in 1901 have products of \$360,645,387, while 21,607 works in places of the same limit of population in 1891 had products of \$310,911,527 and 13,123 works in 1881 had products of \$198,017,874. The statistics are summarized in table 37 for number of establishments, amount of capital and value of products.

In cities and towns of 5,000 population and over the average capital per establishment in 1881 was \$10,839, in 1891 it was \$12,299 and in 1901 it was \$61,730, and for villages and towns of 1,500 to under 5,000 it was \$4,418 in 1881, \$6,913 in 1891 and \$49,864 in 1901. For the same census years the value of products per establishment in cities and towns of 5,000 and over was \$12,586 in 1881, \$16,762 in 1891 and \$65,128 in 1901, and in villages and towns of 1,500 to under 5,000 it was \$8,823 in 1881, \$9,001 in 1891 and \$50,165 in 1901.

The increased averages of capital and products in the last census year are largely due to the omission of all smaller works in the enumeration; but there is no doubt that the growth of industries has been greater in the urban places. In the cities,

towns and villages the product of works in 1881 was \$198,017,874 of the total of \$309,731,867 for the Dominion, or 64 per cent; in 1891 it was \$310,911,527 of the total of \$469,847,886, or 66 per cent; and in 1901 it was \$363,319,603 of the total of \$481,053,375, or 75 per cent. In the city of Toronto alone the value of products of works employing five hands and over was \$13,451,576 more than the products of all works in 1891.

Totals.....	39	71,051,834	1,821,842

Manufacturing works having an output of \$200,000 and over in the census year are shown by industries in table 38 in three groups, viz: works with (1) a product of \$200,000 to under \$500,000, (2) a product of \$500,000 to under \$1,000,000, and (3) a product of \$1,000,000 and over. The first of these groups represents 84 kinds of industries and 323 establishments, with a total product of \$94,531,698, and an average of \$292,668 per establishment. The second group represents 30 kinds of industries and 68 establishments, with a total product of \$46,729,825 and an average of \$687,203 per establishment. The third group represents 18 kinds of industries and 39 establishments with a total product of \$71,051,834 and an average of \$1,821,842. Altogether there are represented in the three groups 90 kinds of industries comprising 430 establishments having a product of \$200,000 and over in the census year, with a total product of \$212,313,357, and an average of \$493,752. The number of establishments with a

<sup>1</sup> Includes 1 agricultural implements, 2 bread, biscuits and confectionery, 1 boilers and engines, 1 bridges, iron and steel, 2 car repairs, 1 car works, 1 clothing, men's (factory), 2 cordage, rope and twine, 1 electrical apparatus and supplies, 2 foundry and machine shop products, 1 furnishing goods, men's, 2 gas, lighting and heating, 1 hosiery and knit goods, 1 liquors, distilled, 1 paints and varnishes, 2 plumbing and tinmithing, 1 rubber and elastic goods, 1 starch, 1 textiles, dyeing and finishing, 1 thread, 1 tobacco, chewing, smoking and snuff, 1 wire, 2 woollen goods.

<sup>2</sup> Includes 2 agricultural implements, 1 boots and shoes, 2 car repairs, 1 car works, 1 clothing, men's (factory), 1 electrical apparatus and supplies, 1 iron and steel products, 1 oils, 2 smelting, 1 slaughtering, not including meat packing, 2 tobacco, chewing, smoking and snuff, 1 textiles, dyeing and finishing, 1 wood pulp, chemical and mechanical.

product of less than \$200,000 in the census year is 14,220, with a total product of \$268,740,018 and an average per establishment of \$18,898.

STATISTICS OF MANUFACTURES IN 1891 AND 1901 FOR WORKS EMPLOYING  
FIVE HANDS AND OVER.

A just comparison of the manufactures of 1891 and 1901 may be made only when all the terms are ascertained to be equal. And inasmuch as the census of 1891 was taken for all works, large and small, and that of 1901 for works employing five hands and over, it became necessary to make a compilation of the schedules of 1891 which would exclude all works with less than five employees. This has been done, and the results are shown in table xxii. for (1) number of establishments, (2) number of employees, (3) wages, including salaries, and (4) value of products. Brought to the same terms as the records of 1901, the number of works in 1891 is reduced from 75,964 to 14,065, the number of employees from 369,595 to 272,033, the cost of wages and salaries from \$100,415,350 to \$79,234,311 and the value of products from \$469,907,886 to \$368,696,723. The number of works employing less than five hands was 61,899, the number of employees 97,562, the cost of wages and salaries \$21,181,039 and the value of products \$101,211,163.<sup>1</sup>

In table xxiii. comparison is made of the statistics of 1891 and 1901 for works employing five hands and over by industries in the Dominion, under the four heads of works, employees, wages and products,—showing a gain in the decade of 585 in the number of works, of 72,002 in the number of employees, of \$34,015,039 in the earnings (wages and salaries) of employees and of \$112,356,652 in the value of products. The total number of industries represented in this table is 179, not including the 'all others,' and necessarily in some cases two or more industries have been grouped under one head. A comparison of the statistics of 1891 and 1901 is made in table 39 by fifteen groups of industries for employees, wages and value of products.

The increase in the number of employees in the group of food products during the decade was 10,391, in wages (which include salaries) \$4,642,765 and in value of products \$49,243,633. The largest increase was made in the manufacture of butter and cheese, where the number of employees was doubled, the cost of wages increased by \$604,740, and the value of products by \$18,764,523. The next largest increase was made in the slaughtering and meat packing industry, where the number of employees has nearly trebled, and the cost of wages and value of products quadrupled.

The second group, textiles, shows an increase of 17,405 in the number of employees, \$6,746,756 in earnings of wages and \$12,980,597 in value of products. The manufacture of men's and women's clothing employed 6,494 more persons in 1901 than in 1891 and the earnings of wages were more by \$2,298,828, but the value of products was more by only \$713,506. In the manufacture of woollen goods the results are even less favour-

<sup>1</sup> In making an analysis of the table of 1891 errors were discovered which affect to some extent the totals for that census year, chiefly owing to duplication of returns. The errors affect six kinds of industries, namely, coke, cartridges, leather, sugar, smelting and flour, and as corrected for this report the total of employees is reduced by 661, of wages by \$248,300, and of products by \$6,361,000.

able. The number of employees is less by 86 and the value of products less by \$485,845, while the cost of wages is more by \$228,879. The dyeing and finishing of textiles appears as a separate industry for 1901 with products of \$2,051,992; for 1891 the product of dyeing and scouring works was \$345,504. In cottons there is shown an increase of 3,394 in employees, of \$1,405,181 in wages and of \$3,291,328 in products; in men's furnishing goods the increase of employees is 2,372, of wages \$737,601 and of products \$1,886,452; in hats, caps and furs there is an increase of 1,555 in employees, of \$709,288 in wages and of \$1,132,579 in products; and in hosiery and knit goods the increase of employees is 2,119, of wages \$631,227, and of products \$2,109,734. Substantial progress is also shown in the manufactures of cotton bags, rope and twine and oil clothing.

The group of iron and steel products shows an increase of 6,096 in the number of employees, of \$3,426,352 in wages, and of \$6,342,613 in the value of products. Axes and tools were compiled with cutlery and edge tools in 1891,

and the statistics of these industries brought together for 1901 shows that the number of employees has increased 615, the wages \$257,137 and the products \$308,476. Iron and steel bridges have more than doubled in number of employees, cost of wages and value of products, and foundry and machine shop products have made no advance. Iron and steel industries show an increase of 1,565 in employees, \$824,962 in wages, and \$2,555,727 in value of products. The next largest increase in the industries of the group is shown in the manufacture of boilers and engines, in which the number of employees grew from 1,691 to 4,028, the cost of wages from \$690,775 to \$1,845,574 and the value of products from \$2,433,878 to \$4,626,214. Printing press, stamp and die works in 1891 employed 127 persons, whose earnings were \$54,330, and the value of the products of works was \$153,600. In 1901 the manufacture of dies, moulds and printing presses employed 345 persons at a cost for wages of \$142,444, and the value of products was \$395,735.

The fourth group, timber and lumber and their re-manufactures, occupies the first place in number of persons employed in its industries and in earnings for wages and salaries, but stands second to the group of food industries in value of products. Comparing 1901 with 1891, there is an increase of 16,554 in the number of employees, of \$4,813,739 in wages and of \$7,544,779 in products. There are increases in nearly all of the industries, but the largest are in those of log products (lumber, shingles, etc.), and in wood pulp. In the former the increase of employees is 9,341, of wages \$1,784,387, and of products \$4,030,188; and in the latter the increase of employees is 2,280, of wages \$888,983, and of products \$3,192,939.

The group of leather and its finished products shows an increase of 4,745 in the number of employees, of \$2,556,281 in wages and of \$10,268,764 in products. In the boot and shoe industry the increase in employees is 2,112, in wages \$1,418,446 and in value of products \$5,775,001, and in the leather industry the increase in employees is 782, in wages \$431,205, and in value of products \$2,356,819.

Paper and printing works show an increase of 5,962 in employees, of \$3,345,962 in wages, and of \$6,803,143 in value of products.

The seventh group comprises liquors and beverages, and although the number of employees and the earnings of wages are substantially greater in 1901 than in 1891 there is not a corresponding increase shown in the value of products. In distilled liquors the value is less by \$579,182, which is possibly a result of adding the inland revenue tax to the manufacturer's value of product in 1891; there is an increase of 182 in the number of employees and of \$185,112 in wages. Malt liquors show an increase of 740 in employees, of \$505,575 in wages and of \$719,945 in products.

In the eighth group, chemicals and allied products, employees show an increase of 972, earnings of wages \$726,938 and value of products \$3,697,769. The only industry having a decrease of employees, wages and products is the manufacture of drugs, and in explosives there is also a small decrease in value of products. In oils there is an increase of \$1,391,381, in paints and varnishes \$985,983, in patent medicines \$929,893 and in starch \$522,550.

Clay, glass and stone products are the least satisfactory of all the groups, as they show decreases in all the principal kinds of works. The number of employees is less in 1901 by 1,371, the wages less by \$523,208, and products less by \$2,875,776. The greatest decrease is seen to be in monuments and tombstones.

Group x. shows that in the metal industries the number of employees increased 2,201 in the decade, the wages of employees \$1,613,353 and the value of products \$6,309,351. The largest increase was made in smelting works (which include iron blast furnaces). Here, with an increase of 215 in the number of employees and of \$480,573 in wages, there is an increase of \$4,066,144 in the value of products. In the two related industries of plumbers' supplies and plumbing and tinsmithing the increase in the number of employees in the decade is 1,332, of wages \$684,934 and of value of products \$1,589,291. The industry of watch cases, which is given separately for 1901, was probably included with that of watchmaking and jewelry in 1891.

The tobacco group of industries includes the manufacture of chewing and smoking tobacco, snuff, cigars and cigarettes. The employees in these industries increased in the decade by 1,726 and wages by \$1,169,524, and the increase in the value of products was \$6,174,347.

Groups xii. and xiii. include the building of vehicles and vessels for transportation—bicycles, carriages and wagons, and cars for land, and boats and ships for water. There is an unaccountable falling off in the statistics of cars and car works, and of ships and ship repairs, but both groups show an increase of 5,127 in employees, of \$2,712,139 in wages, and of \$2,666,030 in value of products.

Miscellaneous industries are brought together in group xiv. Those whose products in 1901 exceed \$1,000,000 are agricultural implements, electrical apparatus and supplies, electric light and power, gas for lighting and heating, gloves and mittens, musical instruments, rubber and elastic goods, seed cleaning and preparing, and soap. In the total industries of the group there is an increase of 2,126 in employees, of \$1,923,174 in wages and of \$3,063,263 in products. The increase in the value of agricultural implements is \$2,345,384, of electrical apparatus and supplies and electric light and power \$3,393,383, and of gloves and mittens \$331,645. In the 'all other' industries, which comprise works less than three of a kind, there is a decrease in the value of products of \$6,203,673.

The least of all the groups is that of the hand trades, which shows a decrease in the value of products of \$381,714.

Table 40 shows for groups of industries the increase in number of employees, cost of wages and value of products for works employing five hands and over in 1891 and 1901, the data for which are given in table 39. In twelve of the groups there are increases of employees, wages and products, and in three there are decreases. In one group only, that of liquors and beverages, the increase in the value of products is less than \$1,000,000; in three others, those of chemicals and allied products, vehicles for land transportation and miscellaneous industries, it is less than \$5,000,000; and in eight others it is more than \$5,000,000. The group of textiles shows the largest increase in number of employees and earnings of wages, and the largest increase in the value of products is in the group of food products.

The ratio of wages to value of products for industries having five employees and over is presented in table 41 for 1891 and 1901 by groups of industries, together with the average wage per employee, and the average value of products per employee in each group.

Hand trades .....	34·74	53·10	366 89	453 30	1,056 02	853 74
All industries.....	21·49	23·54	291 27	529 18	1,355 34	1,398 29

For all industries the ratio of 1891 is 21.49 and for 1901 it is 23.54. That is to say, for every \$100 of product in 1891 the earning of wages was \$21.49 and in 1901 it was \$23.54. In the group of food products this ratio is shown to be lowest, being only 8.13 in 1891 and 8.64 in 1901; and in the groups of clay, glass and stone products and the hand trades it is highest. In all the groups except tobacco there is an increase in the ratio of wages to value of products in the decade.

There is only one group, that of the clay, glass and stone products, in which the average wage per employee is less in 1901 than in 1891. For all industries it rose from \$291.27 to \$329.18, being an increase of \$37.91. The lowest wage is paid in the manufacture of food products, where for 1901 it is only \$230.33; but there was an increase in the decade of \$65.90. The highest wage is earned in the group of liquors and beverages; where it is \$524.64 for 1901, with an increase of \$76.02 in the decade. But the greatest increase occurred in the group of chemicals and allied products, being \$106.64; and the next greatest occurred in the tobacco group, an increase of \$100 per employee. In the hand trades the increase is \$86.41, and in the group of metals and metal products it is \$70.26.

The average value of product per employee rose from \$1,355.34 in 1891 to \$1,398.29 in 1901, being an increase of \$42.95 for all industries employing five hands and over. In the groups of food products, leather and its products, chemicals and allied products, metals and metal products and tobacco and its manufactures, the average value of product per employee is more for 1901 than for 1891, and in the other groups it is less. The largest value of product per employee is in the group of chemicals and allied products, in which it increased from \$3,044.66 in 1891 to \$3,254.78 in 1901; and the smallest is in the group of clay, glass and stone products, in which it fell from \$814.63 to \$656.79. The largest increase in value of products per employee occurred in the group of food products, where it is \$644.32, and the next largest in the tobacco group, \$619.63. In the group of textiles the value of product per employee, less the cost of wages, is \$816.20 for 1891 and \$700.95 for 1901; in food products it is \$1,857.91 for 1891 and \$2,436.33 for 1901; and in all industries it is \$1,064.07 for 1891 and \$1,069.11 for 1901.

Table 42 presents for groups of industries a comparison of ratios of cost of wages, materials and miscellaneous expenses to value of products in Canada and the United States for the last census year of each country.

For all industries the ratio of wages to the value of products is 23.54 in Canada and 20.96 in the United States,—that is to say, for every \$100 of products there is \$23.54 of wages in Canada and \$20.96 in the United States. The ratio of materials to products is 55.40 in Canada and 54.27 in the United States, which is a difference of 1.13 in favour of the latter country. The ratio of miscellaneous expenses (which include rent, fuel and light, municipal and provincial taxes, internal revenue tax, payments for contract work, interest, insurance, etc.) is 5.13 in Canada and 10.12 in the United States.

In all the groups except those of clay, glass and stone products and vehicles for land transportation the ratio of wages to value of products is higher in Canada than in the United States. The largest difference is in the group of hand trades, in which it is

27·42, and the next largest in the group of metals and metal products, 10·17. The difference is in the group of clay, glass and stone products, 0·09, and the next in group of vehicles for land transportation, 0·32, in both of which the American ratio is in excess of the Canadian. In the extensive group of food products, which makes up 17 per cent of the value of all manufactured products in Canada and 17 per cent of the value in the United States, the difference is 1·21—being a ratio of 3·64 in Canada and 7·42 in the United States.

42. RATIO OF COST OF WAGES, MATERIALS AND MISCELLANEOUS EXPENSES TO VALUE OF PRODUCTS IN CANADA AND UNITED STATES, BY GROUPS OF INDUSTRIES.

Groups of industries.	Canada.			United States.

Tobacco and its manufactures..	22·07	31·56	29·54	20·77	37·52	28·43
Vehicles for land transportation.	35·12	53·03	3·12	35·35	51·24	5·40
Vessels for water transportation.	44·55	36·50	3·00	36·00	43·63	6·21
Miscellaneous industries.....	27·94	44·32	7·33	25·09	47·29	9·67
Hand trades.....	53·10	22·56	6·46	25·68	40·28	11·03
All industries.....	23·54	55·40	5·13	20·96	54·27	10·12

In all the groups except paper and printing, liquors and beverages and vehicles for land transportation the ratios of the cost of materials to the value of products are greater in the United States. In food products the difference is only 0·52 and in textiles only 1·30, whereas in the group of metals and metal products it is 24·59, of iron and steel products 6·87, and of the hand trades 17·72.

The ratio of miscellaneous expenses to the value of products is higher in the United States than in Canada for all groups of industries with the single exception of tobacco, and the difference in this group is only 1·11. In the group of textiles the ratio is greater in the United States by 5·23, in iron and steel by 4·84, in paper

<sup>1</sup> In computing ratios for the United States freight has been added to materials, and fuel, power and heat and mill supplies to miscellaneous expenses, so as to make the items comprising cost of materials and miscellaneous expenses uniform with those of Canada.

printing by 8.00, in liquors and beverages by 30.06, in chemicals and allied products by 4.55, in clay, glass and stone products by 8.50 and in the hand trades by 4.57. In all industries the ratio of wages to value of products in Canada is 2.58 more than in the United States and the ratio of cost of materials is more by 1.13, but the ratio of miscellaneous expenses is less by 4.99. In Canada there remains a ratio of 15.93 and in the United States a ratio of 14.65 to provide for other expenses and profits of the business.

43. RATIO OF TOTAL COST OF WAGES, MATERIALS AND MISCELLANEOUS EXPENSES TO VALUE OF PRODUCTS, AND AVERAGE WAGE PER EMPLOYEE IN CANADA AND UNITED STATES, BY GROUPS OF INDUSTRIES.

Groups of industries.	Wages, materials and miscellaneous expenses.		Average wage per employee.

Clay, glass and stone products...	61.18	80.57	274 07	474 72
Metals and metal products (including pig iron).....	69.27	84.27	463 04	551 01
Tobacco and its manufactures...	83.17	86.72	373 06	390 62
Vehicles for land transportation.	91.27	91.99	440 50	540 63
Vessels for water transportation.	84.05	85.84	334 93	557 14
Miscellaneous industries.....	79.59	82.05	414 99	469 61
Hand trades.....	82.12	76.99	453 30	522 71
All industries.....	84.07	85.35	329 18	477 82

In table 43 is given for groups of products the ratio of total cost of wages, materials and miscellaneous expenses to the value of products in Canada and the United States, together with the average wage per employee in each country for each group of industries. The average ratio for all industries is 84.07 in Canada and 85.35 in the United States, which means that for every \$100 value of product the cost for wages, materials and miscellaneous expenses is \$84.07 in Canada and \$85.35 in the United States. The highest ratio is in the group of food products, being 90.71 in Canada and 91.60 in the United States. The lowest in Canada is in clay, glass and stone products, 61.18, and in the United States the lowest is in the group of hand trades, 76.99. There are some curious differences, as in the metals and metal products, with a ratio of 69.27 in Canada and 84.27 in the United States; and in clay, glass and stone products, with a ratio of 61.18 in Canada and 80.57 in the United States; and in liquors and beverages...

ages, with a ratio of 73·55 in Canada and 85·69 in the United States. In these groups it would appear that the industries may be carried on with substantially larger margins for profits in this country than is possible in the United States; but in most of the groups the ratios preserve a fairly close relationship.

The average wage for all industries appears to indicate an advantage for the Canadian manufacturer, as its cost is less to him by \$148.64 per employee than the American manufacturer pays. But of course cheap labour is not always an advantage in the conduct of industries, and the question deserves more investigation. Why in all the groups is the average price of labour cheaper in Canada than in the United States—in two countries contiguous to each other, and peopled by the same races of men employed in the same industries? It may be due to a lower cost of living in the one country than in the other, or to less efficiency of labour, or to a relatively larger supply of workmen, or to a narrower margin of profit on a more circumscribed production—although as a matter of fact the ratio of wages to the value of products is 2·58 less in the United States than in Canada, as has been shown in table 42. But in the home of great industries, with capital and products of multiplied millions, the advantage of conditions is almost sure to prevail. This is indicated by the ratio of capital to value of product, which is 75·50 in the United States and 92·90 in Canada; as well as by the average value of product per employee, which is \$2,279 in the United States and \$1,398 in Canada. Generally, and under similar conditions, the volume of business will determine the ultimate advantage.

IMPRIMÉ PAR S. E. DAWSON, IMPRIMEUR DE SA TRÈS EXCELLENTE  
MAJESTÉ LE ROI  
1905

# RAPPORT SUR LES MANUFACTURES

---

## QUATRIÈME RECENSEMENT DU CANADA, 1901

Les tableaux du troisième volume du recensement de 1901 ont trait aux manufactures du Canada, et n'ont rapport qu'aux établissements industriels employant cinq personnes et plus.

ARCHIBALD BLUE,

*Commissaire spécial du recensement.*

BUREAU DU RECENSEMENT,

OTTAWA, avril 1904.

## QUATRIÈME RECENSEMENT DU CANADA, 1901

### MANUFACTURES

Le recensement des manufactures est présenté dans les tableaux I à XXIV de ce volume (pp. 2-371).

Les statistiques des industries, telles que données dans les tableaux I à VI (pp. 2-105) sont classifiées de manière à montrer (1) les valeurs des biens-fonds, de l'outillage et du capital actif, (2) les salaires et gages des personnes employées, (3) le temps de travail des employés, (4) les dépenses diverses, y compris le loyer des usines, de la force motrice, du chauffage et des bureaux, le coût du combustible, de l'éclairage, des taxes, de l'intérêt et de l'ouvrage fait à l'entreprise, (5) le coût des matériaux et la valeur des produits, et (6) la force mécanique employée dans les usines; dans les tableaux VII à XII (pp. 106-155) les statistiques classifiées de la même manière sont données pour le Canada; et dans les tableaux XIII à XV (pp. 156-271) les statistiques du capital, des gages, des matériaux et des produits sont données par districts de recensement et pour le Canada.

Les tableaux XVI, XVII, XIX, XX et XXI donnent les statistiques comparatives pour les années de recensement 1881, 1891 et 1901.

Aux tableaux XVI et XVII (pp. 272-293) des comparaisons sont données du nombre d'établissements et de la valeur des produits pour ces trois années; aux tableaux XVIII et XIX (pp. 294-325) par groupes des valeurs de la production pour les districts, les provinces et le Canada, dans le premier pour l'année 1901 seulement et dans le second pour les trois années de recensement, et aux tableaux XX et XXI (pp. 326-341) les comparaisons sont données de la population, de la valeur du capital, du nombre d'employés à gages et du coût des gages, ainsi que des matériaux et de la valeur des produits (1) dans les villes et cités de 5,000 habitants et plus, et (2) dans les villages et villes de 1,500 à au-dessous de 5,000 habitants.

Dans la préparation d'un plan pour le recensement des manufactures il a été décidé d'en limiter l'étendue aux statistiques du système de fabriques ou usines qui est distinct du système de travail domestique ou manuel, et dans les instructions aux énumérateurs la description suivante est donnée d'une manufacture ou fabrique: "Un établissement manufacturier ou fabrique peut être décrit comme local quelconque, édifice, chambre ou lieu où la vapeur, l'eau ou autre force motrice est employée pour mouvoir ou mettre en œuvre tout mécanisme employé à la préparation, la confection ou l'achèvement d'un article, substance, matière, tissu ou composition, ou pour aider au procédé de manufacture qu'on y emploie; ou tout local, édifice, chambre ou lieu où le patron des personnes y employées a le droit d'accès et de contrôle, et où un travail manuel quelconque est exercé par voie de métier ou en vue de gain, à la confection, au changement, à la

“réparation, l'ornementation ou l'achèvement de tout ou de partie d'un article pour le “rendre propre à la vente.”

Une fabrique, telle que définie par le dictionnaire de Murray, est un bâtiment ou groupe de bâtiments avec outillage pour la fabrication d'effets ou marchandises, et Johnson, dans son “Universal Encyclopædia”, la définit comme étant “un établissement où sont réunis plusieurs ouvriers dans le but d'obtenir, à meilleur marché, de plus grandes facilités de travail qu'ils ne pourraient le faire individuellement à leurs maisons, pour produire, par leurs efforts combinés, des résultats qu'ils ne pourraient accomplir séparément, et pour empêcher les pertes qu'occasionne le temps employé à transporter d'une place à l'autre des articles en voie de confection durant les divers procédés nécessaires à l'achèvement de leur fabrication.” Le système de fabrication dans les manufactures, d'après cette autorité, a remplacé le système du travail à la main ou travail domestique. Dans les statuts anglais, comme dans ceux d'Ontario et de Québec, on donne au terme, tel qu'employé pour des fins d'inspection, une définition spécifique, différenciant les uns des autres en quelques points dans chaque statut, mais tous s'accordant quant à l'emploi de plusieurs personnes dans un établissement. Les clauses de la loi des fabriques dans Ontario ne s'appliquent qu'aux établissements dans lesquelles plus de cinq personnes sont employées, et elles sont sans effet aussi dans le cas des enfants, des jeunes filles ou des femmes employées à la maison, lorsque ni la vapeur, ni l'eau ni tout autre force mécanique est employée dans les procédés de fabrication.

Sous la loi de Québec tout établissement d'une espèce nommée dans les cédules est une fabrique pour les fins d'inspection; et c'est aussi maintenant le cas sous la loi anglaise. Mais d'après la nouvelle loi anglaise il est pourvu à l'inspection des ouvriers travaillant en dehors d'une manière qui promet d'être pratique et encourageante, de sorte que si les propriétaires et les inspecteurs de fabriques, de même que les autorités des bureaux de santé font seulement leur devoir sous cette loi, la condition de ces travailleurs recevra presque autant d'attention que celle des personnes employées dans les fabriques ou boutiques. La santé des personnes employées dans les fabriques ne concerne pas cependant notre recensement. Il se borne à recueillir la statistique des industries tout en tenant compte des employés d'un établissement, qu'ils soient employés dans des bâtiments pourvus et équipés par le propriétaire de l'établissement, ou à leurs propres maisons ou ailleurs. Les instructions aux énumérateurs stipulent donc, comme qualifiant le sens du terme “établissement manufacturier ou fabrique”, que “nul établissement manufacturier ou fabrique ne sera ainsi reconnu comme tel pour les fins du recensement s'il n'emploie au moins cinq personnes, soit dans l'établissement même, soit comme ouvriers à la pièce employés en dehors de l'établissement.” L'adoption de ce minimum de cinq employés comme devant constituer une fabrique reconnue est purement conventionnelle, analogue au cas du minimum de cinq acres dans la statistique agricole comme devant constituer une “terre”. Mais les instructions stipulaient de plus que la limitation de ce minimum ne devait pas s'appliquer aux fabriques de beurre et de fromage, ni à certains produits minéraux, dans les industries desquels de grandes opérations peuvent être exercées avec moins de cinq employés; la limitation étant conventionnelle on ne peut pas nier que quelques industries (comme pour les moulins à farine et les outillages de lumière électrique par exemple) n'aient pas été énumérées aussi pleinement qu'elles auraient pu l'être. Le plan a cependant accompli le but en vue, qui était de séparer la statistique des métiers, tels que boulangeries, forges, con-

fection de paniers, menuiserie, boutiques de couturières, cordonnerie, filage au rouet, boutiques de tailleur et tissage au métier, de celles des établissements manufacturiers, et des données ont été recueillies et compilées avec lesquels des comparaisons peuvent être faites dans l'étude des industries manufacturières du pays.

Le tableau xxii (pp. 342-353) a été préparé à l'aide des rapports de l'année 1891, dans le but d'utiliser le recensement des manufactures pour cette année pour les fins de comparaison. Ce tableau montre les statistiques (1) des établissements employant moins de cinq personnes, (2) des établissements employant cinq personnes et plus, et (3) de tous les établissements groupés par espèces d'industries. Enfin le tableau xxiii (pp. 354-361) donne les statistiques comparatives des manufactures du Canada, en 1891 et 1901, pour tous les établissements employant cinq personnes et plus, groupés par espèces d'industries.

Les noms ou espèces des différentes industries dont les statistiques se trouvent dans les tableaux i à xxiii, pour l'année de recensement 1901, et le nombre d'établissements compris dans chaque industrie sont donnés au tableau xxiv, par provinces et pour le Canada. La matière de ces 24 tableaux a été compilée du tableau ou formule 8 des manufactures, pour ce qui concerne le recensement de 1901, et les données qu'ils contiennent ont été fournies par les manufacturiers.

Les tableaux qui ont été employés pour la prise du recensement des manufactures ont été approuvés et endossés par l'Association des manufacturiers canadiens, et, dans une lettre circulaire adressée aux manufacturiers, l'association déclarait qu'il était de la plus haute importance que des renseignements précis sur les industries du Canada fussent obtenus, et à cette fin, elle ajoutait qu'il était urgent que le gouvernement nommât des agents spéciaux pour le recensement des manufactures. "Les manufacturiers peuvent être assurés," disait la lettre, "que tout renseignement sera absolument privé et sera en aucun cas individuellement employé mais simplement dans les totaux pour des fins statistiques." Cette assurance avait déjà été donnée dans les instructions adressées du bureau du recensement définissant les obligations de tous les officiers, commis, énumérateurs et autres personnes employées au travail du recensement. On lit au paragraphe 23 des instructions :—"Tout officier ou autre personne employée en quelque qualité au travail du recensement doit garder secrets les renseignements recueillis par les énumérateurs et inscrits dans les tableaux ou formules. Il n'est pas permis à un énumérateur de montrer ses tableaux à aucune autre personne, ni d'en faire ou d'en garder une copie, ni de répondre à aucune question concernant leur contenu, directement ou indirectement ; et la même obligation de secret est imposée aux commissaires et autres officiers ou employés du service extérieur, aussi bien qu'à tout officier, commis ou autre employé du bureau du recensement à Ottawa. Il peut n'être pas fait usage des chiffres du recensement excepté pour des compilations statistiques, et assurance positive devrait être donnée sur ce point, si des craintes sont entretenues par quelqu'un, qu'ils pourraient servir dans un but de taxes ou tout autre objet." Avec cet engagement la compilation des tableaux pour la publication des rapports a été ainsi faite que la confiance des propriétaires d'établissements n'a pas été trompée, et dans les cas où il y avait moins de trois établissements d'une même espèce d'industrie pour un district, une province ou le Canada, ils ont été compilés sous le titre général de "Autres industries."

Les agents spéciaux pour le recensement des manufactures ont été employés seulement dans les plus grands centres d'industrie, et ailleurs le travail s'est fait de la manière régulière par les énumérateurs.

Des agents spéciaux ont été nommés dans les places suivantes, dont quelques-unes sont des petits districts avec plusieurs établissements :—

<i>Colombie Britannique—</i>	<i>Ontario—Suite.</i>	<i>Ontario—Fin</i>
Nanaimo	Cobourg	Walkerville
New-Westminster	Collingwood	Waterloo
Vancouver	Cornwall	Woodstock
Victoria	Deseronto	
<i>Manitoba—</i>	Dundas	<i>Québec—</i>
Brandon	Galt	Chambly
Winnipeg	Gananoque	Coniacook
	Guelph	Magog
<i>Nouveau-Brunswick—</i>	Hamilton	Drummondville
Moncton	Ingersoll	Granby
Saint-Jean	Kingston	Hull
	Lindsay	Jacques-Cartier, Co.
<i>Nouvelle-Ecosse—</i>	London	Joliette
Halifax	Merritton	Laclute
	Newmarket	Lévis, Co.
<i>Ontario—</i>	Oshawa	Montréal
Almonte	Ottawa	Portneuf, Co.
Amherstburg	Owen-Sound	Québec
Belleville	Peterborough	Saint-Hyacinthe
Berlin	Smith's-Falls	Saint-Jean et Iberville, Co.
Bowmanville	Stratford	Saint-Jérôme
Brantford	St-Catharines	Sherbrooke
Brockville	St-Mary	Sorel
Carleton Place	St-Thomas	Trois-Rivières
Chatham	Toronto	Valleyfield
	Windsor	

Un agent spécial était en charge du travail dans Québec et dirigeait les opérations des sous-agents pour toute la province, mais partout ailleurs les opérations ont été dirigées du bureau du recensement en correspondance avec les agents.

#### GLOSSAIRE DES TERMES.

Pour meilleure entente sur les termes dont il est fait usage dans les tableaux des manufactures et partout dans ce rapport, le glossaire suivant a été préparé :—

Argenterie. Comprend le placage en or et en argent.

Appareils et effets électriques. Comprenant les moteurs électriques.

Articles de toilette pour hommes. Comprenant cols, chemises, bretelles et cravates.

Articles en caoutchouc. Comprenant les étampes, les bandages de roues et tous autres objets en caoutchouc, excepté les chaussures.

Articles pour le polissage. Comprenant les roues faites de carborindon, corindon et pierre d'éméri.

Boîtes en bois. Comprend aussi les caisses d'emballage, les boîtes à fromage et à paqueter le beurre.

Café et épices. Comprenant la chicorée.

Capital. Comprenant les bâtiments, le terrain, les machines et la force motrice, les outils et instruments, et le capital actif.

Capital actif. Comprenant argent en caisse, billets recevables, comptes sur le grand livre non réglés, matières premières, matériel en voie de fabrication et produits finis en moins.

Capital visible. Le capital placé dans les bâtiments, le terrain, les machines, les outils et instruments.

Carton. Comprenant les cartes et le carton.

Chaussures. Comprenant les chaussures de toutes descriptions, soit en cuir, en caoutchouc, en feutre et en drap.

Coût des matériaux. Ce terme comprend la valeur de tous les matériaux, soit à l'état brut ou en partie manufacturés, excepté dans les cas où la chose est autrement spécifiée dans les tableaux.

Décorations d'intérieurs. Ce terme est employé pour définir tout travail décoratif dans les banques, les bureaux ou autres intérieurs, ainsi que pour la construction d'escaliers.

Dépenses diverses. Comprenant l'ouvrage fait à l'entreprise, le coût du combustible et du chauffage, l'intérêt, les taxes municipales et provinciales, le loyer des bureaux, de la force motrice et de l'usine, et toutes autres dépenses non énumérées ici.

- Drogues.** Comprenant les produits chimiques et la glycerine.
- Employés à gages.** Comprenant les ouvriers actuellement engagés dans les procédés de fabrication de l'établissement, soit au dedans ou au dehors, comme travaillant à la pièce.
- Fil de fer.** Comprenant le câble ou tout autre article en fil de fer, excepté le fil à clôture.
- Fonderies de cuivre.** Comprend les divers procédés de l'achèvement.
- Force mécanique.** Ce terme indique les différentes espèces de forces motrices employées dans le fonctionnement des machines, et le nombre de chevaux-vapeur, qu'elles soient possédées ou louées.
- Fruits et légumes.** Comprenant les fruits en conserves.
- Gages pour travail.** Montant payé aux employés à gages travaillant dans les établissements ou aux personnes travaillant à la pièce, à la maison ou ailleurs.
- Habillements de femmes.** Comprenant tout travail de confection ou de réparation.
- Habillements de femmes (fabriqués).** Comprenant costumes, matinées, jupes, peignoirs et linge blanc.
- Habillements d'hommes.** Comprenant le travail de commande et le produit des fabriques.
- Haches et outils.** Ce titre comprend les limes, les fourches, les couteaux mécaniques, les pelles et les bèches.
- Huile.** Comprenant les huiles de poisson et de lin, les huiles à lubrifier et le pétrole raffiné.
- Imprimerie et reliure.** Comprenant la gravure, la lithographie et le bosselage.
- Industries diverses.** Ce terme est employé pour indiquer tous les établissements dont moins de trois d'une même espèce ont été énumérés, mais dont les différentes espèces et leurs nombres respectifs sont donnés dans les notes au bas des pages des différents tableaux.
- Industrie manufacturière.** Voir la définition de fabrique ou d'établissement manufacturier, pp. vi-vii.
- Instruments de musique.** Comprenant les instruments en cuivre.
- Instruments optiques.** Comprenant les lunettes et les verres pour la vue.
- Machines à gaz.** Comprenant les générateurs et les mètres de gaz et d'acétylène.
- Manufactures de wagons.** Comprenant le matériel roulant des chemins de fer.
- Manufactures de cercueils.** Comprenant les fournitures des entrepreneurs.
- Matériaux de carrosserie.** Comprenant essieux, articles en bois pliés, soufflets de voiture, moyeux, raies, ressorts, fournitures et garnitures, et roues.
- Matériaux d'instruments de musique.** Comprenant l'action, les cordes ou tout autre partie du piano.
- Matières explosives.** Comprenant la poudre à miner, la *dualin*, la dynamite, la poudre à fusil, la nitro-glycérine, etc.
- Matières premières.** Comprenant les matériaux à l'état naturel.
- Membres artificiels et bandages herniaires.** Les appareils chirurgicaux sont compris sous ce titre.
- Moulins à farine et leurs produits.** Comprenant les nourritures céréales et les farines de blé-d'inde et d'avoine.
- Nattes et tapis.** Comprenant l'assemblage des nattes.
- Officiers, gérants et commis aux ventes.** Ce titre s'applique aux employés dont la charge est de conduire, administrer et surveiller les opérations et la mise des produits sur le marché.
- Ouvrage en bois et tournage.** Comprenant bobines, manches et rouleaux.
- Ouvrages en cheveux.** Comprenant les tissus et autres objets en cheveux.
- Pain, biscuits et confiseries.** Comprenant gâteaux, pâtisseries, bons-bons et sucreries de toutes espèces.
- Plomb en barres et tuyaux.** Comprenant le plomb en feuilles et le plomb en grains.
- Plomberie et ferblanterie.** Comprenant l'installation et la réparation des tuyaux à vapeur et à gaz, les boîtes en ferblanc, ainsi que tous les travaux en tôle et en cuivre.
- Poisson, salaisons et conserves.** Comprenant la mise en boîtes, le séchage, le salage ou toute autre manière de conserver le poisson de toutes espèces.
- Poudre-levain et essences.** Comprend aussi les extraits et les parfums.
- Produits des billes (billots).** Comprenant la latte, le bois de construction, la pulpe, le bardeau, les douves et le bois à bobines.
- Produits des fonderies.** Comprenant fournaies, calorifères, tuyaux en fer, machines de toutes espèces, radiateurs et poêles.
- Produits du bois de construction.** Comprenant les produits des moulins à planer et des fabriques de châssis et de portes.
- Produits du fer et de l'acier.** Comprenant les chevilles et tarauds, pentures, clous et broquettes, rivets et fiches et les produits du laminier.

**Propriétaires.** Comprenant les directeurs-gérants lorsque les opérations de l'établissement se font par une compagnie formée à fonds social.

**Salaires.** Paiements aux gérants, officiers et commis aux ventes, et allocations aux propriétaires ou associés pour services dans l'administration des affaires.

**Sellerie.** Comprenant coffres, valises et fcuets.

**Temps à l'ouvrage.** Comprenant le nombre collectif des jours de travail de chaque employé dans l'année, la moyenne des heures de travail durant la semaine et le nombre de mois dans l'année durant lesquels l'établissement est tenu en opération.

**Toiture et matériaux à toiture.** Comprenant l'asphalte et le feutre à toiture.

**Valeur des produits.** La valeur est fixée à la fabrique ou usine des produits finis, comprenant le montant reçu pour ouvrage de commande ou réparations

**Vinaigre et marinades.** Comprenant le cidre.

Le tableau des manufactures a été préparé en vue de démontrer la quantité et la valeur de chaque classe d'articles manufacturés par une fabrique ou usine lorsque plus d'une ligne y était produite. Mais dans un grand nombre de cas les articles principaux seulement ont été données dans les tableaux, avec la valeur totale pour tous les produits. Le glossaire montre les différentes classes de produits compris dans le terme général, tel que l'indiquent les détails dans plusieurs rapports, et il est évident que les espèces d'articles manufacturés dans le pays ont une plus grande étendue que ne l'indiquent les listes des manufactures dans les tableaux imprimés.

#### STATISTIQUES DES MANUFACTURES.

Le recensement des manufactures pour le Canada contient 14,650 établissements, représentant 264 classes d'industries. La valeur totale du capital engagé est de \$446,916,487, se composant de \$209,378,638 en terres, bâtiments, machines et force motrice, outils et instruments, et de \$237,537,849 en capital actif. Le nombre de personnes employées à salaire est de 30,691 avec un montant de \$23,676,146, et le nombre de personnes employées à gages s'élève à 313,344 avec un montant de \$89,573,204, faisant un total pour les employés de toutes classes de 344,035, avec un montant de \$113,249,350 pour salaires et gages.

Le nombre collectif des jours de travail des employés dans l'année du recensement est de 55,454,024 pour les hommes de seize ans et au-dessus, de 15,482,934 pour les femmes de seize ans et au-dessus et de 2,800,441 jours pour les enfants au-dessous de seize ans, faisant, pour les trois classes d'employés à gages, un total de 73,737,399 jours de travail; la moyenne du temps de travail par semaine est de 56.70 heures. Des 14,650 établissements, 6,328 ont été employés le temps complet, 1,277 les trois quarts du temps, 4,778 la moitié du temps, 1,506 le quart du temps, et 761 pour lesquels aucun temps n'est donné. Les dépenses diverses de toutes les fabriques et boutiques comprennent \$1,511,608 pour loyer des établissements, \$541,480 pour loyer de la force motrice et du chauffage, \$6,529,697 pour combustible et éclairage, \$1,385,119 pour taxes municipales, \$363,753 pour taxes provinciales, \$12,557,427 pour loyer des bureaux, intérêt, assurance, revenu interne, taxes, etc., et \$1,799,753 pour ouvrage à l'entreprise, faisant un total de \$24,688,837. Le coût des matériaux employés s'élève à \$266,527,858, comprenant \$149,508,062 pour matériaux bruts et \$117,019,796 pour matériaux en partie manufacturés. Totalisés sous les titres principaux des dépenses, les déboursés des établissements manufacturiers pour l'année du recensement sont ainsi représentés :

Pour salaires et gages.....	\$ 113,249,350
Pour matériaux, bruts et en partie manufacturés. ....	266,527,858
Pour dépenses diverses ..	24,688,837

formant un total de \$404,466,045. La valeur total des produits est de \$481,053,375 dont \$469,258,351 pour articles manufacturés et \$11,795,024 pour ouvrage de commande et réparations.

## CAPITAL FIXE ET ACTIF.

Le capital fixe et actif des établissements manufacturiers est donné par provinces au tableau 1, le premier comprenant la terre, les bâtiments, les machines et la force motrice, les outils et instruments, au montant de 209,378,638, et le dernier comprenant l'argent en caisse, les billets recevables, les comptes sur le grand-livre non réglés, les matières premières, les matériaux en voie de fabrication et les produits finis en mains, au montant de \$237,537,849.

## 1. VALEUR DES BIENS-FONDS, DE L'OUTILLAGE ET DU CAPITAL ACTIF.

Provinces.	Eta- blisse- ments.	Terres.	Bâti- ments.	Machines et force motrice.	Outils et instru- ments.	Capital actif.	Capital total.
	NO.	\$	\$	\$	\$	\$	\$
Col-Britannique.	392	2,281,764	3,563,442	3,538,399	1,817,565	11,700,722	22,901,892

Ile du P.-E.....	334	80,000	391,088	217,000	313,018	1,080,060	2,081,766
Québec .....	4,845	11,109,795	22,036,527	28,273,590	5,148,487	75,835,008	142,403,407
Les Territoires..	105	53,521	335,399	382,407	92,445	826,098	1,689,870
Totals. ....	14,650	17,059,219	69,585,608	90,820,901	21,903,910	237,537,849	446,916,487

La valeur des terres est de 6·06 pour cent de tout le capital, celle des bâtiments de 15·57 pour cent, celle des machines et force motrice de 20·32 pour cent, celle des outils et instruments de 4·90 pour cent, et celle du capital actif de 53·15 pour cent. La valeur moyenne du capital fixe par établissement est de \$14,292, et celle du capital actif de \$16,214, faisant une moyenne pour le capital fixe et actif de \$30,506. La valeur moyenne du capital fixe et actif est distribuée de la manière suivante, par provinces : Colombie-Britannique, \$58,423 ; Manitoba, \$23,270 ; Nouveau-Brunswick, \$22,569 ; Nouvelle-Ecosse, \$29,113 ; Ontario, \$32,855 ; Ile du Prince-Edouard, \$6,232 ; Québec, \$29,392 ; et les territoires, \$16,093.

## EMPLOYÉS, SALAIRES ET GAGES.

Les employés des établissements manufacturiers se divisent en trois classes, savoir : (1) propriétaires et associés de maisons prenant une part active dans l'administration ou les travaux et retirant assez pour vivre, ou autres allocations prises sur les revenus ; (2) officiers salariés, gérants, commis aux ventes, etc., ayant fonctions administratives ; (3) la classe ouvrière travaillant soit en dedans ou en dehors de l'établissement. Le paiement aux employés de la première et de la deuxième classe est mis sous l'en-tête de

salaires, tandis que celui qui appartient à la troisième classe est mis sous l'en-tête de gages.

## 2. EMPLOYÉS À SALAIRES.

Provinces.	Propriétaires et associés d'établissement.		Officiers salariés, gérants, commis aux ventes, etc.			
	Hommes.	Salaires.	Hommes.	Salaires.	Femmes.	Salaires.
	NO.	\$	NO.	\$	NO.	\$
Colombie-Britannique..	493	458,706	583	653,002	25	12,385
Manitoba . . . . .	243	208,861	354	310,979	39	16,967
Nouveau-Brunswick . . .	1,006	580,073	655	472,564	55	12,658
Nouvelle-Ecosse..	1,429	705,939	742	473,847	103	28,167
Ontario . . . . .	6,471	4,942,285	7,692	6,504,961	1,375	445,008

Les territoires . . . . .	88	64,585	39	35,100	4	1,500
Totaux... ..	13,227	10,231,854	15,313	12,762,720	2,151	681,572

Tel que l'indique le tableau 2 le nombre de propriétaires et d'associés d'établissement recevant des salaires est de 13,227, soit une moyenne de moins de un pour chaque établissement manufacturier, et ils reçoivent \$10,231,854 ou une moyenne de \$774. Québec montre la moyenne la plus élevée, \$1,003, et la Colombie-Britannique vient ensuite avec \$930. A peu près la moitié de tous les propriétaires et associés d'établissement recevant des salaires appartiennent à l'Ontario, et ils reçoivent aussi à peu près la moitié de tout ce qui est payé.

Les officiers, gérants et autres employés à salaires comprennent 15,313 hommes avec une moyenne de \$833, et 2,151 femmes avec une moyenne de \$317. La moyenne des salaires, par provinces, est ainsi représentée : Colombie-Britannique, \$1,120 par homme et \$495 par femme ; Manitoba, \$878 par homme et \$435 par femme ; Nouveau-Brunswick, \$721 par homme et \$230 par femme ; Nouvelle-Ecosse, \$638 par homme et \$273 par femme ; Ontario, \$845 par homme et \$324 par femme ; Ile du Prince-Edouard, \$361 par homme et \$121 par femme ; Québec, \$832 par homme et \$300 par femmes ; les territoires \$900 par homme et \$375 par femme. Cinquante pour cent de tous les officiers du sexe masculin et 51 pour cent du sexe féminin sont employés dans les établissements d'Ontario ; et du montant total payé en salaires aux officiers des deux sexes, 51 pour cent est payé aux hommes et 65 pour cent aux femmes dans cette province. Dans Québec la proportion des officiers salariés employés dans les établissements est de 33 pour cent pour les hommes et de 25 pour cent pour les femmes, et la proportion des salaires payés est de 34 pour cent pour les hommes et de 24 pour cent pour les femmes. D'après ces chiffres, 83 pour cent du total des hommes et 76 pour cent du total des femmes employés comme officiers salariés dans les établissements manufacturiers du Canada, appartiennent à ces deux provinces ; et, calculée sur le total des salaires payés aux employés des deux sexes pour administration, la proportion payée aux hommes est de 85 pour cent et celle payée aux femmes de 89 pour cent, dans ces deux provinces.

D'après le nombre total des officiers employés dans les établissements, les hommes comptent 87·70 pour cent et les femmes 12·30 pour cent, et d'après le total des salaires la proportion payée aux hommes est de 94·92 et celle payée aux femmes de 5·08 pour cent. Mais si l'on comprend les propriétaires et associés d'établissements avec tous les employés recevant des salaires, les hommes sont en proportion de 93 et les femmes de 7 pour cent, et d'après le total des salaires payés, les hommes ont reçu 97·12 et les femmes 2·88 pour cent.

### 3. EMPLOYÉS À GAGES.

Provinces.	Dans les établissements.						Hors des établissements.	
	Hommes de 16 ans et plus.	Gages.	Femmes de 16 ans et plus.	Gages.	Enfants au-dessous de 16 ans.	Gages.	Ouvriers à la pièce.	Gages.

Les employés à gages se divisent en trois classes, savoir : (1) les hommes âgés de 16 ans et au-dessus, (2) les femmes âgées de 16 ans et au-dessus, et (3) les enfants âgés de moins de 16 ans, et dans le tableau 3 ils sont aussi classifiés comme ouvriers travaillant dans des établissements et ouvriers à la pièce travaillant en dehors ; mais ce que gagnent ces derniers, de même que pour les premiers, est compté comme gages. Les ouvriers dans les établissements sont au nombre de 300,026, dont 226,663 hommes, 61,220 femmes et 12,143 enfants, tandis que ceux qui travaillent en dehors sont au nombre de 13,318, faisant un total de 313,344 ou une moyenne de 21 par établissement. Dans la Colombie-Britannique, la moyenne de toutes classes d'ouvriers par établissement est de 27, dans le Manitoba de 14, dans le Nouveau-Brunswick de 22, dans la Nouvelle-Ecosse de 18, dans l'Ontario de 23, dans l'Ile du Prince-Edouard de 10, dans Québec de 21 et dans les territoires de 10. La moyenne des gages payés aux ouvriers employés dans les établissements pour tout le Canada est de \$292, composée de \$334 pour les hommes, de \$176 pour les femmes et de \$106 pour les enfants, tandis que la moyenne des gages payés aux ouvriers à la pièce travaillant au dehors est de \$143 seulement. La moyenne des gages pour toutes les classes d'ouvriers dans la Colombie-Britannique est de \$418, dans le Manitoba de \$411, dans le Nouveau-Brunswick de \$229, dans la Nouvelle-Ecosse de \$209, dans l'Ontario de \$295, dans l'Ile du Prince-Edouard de \$99, dans Québec de \$285, et dans les territoires de \$351. Le tableau 4 montre la moyenne de

chacune des trois classes d'ouvriers employés au dedans des établissements, par provinces.

#### 4. MOYENNE DES GAGES DES OUVRIERS TRAVAILLANT AU DEDANS.

Provinces.	Hommes.	Femmes.	Enfants.
	\$	\$	\$
Colombie-Britannique.....	465	116	105
Manitoba.....	443	230	113
Nouveau-Brunswick.....	256	144	93
Nouvelle-Ecosse.....	254	103	60
Ontario.....	347	190	113
Ile du Prince-Edouard.....	140	45	32
Québec.....	330	187	114
Les Territoires.....	358	335	115

Les moyennes les plus élevées des gages pour les hommes se trouvent dans la Colombie-Britannique, le Manitoba et les Territoires, mais, comme il a déjà été démontré, c'est dans Ontario et Québec que se paient les sommes les plus considérables aux ouvriers. La moyenne pour les femmes est très élevée dans les Territoires (où elles sont pour la plupart employées dans des établissements de hardes pour hommes), et les moyennes pour les enfants, excepté dans les provinces maritimes, sont partout ailleurs à peu près les mêmes.

Mais une meilleure comparaison des gages payés aux ouvriers employés dans des établissements peut être obtenue en prenant le temps de travail et les gages pour établir les moyennes. Le tableau 5 montre le nombre collectif des jours de travail durant l'année du recensement pour les trois classes d'ouvriers employés : hommes âgés de 16 ans et au-dessus, femmes âgées de 16 ans et au-dessus et les enfants âgés de moins de 16 ans, et le tableau 3 donne les montants payés en gages à ces trois classes respectivement.

#### 5. DURÉE DU TRAVAIL DES EMPLOYÉS À GAGES.

Provinces.	Nombre collectif des jours de travail dans l'année.			Moyenne des heures de travail par semaine.
	Hommes de 16 ans et plus.	Femmes de 16 ans et plus.	Enfants au-dessous de 16 ans.	
Colombie-Britannique..	1,963,113	138,091	32,711	56·34
Manitoba.....	898,528	146,272	13,013	60·30

Ile du Prince-Edouard..	276,651	94,722	27,075	61·70
Québec.....	18,120,979	6,078,414	1,207,065	61·60
Les Territoires.....	199,811	3,508	4,149	60·80
Totaux... ..	55,454,024	15,482,934	2,800,441	56·70

La moyenne des gages par jour, pour les hommes employés dans tous les établissements industriels du Canada, est de \$1.36 ; pour les femmes, de \$0.69, et pour les enfants, de \$0.46. La moyenne des gages par jour pour chacune des trois classes d'ouvriers est donnée au tableau 6, par provinces.

6. MOYENNE DES GAGES PAR JOUR.

Provinces.	Hommes.	Femmes.	Enfants.
	\$	\$	\$
Columbia-Britannique.....	2.12	0.98	0.67
Manitoba.....	1.93	0.92	0.50
Nouveau-Brunswick.....	1.22	0.68	0.43
Nouvelle-Ecosse.....	1.23	0.60	0.42
Ontario.....	1.38	0.72	0.48
Ile du Prince-Edouard.....	0.99	5.50	0.40
Québec.....	1.29	0.66	0.44
Les Territoires.....	1.79	1.24	0.69

La plus haute moyenne des gages par jour pour les hommes se trouve dans la Colombie-Britannique, le Manitoba et les Territoires, et la plus basse dans l'Ile du Prince-Edouard ; la plus haute moyenne pour les femmes se trouve aussi dans la Colombie-Britannique, le Manitoba et les Territoires, et la plus basse dans la Nouvelle-Ecosse et l'Ile du Prince-Edouard ; la moyenne la plus élevée pour les enfants est dans les Territoires et la Colombie-Britannique, et la moins élevée dans l'Ile du Prince-Edouard, la Nouvelle-Ecosse et le Nouveau-Brunswick. Les moyennes dans Ontario et Québec se rapprochent de la moyenne générale du Canada.

La moyenne du temps de travail par semaine, telle que donnée au tableau 5, est de 56.70 heures, variant de 55.8 heures dans la Nouvelle-Ecosse, 56.34 dans la Colombie-Britannique, 57.7 dans le Nouveau-Brunswick, 59.2 dans Ontario, à 60.3 heures dans le Manitoba, 60.8 dans les Territoires, 61.6 dans Québec et 61.7 dans l'Ile du Prince-Edouard.

7. TOTAL DES EMPLOYÉS, SALAIRES ET GAGES.

Les Territoires .....	964	772	3,472	351	4,436	399

C'est encore dans la Colombie-Britannique que se trouve la moyenne la plus élevée des salaires par établissement et par employé. Ontario, Manitoba et Québec suivent dans l'ordre nommé pour les moyennes des salaires par établissement, et Québec, Manitoba et Ontario, dans l'ordre nommé, pour les moyennes des salaires par employé, tandis que la moyenne la moins élevée des salaires par établissement et par employé se trouve dans l'Ile du Prince-Edouard. La moyenne des gages est plus élevée dans la Colombie-Britannique suivie d'Ontario, Québec, Manitoba et le Nouveau-Brunswick, et la plus haute moyenne des gages par employé est dans la Colombie-Britannique avec Manitoba suivant de près et les Territoires, Ontario et Québec venant ensuite dans l'ordre nommé.

9. TEMPS DE TRAVAIL DES ÉTABLISSEMENTS DANS L'ANNÉE.

Provinces.	Établissements.	Temps complet.	Trois-quarts du temps.	Moitié du temps.	Quart du temps.	Non donné.
	No.	No.	No.	No.	No.	No.
Colombie-Britannique..	392	227	39	57	44	25
Manitoba .....	324	134	31	84	24	51
Nouveau-Brunswick....	919	324	92	216	265	22
Nouvelle-Ecosse.....	1,188	349	141	320	358	20

Totaux.....	14,650	6,328	1,277	4,778	1,506	761

La durée du temps de travail dans les établissements est donnée au tableau 9, classée en temps complet, les trois-quarts du temps, la moitié du temps et le quart du temps. En laissant de côté 761 établissements, ou cinq pour cent du total, pour lesquels aucun rapport n'a été fait du temps d'opération durant l'année du recensement, il y avait 43 pour cent des 14,650 établissements qui travaillaient toute l'année, 9 pour cent les trois-quarts du temps ou neuf mois, 33 pour cent la moitié du temps ou six mois et 10 pour cent le quart du temps ou trois mois. Le nombre élevé des établissements travaillant la moitié du temps comprend les fabriques de beurre et de fromage qui sont principalement en opération durant la saison des pacages. On comprendra cependant que le temps de travail donné n'est pas une période positive. Par exemple la moitié du temps signifie une période de moins de neuf mois mais non de six. Dans la Colombie-Britannique 58 pour cent de tous les établissements travaillent le temps complet, dans Ontario 51 pour cent et dans Québec 39 pour cent; mais dans Ontario 26 pour cent et dans Québec 47 pour cent de toutes les fabriques ont été entrées comme appartenant à la période de six mois ou la moitié du temps, et dans ces provinces la fabrication du beurre et du fromage est une des industries les plus importantes.

DÉPENSES DIVERSES, MATÉRIAUX ET PRODUITS.

Les dépenses diverses des établissements manufacturiers sont indiquées au tableau 10. Elles comprennent (1) le loyer des usines; (2) le loyer de la force motrice et du chauffage; (3) le coût du combustible et de l'éclairage; (4) les taxes municipales; (5) les taxes provinciales; (6) le loyer des bureaux, les intérêts, les assurances, les taxes du revenu interne, etc., et (7) le montant payé pour l'ouvrage fait à l'entreprise. Le montant collectif de ces dépenses s'élève à \$24,688,837 dont la moitié à peu près est dans le sixième item.

10. DÉPENSES DIVERSES.

Provinces.	Loyer des usines.	Loyer de la force motrice et du chauffage.	Combustible et éclairage.	Taxes municipales.	Taxes provinciales.	Loyer des bureaux, intérêt, etc.	Montant payé pour ouvrage fait à l'entreprise.
	\$	\$	\$	\$	\$	\$	\$

Ile du P.-Edouard..	1,044,515	274,843	1,319,058	2,268,918	57,790	2,326,708
Québec .....	39,068,433	47,611,346	86,679,779	152,611,148	5,676,846	158,287,994
Les Territoires .....	792,731	328,611	1,121,342	1,937,510	27,477	1,964,987
Totaux .....	149,508,062	117,019,796	266,527,858	469,258,351	11,795,024	481,053,375

Les produits des établissements sont indiqués sous les en-têtes des articles manufacturés et ceux d'ouvrage de commande et réparations, la valeur des premiers étant de \$469.258,351 et celle des derniers de \$11,795,024, ou un total de \$481,053,375.

Relativement aux manufactures de tout le Canada, la proportion de la Colombie-Britannique est de 4.04 pour cent, celle de Manitoba de 2.69 pour cent, celle du Nouveau-Brunswick de 4.36 pour cent, celle de la Nouvelle-Ecosse de 4.90 pour cent, celle d'Ontario de 50.22 pour cent, celle de l'Ile du Prince-Edouard de 0.48 pour cent, celle de Québec de 32.90 pour cent, et celle des Territoires de 0.41 pour cent; et malgré que les moyennes les plus élevées des produits par établissement se trouvent dans la Colombie-Britannique et le Manitoba, les provinces d'Ontario et de Québec montrent qu'elles ont 83.12 pour cent de la valeur totale des produits.

Pour comparer avec plus de facilité les statistiques les plus importantes des manufactures par provinces, le capital total placé dans les établissements, le coût des salaires et des gages, les dépenses diverses, les matériaux et la valeur des produits, ainsi que les moyennes par établissement, sont donnés ensemble au tableau 12.

Le coût des salaires et des gages, des dépenses diverses et des matériaux est de 70.4 pour cent de la valeur des produits dans la Colombie-Britannique, de 86.6 pour cent dans le Manitoba, de 83 pour cent dans le Nouveau-Brunswick, de 84 pour cent dans la Nouvelle-Ecosse, de 85 pour cent dans l'Ontario, de 81 pour cent dans l'Ile du Prince-Edouard, de 84.3 pour cent dans Québec et de 85.66 pour cent dans les Territoires, et pour tout le Canada, de 84 pour cent. Ces chiffres indiquent que la marge la plus large des profits est dans la Colombie-Britannique, où le coût des salaires et gages, de dépenses diverses et des matériaux est de 13.6 pour cent moindre que les moyennes pour le Canada, et de 15.26 pour cent moindre que dans les Territoires où la marge est la moins large.

12. STATISTIQUES PRINCIPALES DES MANUFACTURES.

Provinces.	Capital fixe et actif.	Salaires et gages.	Dépenses diverses.	Coût des matériaux.	Valeur des produits.

Moyennes des totaux..	30,506	7,730	1,685	18,193	32,836

La valeur relative des produits à celle du capital fixe et actif est aussi un sujet de comparaison intéressant. Elle est de 85 pour 100 dans la Colombie-Britannique, de 171.46 dans le Manitoba, de 101.11 dans le Nouveau-Brunswick, de 68.21 dans la Nouvelle-Ecosse, de 112.37 dans l'Ontario, de 111.76 dans l'Ile du Prince-Edouard, de 111.15 dans Québec et de 116.28 dans les Territoires, tandis que la moyenne pour le Canada est de 107.64 pour 100.

La valeur des produits moins le coût de la production compris sous les en-têtes de salaires et gages, dépenses diverses et matériaux est de 25 pour 100 de la valeur du capital engagé dans les manufactures de la Colombie-Britannique, de 23 pour 100 dans celles du Manitoba, de 17 pour 100 dans celles du Nouveau-Brunswick, de 11 pour 100 dans celles de la Nouvelle-Ecosse, de 17 pour 100 dans celles d'Ontario, de 21 pour 100 dans celles de l'Ile du Prince-Edouard, de 17 pour 100 dans celles de Québec et des Territoires et dans celles de tout le Canada de 17 pour 100. Le pourcentage peu élevé de la Nouvelle-Ecosse est dû au fait que le capital dans cette province comprend des placements considérables dans les établissements de fer et d'acier qui commençaient seulement à devenir productifs durant l'année du recensement.

Les pourcentages donnés plus haut ne doivent pas cependant être considérés comme représentant les profits des industries manufacturières de ce pays, vu qu'il y a une foule

de petites dépenses diverses qui n'ont pu être recueillies dans les tableaux du recensement.

### POUVOIR MÉCANIQUE.

La force motrice employée dans les établissements manufacturiers est principalement la vapeur, le gaz et la gazoline, l'eau et l'électricité, dont les chiffres sont donnés au tableau 13.

### 13. POUVOIR EMPLOYÉ DANS LES MANUFACTURES.

Provinces.	Machines à vapeur.		Machines à gaz et à gazoline.		Roues hydrauliques.

Le nombre d'établissements ayant fait rapport de force mécanique est de 6,620, soit 45.3 pour cent des 14,650 établissements dont les statistiques sont données dans les tableaux de ce rapport. Dans les autres 8,030 établissements sont compris 3,576 fabriques de beurre et de fromage et 573 établissements de brique, tuile et poterie dont les formulaires spéciaux ne contenaient pas de colonne pour la force mécanique en usage, et le reste consiste principalement en établissements dans lesquels la force mécanique est rarement employée, tels que boutiques de cordonnerie, boulangeries, carrosseries,

fabriques de cigares, fabriques de vêtements, etc., mais dans certains cas l'entrée de la force mécanique dans les formules ou tableaux a été omise.

Le volume total de la force motrice employée dans les manufactures s'élève à 652,653 chevaux-vapeur et elle est développée par 11,770 pouvoirs de différentes espèces, —machines à vapeur, roues hydrauliques, moteurs, etc. Le nombre d'établissements ayant fait rapport de force mécanique, la quantité de force exprimée en chevaux-vapeur, et la force motrice moyenne par établissement sont donnés au tableau 14, par provinces.

14. CHEVAUX-VAPEUR, TOTAUX ET MOYENNES.

Provinces.	Etablissements.	Chevaux-vapeur.	Moyenne de ch. v. par établissement.
	No.	No.	No.
Colombie-Britannique.....	237	23,646	99·8

Totaux.....	6,620	652,653	98·6

La plus haute moyenne de la force motrice en chevaux-vapeur employée par établissement se trouve dans Québec, la plus haute ensuite dans la Nouvelle-Ecosse et la plus basse dans l'Ile du Prince-Edouard. Dans la Colombie-Britannique 60 pour cent de tous les établissements ont fait rapport de l'emploi de la force motrice, dans le Manitoba 47 pour cent, dans le Nouveau-Brunswick 51·5 pour cent, dans la Nouvelle-Ecosse 41·5 pour cent, dans Ontario 53 pour cent, dans l'Ile du Prince-Edouard 15·6 pour cent, dans Québec 34·9 pour cent et dans les Territoires 51·4 pour cent. La moyenne de la force motrice employée par établissement dans le Canada est de 98·6 chevaux-vapeur, et aux Etats-Unis, d'après le rapport du dernier recensement (1900) elle était de 66·7 chevaux-vapeur.

Le tableau 15 donne les statistiques des différentes classes de pouvoirs mécaniques employés, montrant le nombre et la force de chaque classe, ainsi que le pourcentage calculé sur le total de toutes les classes.

Comparée aux chiffres du dernier recensement américain, la proportion des machines à vapeur à celle de tous les autres pouvoirs mécaniques employés est de 58·26 cent au Canada et de 77·40 pour cent aux Etats-Unis, celle des machines à gaz de 0·32 et 1·30 pour cent, celle des roues hydrauliques de 33·96 et 15·30 pour cent, celle des moteurs électriques de 7·12 et 2·80 pour cent, et celle des autres pouvoirs de 0·34 et 0·50 pour cent respectivement.

La proportion des établissements ayant fait rapport de pouvoir aux Etats-Unis est de 31·1 pour cent et au Canada de 45·2 pour cent.

## GROUPES D'INDUSTRIES.

Les rapports de 14,650 établissements manufacturiers ont été compilés pour établir les statistiques de chaque espèce ou classe d'industrie au Canada ; mais dans les cas où moins de trois rapports ont été faits pour une même industrie les chiffres appartenant à cette industrie ont été mis dans la classe de "autres industries", de manière que les chiffres d'aucun établissement en particulier ne puissent être publiés ni connus des compétiteurs dans une même ligne d'affaire.

Il y a en tout dans le pays 264 espèces d'industries, sans compter les différentes productions d'un même établissement comme une industrie séparée, mais en prenant seulement la principale comme les représentant toutes. De ce chiffre 179 sont nommées dans les tableaux, représentant chacune les statistiques de trois ou plus du total des 14,544 établissements. Les statistiques de 106 établissements sont données dans les 85 "autres industries" comprenant 21 espèces d'industries de deux établissements chacune et 64 de un chacune.

Une autre classification est donnée au tableau 16 par groupes d'industries, chaque groupe comprenant les statistiques des industries de même nature dans le tableau général. Il y a en tout 14 groupes d'industries désignées et un groupe de "Diverses industries."

Le manger, l'habillement et le logement sont les trois principales nécessités de l'homme, et les groupes les plus importants des industries du pays sont naturellement ceux qui concernent ces besoins. Les produits alimentaires occupent la première place, et les établissements employés dans cette ligne d'industrie sont de 38 pour cent du total. Les matériaux de production dans ce groupe coûtent 37 pour cent de tous les matériaux employés dans les manufactures, et la valeur de leurs produits s'élève à 26 pour cent de celle des produits de toutes les industries. Le bois sert à divers emplois en dehors des constructions de toutes sortes, et tandis qu'en nombre d'établissements, coût des matériaux et valeur des produits ce groupe d'industries occupe la seconde place, il ne peut être démon-

tré d'après les données fournies qu'il doive ce rang à la production des matériaux de construction seulement. Le groupe des tissus est le troisième en nombre d'établissements et en valeur des produits, suivi à un long intervalle des groupes des produits du fer et de l'acier et du cuir et ses produits finis d'une valeur presque égale. Trois groupes d'industries dont les valeurs varient dans les environs de \$20,000,000, sont la papeterie et l'imprimerie, les métaux et produits des métaux autres que l'acier, et les voitures pour transport sur terre. Les groupes des produits chimiques et du tabac indiquent des produits dépassant \$11,000,000 en valeur, et trois autres groupes (liqueurs et breuvages, produits de l'argile, du verre et de la pierre, et vaisseaux pour transport par eau) varient de \$9,000,000 à \$2,000,000. Seul le groupe des industries manuelles tombe en valeur de production à au-dessous de \$1,000,000.

Le tableau 17 indique les moyennes par établissement du capital, des employés, des gages, du coût des matériaux et de la valeur des produits pour chacun des différents groupes d'industries. Le groupe ayant la plus haute moyenne de capital par établissement est celui des liqueurs et breuvages, suivi de près par celui des industries diverses.

Les groupes des produits alimentaires, du bois, de l'argile, du verre et de la pierre, et celui des industries manuelles sont seuls au-dessous de la moyenne du capital par toutes les industries. La moyenne la plus basse des employés par établissement se trouve dans les groupes des produits alimentaires, de l'argile, du verre et de la pierre, et la plus élevée dans ceux des produits du fer et de l'acier, des vaisseaux pour transport par eau

## 17. MOYENNE DES GROUPES D'INDUSTRIES PAR ÉTABLISSEMENT.

Groupes d'industries.		Capital.	Employés.	Gages pour travail.	Coût des matériaux.	Valeur des produits.

12	Voitures pour transport sur terre...	37,634	35.0	14,656	24,928	48,992
13	Vaisseaux pour transport par eau...	57,858	45.4	14,235	18,087	35,964
14	Industries manuelles.....	13,630	13.5	5,517	8,004	12,318
15	Industries diverses.....	108,401	32.0	12,887	27,115	61,181
	Moyennes de tous les groupes..	30,506	21.4	6,114	18,193	32,636

Et du cuir ; tandis que la plus haute moyenne des gages pour le travail par établissement se trouve dans les groupes des produits du fer et de l'acier, des voitures pour le transport sur terre et des vaisseaux pour le transport par eau, la plus basse se trouve dans ceux des produits alimentaires, de l'argile, du verre et de la pierre, et dans celui des industries manuelles. Le groupe des produits chimiques, contrairement à l'idée populaire, représente la plus haute moyenne par établissement pour le coût des matériaux, suivi de près par le groupe du cuir, et la plus basse moyenne pour le coût des matériaux se trouvent dans les groupes de l'argile, du verre et de la pierre et dans celui des industries manuelles. Quatre groupes d'industries seulement montrent des moyennes dans la valeur des produits par établissement au-dessous de la moyenne générale, à savoir : les groupes de l'argile, du verre et de la pierre, des industries manuelles, des produits alimentaires et du bois. La plus haute valeur des produits par établissement se trouve dans le groupe des produits chimiques s'élevant à \$89,354, le groupe du cuir venant ensuite avec \$80,558 et celui du tabac avec \$73,763.

Les statistiques du tableau 18 représentent les établissements employant pas moins de cinq personnes, excepté dans le cas des fabriques de beurre et de fromage, qui, selon les instructions données aux énumérateurs, ont été prises sans cette limitation. C'est ainsi qu'il n'a été inévitablement tenu compte d'une partie considérable des produits du pays dans des industries telles que les boulangeries, les moulins à farine, où généralement le nombre d'employés dans une boutique ou un moulin ne dépasse pas deux ou trois, et bien souvent, pour les boulangeries, se borne à un. Malgré cela les produits

des boulangeries et des établissements de biscuits et de confiseries employant cinq personnes et plus s'élèvent à \$11,637,808, et ceux des moulins à farine à \$31,835,873.

18. GROUPE I: PRODUITS ALIMENTAIRES.

Tous autres aliments.....	17	937,753	334	108,135	2,015,692	2,439,611
Totaux.....	5,594	57,167,466	42,401	8,032,580	99,138,140	125,202,620

Deux autres industries de ce groupe montrent des chiffres élevés dans la valeur des produits, beurre et fromage \$29,462,402, et abattoirs et salaisons de viandes \$22,217,984. Ces industries, de même que les moulins à farine, sont intimement liées à l'industrie agricole qui leur fournit la matière première. La valeur totale de leurs produits s'élève à \$83,516,259, tandis que la valeur des matériaux employés est de \$71,173,295, ou 83 pour cent du total des produits. La moyenne du capital des 5,594 établissements composant ce groupe est de \$10,219, la moyenne des gages par employé de \$189.44, et la proportion des gages par rapport à la valeur des produits de 6.42 pour cent. La moyenne du coût des matériaux par établissement est de \$17,722 et la moyenne de la valeur des produits de \$22,382, la moyenne des valeurs la plus élevée par établissement étant celle de l'industrie des raffineries de sucre, \$3,148,750, et en second lieu celle des abattoirs et salaisons de viandes, \$389,789. Les plus hautes moyennes des gages payés aux employés se trouvent dans l'industrie des enveloppes à saucisson, \$600, dans les abattoirs, \$583.33, et dans les raffineries de sucre, \$510.57; mais dans la première de ces industries la proportion des gages par rapport à la valeur des produits est de 2.50 pour cent, dans la deuxième de 1.35 et dans la dernière de 4.86 pour cent. Dans l'industrie du pain, des biscuits et des confiseries, ayant une moyenne des gages payés de \$408.56, la proportion des gages par rapport à la valeur des produits est de 15.53 pour cent; et dans l'industrie des fruits évaporés et des légumes, ayant une moyenne des gages payés de \$68.33 seulement, la proportion est de 26.35 pour cent.

Le groupe des produits alimentaires comprend 27 espèces d'industries dont 13 se trouvent comprises dans la classe de "tous autres aliments," savoir : gomme à mâcher, articles de confiseries, cottolène, œufs concentrés, macaroni et vermicelle, maïs crevé, fromage préparé, farine préparée, nettoyage du riz, enveloppes à saucisson, abattoirs non compris dans les salaisons de viandes, suif raffiné et levain.

## 19. GROUPE II : INDUSTRIES TEXTILES.

Nom ou sorte d'industrie.	Eta- blisse- ments	Capital.	Em- ployés. à gages.	Montant payé pour travail à gages.	Coût des matières em- ployées.	Valeur des produits.

Le groupe des industries textiles comprend principalement la laine, le coton et les industries du lin, et en sus des 23 espèces d'industries spécifiées dans le tableau la classe de "Toutes autres" comprend 12 établissements représentant huit autres industries : couvertures, déchets de laine et de coton, broderies, dentelles et tresses, effets piqués, insignes et emblèmes, soie et effets en soie, et fil. La valeur moyenne du capital par établissement est de \$35,989, des matériaux employés de \$20,734 et des produits de \$40,217; la moyenne des ouvriers est de 38 et celle des gages payés de \$9,101 par établissement, tandis que la moyenne des gages par ouvrier est de \$238.77, ce qui représente 22.63 pour cent de la valeur des produits. L'industrie la plus consi-

dérable de ce groupe est celle du coton qui compte 20 fabriques en opération. La moyenne du capital dans ces fabriques est de \$914,935, celle du coût des matériaux de \$291,363, et celle de la valeur des produits de \$601,653. Les ouvriers sont au nombre de 594 par fabrique et les gages payés s'élèvent à \$167,623. La proportion des gages payés par rapport à la valeur des produits est de 27·86 pour cent et la moyenne des gages par ouvrier est de \$282.14. L'industrie la plus considérable venant en second lieu est celle des lainages qui emploie 6,388 personnes avec une moyenne de \$10.983 par fabrique pour gages payés et de \$269.93 par ouvrier. La moyenne du capital par fabrique est de \$66,791, celle du coût des matériaux de \$24,200, et celle de la valeur des produits de \$46,876. La valeur totale des industries d'habillements (pour hommes et femmes) pour ouvrage de fabrique et de commande s'élève à \$24,314,937, soit une moyenne de \$21,088 par établissement. Le nombre total des établissements employant cinq personnes et plus est de 1,153, dont 1,069 sont des boutiques et 84 des fabriques. Le capital collectif est de \$12,807,542, avec une moyenne de \$7,400 pour les boutiques et de \$58,277 pour les fabriques. Les boutiques emploient 13,775 personnes ou une moyenne de 12·8 par boutique, à des gages d'une moyenne de \$3,305 par boutique ; et les fabriques emploient 15,215 personnes ou une moyenne de 181 par fabrique, à des gages d'une moyenne de \$31,007 par fabrique. Les trois industries d'articles de toilette pour hommes, de chapellerie et pelleterie et de bonneterie, emploient 11,936 personnes à des gages de \$2,842,988, ou une moyenne de 54·5 travailleurs et de \$12,982 pour gages payés par établissement.

Le tableau 20 représente le groupe des industries du fer et de l'acier, comprenant, en sus des 17 espèces d'industries nommées dans le tableau, les roues de wagons, les chaînes, les machines à tricoter, les aiguilles à tricoter, les aiguilles, les patins, les étampes et patrons sous l'en-tête de "toutes autres industries." Le groupe se trouve conséquemment composé de 25 espèces d'industries, et le nombre d'établissements séparés est de 517. La moyenne du capital par établissement est de \$79,035, celle du coût des matériaux de \$28,659, et celle de la valeur des produits de \$67,463. La moyenne des ouvriers est de 47.9 et celle des gages payés de \$19,045 par établissement. L'industrie la plus importante du groupe est la manufacture de fournaies, tuyaux en fer, machines de toutes espèces, radiateurs et poêles, classifiée dans le tableau comme produits des fonderies. Il y a en tout 315 établissements avec une moyenne de \$51,665 pour le capital, employant 11,784 ouvriers à une moyenne de \$390.71, et avec une moyenne de \$18,547 par établissement pour les produits. La seconde industrie en importance se trouve comprise sous l'en-tête des produits du fer et de l'acier, comprenant les vis et écrous, fer et acier battus, pentures, clous et broquettes, rivets et fiches et

produits des laminoirs. La moyenne du capital par établissement est de \$338,950, la moyenne des ouvriers de 142 et la moyenne des produits de \$238,360. La plus haute moyenne des gages est payée par les fabricants de coffres-forts et voûtes, \$450,63, la deuxième par les fabricants de machines à tricoter, \$449.70 et la troisième par les fabricants de machines à coudre, \$445,51 ; tandis que la plus basse est payée par les fabricants de quincaillerie, \$272,38. L'industrie de la fabrication des aiguilles, en proportion des gages relativement à la valeur des produits, est la plus élevée, étant de 55.50 pour cent. Viennent ensuite la fabrication des aiguilles à tricoter avec une proportion de 45 pour cent, la fabrication de la coutellerie et des outils avec une proportion de 44.70 pour cent, la fabrication des machines à coudre avec une proportion de 36.65 pour cent et la fabrication des haches et outils avec une proportion de 36.41 pour cent, cette dernière industrie comprenant les limes, les fourches, les couteaux mécaniques, les pelles et les bèches. L'industrie ayant la proportion la plus basse des gages, par rapport à la valeur des produits est celle du fil de fer, dans laquelle elle n'est que de 10.73 pour cent seulement.

Les bois et leurs diverses transformations constituent le quatrième groupe d'industries, dans le tableau 21, et les statistiques qui y sont données représentent 3,034 établissements appartenant à 25 espèces d'industries. Six de ces industries sont classifiées sous l'en-tête "Toutes autres industries" : balais mécaniques, charbon de bois, presses à cidre, vitrines, rouets et articles en bois.

La moyenne du capital placé dans les 3,034 établissements est de \$29,650, celle des matériaux employés de \$12,883 et celle des produits de \$23,480. La moyenne des ouvriers est de 25 et le coût des gages de \$6,251 par établissement, tandis que la moyenne des gages par ouvrier est de \$250.53. Les industries principales de ce groupe sont la pulpe de bois, les meubles et les produits des billots et du bois de construction. La pulpe de bois comprend les produits chimiques et mécaniques, dont la moyenne des produits pour les 25 établissements en opération durant l'année de recensement, est de \$169,871, celle des gages par établissement de \$42,610, celle des ouvriers de 127 et celle des gages par ouvrier de \$335.30. L'industrie des meubles dépasse en valeur des produits celle de la pulpe de bois de \$2,702,603, mais la moyenne par établissement est moindre d'un quart, soit \$41,121. La moyenne des gages par établissement est de \$12,239 et celle des ouvriers de 39, tandis que la moyenne des gages par ouvrier est de \$314.20. Les industries montrant les gages les plus élevés par ouvrier sont celles des manufactures de vitrines, \$477.60, des tables de billard et matériaux, \$471.43 et des balayeuses mécaniques, \$423.50, tandis que les industries montrant le taux le plus élevé des gages par rapport à la valeur des produits se trouvent dans la fabrication des paniers, 38.90 pour 100, des rouets 33.68 pour 100, et dans la tonnellerie, 32.01 pour 100. Dans les industries montrant la plus haute valeur des produits et le coût le plus élevé des gages, la proportion des gages par rapport à la valeur des produits est de 30.10 pour 100 dans les produits des fonderies, de 24.49 pour 100 dans les produits du fer et de l'acier et de 33.83 pour 100 dans les bouilloires et machines.

Le cinquième groupe d'industries donnant les statistiques du cuir et ses produits finis comprend cinq espèces d'industries et représente 431 établissements. Les principales espèces d'industries sont les chaussures en cuir de toute description, en caoutchouc, en feutre et en drap, et le cuir tanné, corroyé et fini. La valeur moyenne du capital engagé dans toutes ces industries est de \$19,737 par établissement et celle des produits de

## 22. GROUPE V : CUIR ET SES PRODUITS FINIS.

Nom ou sorte d'industrie.	Etablissements	Capital.	Em-ployés à gages.	Montant payé pour travail à gages.	Coût des matières employées.	Valeur des produits.
	NO.	\$	NO.	\$	\$	\$
Chaussures .....	179	11,005,869	12,949	3,935,448	10,993,979	18,481,216

\$80,558. La moyenne du coût des matériaux est de \$50,408 par établissement et celle des gages payés de \$14,016, tandis que la moyenne des ouvriers est de 44.6. La moyenne la plus élevée des gages payés par établissement est dans l'industrie des chaussures, \$21,986, qui compte aussi les produits les plus élevés par établissement, \$103,247. La moyenne du coût des gages dans la manufacture du cuir est de \$8,827, et celle de la valeur des produits de \$84,396 par établissement. La production des courroies et tuyaux en cuir est de \$102,179 par établissement, mais la valeur totale des articles est moins de 3 pour 100 de celle du cuir. Dans l'industrie des selleries le coût des gages est de \$7,566 et la valeur des produits de \$36,076 par établissement. La plus haute moyenne des gages par ouvrier se trouve dans l'industrie des courroies et tuyaux, \$428.39, mais la proportion des gages par rapport à la valeur des produits est la moins élevée, soit 8.49 pour 100. La plus haute moyenne des gages par ouvrier venant ensuite est dans les tanneries, \$349.96, et la proportion par rapport à la valeur des produits est seulement de 10.46 pour 100. Dans l'industrie des selleries la moyenne des gages est de \$332.61 et leur proportion par rapport aux produits de 20.98 pour 100, et dans l'industrie des chaussures la moyenne des gages est de \$303.92 et leur proportion par rapport aux produits de 21.30 pour 100.

Le groupe des industries de papeterie et imprimerie comprend 592 établissements, et en sus des huit sortes d'industries nommées dans le tableau 23, il y en a quatre autres qui sont comprises dans les " toutes autres industries," savoir : feutre (papier) et pulpe, papier à mouches, fournitures d'écoles et papier ciré. La valeur moyenne du capital engagé dans toutes les industries de ce groupe est de \$45,308 par établissement et la valeur moyenne des produits de \$34,887. Le coût des matériaux est de \$12,371 par établissement et celui des gages de \$9,610. La moyenne des gages par ouvrier pour toutes les industries est de \$369.12, les plus élevés étant payés par les établissements de stéréotypie et électrotypie, \$572, les établissements d'imprimerie venant ensuite avec \$424.25. La proportion la plus élevée des gages par rapport à la valeur des produits appartient aussi à ces industries, soit 31.76 pour cent dans la première et 31.69 pour cent dans la dernière. L'industrie montrant la plus grande valeur des produits par établissement est celle de la fabrication du papier, \$156,456, c'est aussi dans cette industrie que se trouve la moyenne la plus élevée des gages par établissement, \$34,124 ; mais la moyenne des gages par ouvrier vient en quatrième lieu soit \$349.99, et la proportion des gages par rapport aux produits est seulement de \$21.81 pour cent. En prenant les quatre principales industries de ce groupe, dans lesquelles la production dépasse \$1,000,000, celle de l'imprimerie et publications avec un total de production de \$10,319,241 donne une moyenne de \$24,628 par établissement, avec une moyenne pour le coût des gages de \$7,804 et une proportion des gages par rapport à la valeur des produits de 31.69 pour cent ; celle du papier ayant une production totale de \$4,380,776, une moyenne des produits de \$156,456, une moyenne des gages de \$34,124 et une proportion des gages par rapport à la valeur des produits de 21.81 pour cent ; celle de l'imprimerie et reliure ayant une production totale de \$2,748,356, une moyenne des produits de \$32,719, une moyenne des gages de \$10,063 et une proportion des gages par rapport à la valeur des produits de 30.71 pour cent ; et celle des boîtes et sacs en papier ayant une production totale de \$1,256,147, une moyenne des produits de \$36,946, une moyenne des gages de \$8,868, et une proportion des gages par rapport à la valeur des produits de 24 pour cent. Trois des industries montrent une valeur des produits plus élevée que celle du capital engagé, à savoir boîtes et sacs en papier, articles de librairie, stéréotypie et électrotypie, et dans la première la proportion des produits par rapport au capital est de 223 pour cent. Dans les trois plus grandes industries—papier, imprimerie et reliure et imprimerie et publications—la valeur des produits est de 72.5 pour cent de celle du capital.

24. GROUPE VII : LIQUEURS ET BREUVAGES.

Le tableau 24 représente le groupe d'industries des liqueurs et breuvages et comprend cinq espèces d'industries et 183 établissements dont les plus importants sont les liqueurs (malt) et les liqueurs distillées. Les valeurs de ces produits sont calculées sur le prix de vente aux établissements, les droits d'accise non compris, et par conséquent bien au-dessous des valeurs commerciales pour consommation. La moyenne par établissement pour toutes les industries est de \$50,828 et la moyenne du capital engagé de \$111,843. Le nombre d'ouvriers employés par établissement s'élève 17.5, la moyenne des gages est de \$6,944 et celle du coût des matériaux de \$17,446. La moyenne des gages par ouvrier est de \$396.12 et la proportion des gages par rapport à la valeur des produits de 13.83 pour cent. Dans l'industrie des liqueurs distillées la moyenne des gages par ouvrier est de \$423.67, et la valeur des produits par établissement de \$180,046, et la proportion des gages par rapport à la valeur des produits de 13.22 pour cent. L'industrie des liqueurs (malt), employant 1,977 ouvriers produit \$64,628 par établissement, la moyenne des gages par ouvrier est de \$413.43 et la proportion des gages par rapport à la valeur des produits est de 13.17 pour cent. L'industrie des eaux gazeuses et minérales emploie en moyenne 9 ouvriers par établissement à des gages moyennes de \$348.13, la valeur des produits par établissement est de \$13,906, et la proportion des gages par rapport à la valeur des produits de 23.01 pour cent. Dans la production des liqueurs vineuses les ouvriers sont employés seulement une partie de l'année et la moyenne des gages est la plus basse de toutes les industries de ce groupe, soit \$268.96, et la proportion des gages par rapport à la valeur des produits est de 11.62 pour cent. La moyenne du capital engagé par établissement est de \$38,147, celle du coût des matériaux de \$3,334 et celle de la valeur des produits de \$13,906.

Le groupe des produits chimiques se compose de huit classes d'industries spécifiées dans le tableau 25, et de huit autres industries d'un établissement chacune, à savoir : albâtre, extrait d'écorce, poudre à blanchir, teintures et couleurs, poudre insecticide, opium, vaccin et vaseline. Il y a en tout 128 établissements dans ce groupe avec un capital moyen de \$80,256 par établissement, une moyenne des ouvriers de 22.4, une

moyenne des gages de \$8,109, une moyenne du coût des matériaux de \$51,825 et une moyenne de la valeur des produits de \$89,354. La moyenne des gages par ouvrier pour toutes les industries est de \$361.90, et la proportion des gages par rapport à la valeur des produits de 9.08 pour cent. La manufacture des huiles est la principale industrie de ce groupe, le montant collectif de ses produits étant de \$3,519,493 et la moyenne par établissement de \$251,392. La moyenne des gages payés par établissement est de \$17,928 et par ouvrier de \$416.24, et la proportion des gages par rapport à la valeur des produits est de 7.13 pour cent. L'industrie venant en second lieu est celle des peintures et vernis dont le total des produits s'élève à \$2,786,593, avec une moyenne de \$154,811 par établissement. La moyenne des gages par établissement est de \$9,833 et de \$378.18 par ouvrier, tandis que la proportion des gages par rapport à la valeur des produits est de 6.35 pour cent. Les drogues et les remèdes patentés sont à peu près également partagés quant à la valeur des produits, les premières étant de \$1,380,905 et les derniers de \$1,350,993. Mais la valeur moyenne des produits des drogues s'élève à \$72,679 par établissement et celle des remèdes patentés à \$38,600, et la moyenne des gages par ouvrier est de \$379.81 pour les premiers et de \$278.79 pour les derniers. Quant à la proportion des gages par rapport à la valeur des produits ils sont comme 14.41 à 8.71 pour cent. La moyenne la plus élevée des gages par ouvrier dans ce groupe d'industries appartient à celle des matières explosives, \$515.71 et la plus basse à celle de la production du vaccin \$150, mais cette dernière nommée indique une plus grande proportion des gages par rapport à la valeur des produits qu'aucune autre industrie de ce groupe, soit 60 pour cent.

26. GROUPE IX : PRODUITS DE L'ARGILE, DU VERRE ET DE LA PIERRE.

Totaux.....	855	8,697,716	10,765	2,771,142	997,754	7,318,582

Le groupe des produits de l'argile, du verre et des carrières de pierre comprend 15 espèces d'industries dont 11 sont spécifiées dans le tableau 26. Les quatre autres con-

sistent en un établissement de décoration de porcelaine et de verre, un de manteaux et grilles de cheminées et deux d'ornements d'églises. Le nombre total des établissements de ce groupe s'élève à 855, dont 573 sont des briqueteries, tuileries et poteries, 163 des fours à chaux, et 65 des établissements pour la production des monuments et des pierres tombales. La valeur des produits par établissement dans ce groupe est de \$8,560 et la moyenne des gages est de \$3,241, avec une proportion des gages par rapport à la valeur des produits de 37·86 pour cent. Le coût des matériaux relativement à la valeur des produits est peu élevé, seulement de 13·63 pour cent, dû au fait qu'aucune valeur n'est donnée aux matériaux d'argile et de pierre calcaire et que les briqueteries, tuileries et poteries ainsi que les fours à chaux sont les industries les plus importantes de ce groupe. Au delà d'une moitié de tous les ouvriers appartenant à ce groupe sont employés dans les briqueteries, tuileries et poteries qui paient aussi tout près d'une moitié des gages. Mais dans plusieurs autres industries les moyennes des gages et de la valeur des produits par établissement sont beaucoup plus élevées. Le coût des gages par établissement dans la manufacture du ciment de Portland est de \$26,290, dans les verreries \$45,717 et dans les miroirs et glaces \$13,980, contre \$2,317 dans les briqueteries, tuileries et poteries; et tandis que dans ces dernières la valeur des produits par établissement est seulement de \$5,759, elle s'élève dans les premières à \$109,411 pour le ciment de Portland, à \$90,491 pour les verreries et à \$66,384 pour les miroirs et glaces. La moyenne du capital par établissement est de \$10,173, et la valeur des produits est de 84·14 pour cent du capital.

27. GROUPE X: MÉTAUX ET PRODUITS DES MÉTAUX AUTRES QUE L'ACIER.

Les industries des métaux et produits des métaux autres que l'acier sont groupées dans le tableau 27. Elles consistent dans les dix espèces d'industries nommées dans le tableau, ainsi que sept autres établissements dont un faisant des freins à air, un du métal babbitt, un des séparateurs à crème, un de l'or en feuilles et étain, un des moteurs-vaporisateurs, et deux des lanternes et des caractères d'imprimerie. Le nombre total d'établissements dans ce groupe est de 363, ayant une moyenne par établissement de \$56,150,

pour le capital, de \$10,713 pour les gages et de \$53,888 pour les produits. La moyenne des ouvriers par établissement est de 25·8 pour cent et la moyenne des gages par ouvrier de \$415.55. La proportion des matériaux par rapport à la valeur des produits est de 39·45, et des gages par rapport aux produits de 19·88. L'industrie des plomberies et ferblanteries dépasse de beaucoup toutes les autres dans le nombre d'établissements, formant 70 pour cent du total. Cette industrie emploie aussi 44 pour cent du total des ouvriers, et la valeur de ses produits s'élève à un tiers du total. Les métallurgies quoique ne formant qu'un trentième du total des établissements, représentent la moitié du capital placé et leurs produits forment au-delà d'un tiers des produits de tous les établissements de ce groupe. La moyenne des gages est aussi la plus élevée dans cette espèce d'industrie, soit \$581.31 par ouvrier et \$96,885 par établissement. La valeur des produits par établissements est de \$590,199, et la proportion des gages par rapport à la valeur des produits de 16·41 pour cent. La proportion la plus élevée des gages par rapport à la valeur des produits se trouve dans les industries des fonderies de cuivre et dans l'orfèvrerie soit, pour la première, de 29·61, et pour la dernière de 28·5 pour cent, et dans chacune le coût des matériaux est un peu plus de 40 pour cent de la valeur des produits. Dans dix des industries de ce groupe la moyenne des gages par ouvrier est au-dessus de \$400 et dans trois autres elle est au-dessus de \$500.

28. GROUPE XI : TABAC ET MANUFACTURES DE TABAC.

Nom ou sorte d'industrie.	Eta- blisse- ments.	Capital.	Em- ployés à gages.	Montant payé pour travail à gages.	Coût des matières employées	Valeur des produits.
	No.	\$	No.	\$	\$	\$
Tabac à chiquer, à fumer et à priser.....	22	4,747,030	2,186	565,270	2,156,927	6,469,961
Tabac, cigares et cigarettes.....	138	2,500,510	4,143	1,366,146	1,567,758	5,332,151
Totaux.....	160	7,247,540	6,329	1,931,416	3,724,745	11,802,112

Le tabac et les manufactures de tabac constituent le onzième groupe comprenant deux espèces d'industries et 160 établissements. Les 22 établissements employés dans la production du tabac à chiquer, à fumer et à priser représentent une moyenne de \$294,089 pour la valeur des produits et de \$25,694 pour les gages par établissement, tandis que les 138 établissements employés dans la production des cigares et cigarettes donnent une moyenne de \$38,639 pour la valeur des produits et de \$9,900 pour les gages, par établissement. La moyenne des gages par ouvrier dans les établissements de la première espèce et de \$258.59 et dans ceux de la seconde de \$329.75; en calculant d'après le total des gages des deux espèces d'industries la première est de 29 pour cent et la seconde de 71 pour cent. La proportion des gages par rapport à la valeur des produits est seulement de 8·74 pour cent dans les établissements produisant le tabac à chiquer, à fumer et à priser, tandis que dans ceux produisant les cigares et les cigarettes elle s'élève à 25·62 pour cent. Conséquemment ce sont les établissements de la première espèce d'industrie qui emploient le plus grand nombre d'ouvriers dont le travail contribue à augmenter la valeur des produits collectivement comme proportionnellement.

La proportion des gages par rapport à la valeur des produits pour le groupe des industries du tabac est de 16.36 pour cent.

## 29. GROUPE XII. VOITURES POUR TRANSPORT SUR TERRE.

Totaux.....	425	15,994,402	14,866	6,228,661	10,592,288	19,971,605

Le groupe xii comprend toutes voitures pour le transport sur terre dont les statistiques sont données au tableau 29, représentant cinq espèces d'industries et 425 établissements. L'industrie ayant le plus grand nombre d'établissements est celle de la carrosserie qui se trouve intimement liée à celle des matériaux de carrosserie. Ces deux industries représentent 376 établissements avec un capital de \$7,930,843. Elles donnent de l'emploi à 5,716 ouvriers, le montant payé en gages aux ouvriers est de \$2,128,339, et pour les matériaux de \$3,627,781, et la valeur de leurs produits s'élève à \$7,920,183. La moyenne des gages par ouvrier est de \$370.03 pour ceux qui sont employés dans la carrosserie, et de \$372.78 pour ceux qui travaillent à la fabrication des matériaux de carrosserie, et la proportion des gages par rapport à la valeur des produits est à peu près la même dans les deux industries, soit 26.94 pour 100 dans la première et 26.50 pour 100 dans la seconde. Les industries de réparations et de construction de wagons de chemins de fer sont aussi intimement liées. Il y a 33 établissements employant 8,737 ouvriers et le montant des gages s'élève au total de \$3,936,726. Le capital des deux industries est de \$7,010,859, le coût des matériaux employés de \$6,664,754 et la valeur des produits de \$11,500,816. Dans les établissements de réparations la moyenne des gages est de \$479.33 par ouvrier et dans ceux de la construction elle est de \$397.84; mais tandis que la moyenne des gages par établissement est de \$104,254 dans la première classe, elle s'élève à \$175,162 dans la dernière. La proportion des gages par rapport à la valeur des produits est de 35.92 pour les réparations de wagons de chemin de fer et de 30.01 pour la construction. Seize établissements sont employés dans la manufacture des bicyclettes avec un capital de \$1,052,700 employant 413 ouvriers dont les gages s'élèvent à \$163,596. Le coût des matériaux employés est de \$299,753 et la valeur des produits de \$550,606, et la proportion des gages par rapport à la valeur des produits est de 29.71 pour 100. La moyenne des gages par ouvrier pour toutes les industries de ce groupe est \$418.99 et la proportion des gages par rapport à la valeur des produits de 31.19 pour 100. Les moyennes comme les proportions les plus élevées se trouvent dans l'industrie des réparations de wagons, et les plus basses dans celle des matériaux de carrosserie.

30. GROUPE XIII : VAISSEAUX POUR TRANSPORT PAR EAU.

Nom ou sorte d'industrie.	Eta- blisse- ments.	Capital.	Em- ployés à gages.	Montant payé pour travail à gages.	Coût des matières employées	Valeur des produits.
	No.	\$	No.	\$	\$	\$
Construction et radoub de na- vires.....	39	3,156,369	2,422	750,833	699,634	1,899,836
Bateaux et canots.....	18	141,545	165	60,580	46,312	143,632
Totaux.....	57	3,297,914	2,587	811,413	745,946	2,043,668

La statistique de la construction de vaisseaux pour le transport par eau comprend deux espèces d'industries, nommément, celle de la construction et radoub de navires et celle des bateaux et canots; la première comptant 39 établissements et la dernière 18. Le montant du capital placé est de \$3,297,914, le nombre d'ouvriers de 2,587 et la valeur des produits de \$2,043,668. La moyenne des gages par ouvrier est de \$313.65 pour le groupe; mais tandis qu'elle est de \$367.15 pour la construction des bateaux et canots, elle n'est que de \$310.01 pour la construction et radoub de navires. Le coût des gages et la valeur des matériaux est de 76 pour cent de la valeur des produits pour les deux espèces d'industries, ou près de 77 pour cent pour les navires et de 74 pour cent pour les bateaux et canots; et la proportion des gages par rapport à la valeur des produits est de 39.52 pour cent dans la première et de 42.12 pour cent dans la dernière.

Les industries diverses sont réunies ensemble dans le quatorzième groupe. Elles représentent 72 différentes espèces d'industries, dont 44 sont spécifiées dans le tableau.

Les 28 autres industries comprennent un établissement chacune de graisse à essieu, courroies et tuyaux en caoutchouc, effets en celluloïde, costumes, matériel dentaire, articles étamés, baleine, articles en plumes, matériel d'avertisseurs d'incendie, effets de pompiers, feux d'artifice, graphite, tourbe, patrons de tapis, herbe marine, appareils pour eaux gazeuses, garniture pour tiroirs à vapeur, cirage de poêle, bleu à laver et figures en cire, et deux-chacune de carbure de calcium, coke, peignes, pelletterie (préparation), gypse, patrons, plâtre et stuc et divers articles. Il y a en tout 582 établissements dans ce groupe employant 21,084 ouvriers dont les gages s'élèvent à \$7,482,981 et les matériaux à \$15,781,268, avec un capital de \$63,089,415 et la valeur des produits est de \$35,607,212. La moyenne du capital par établissement est de \$108,401 et celle des produits de \$61,181, tandis que celle des gages est de \$12,857 et celle des matériaux de \$27,115. La moyenne des gages par ouvrier est de \$354.91 et la proportion des gages par rapport à la valeur des produits est de 21.01 pour 100. L'industrie la plus importante de ce groupe est celle des instruments aratoires représentant la statistique de 114 établissements dont le capital par établissement s'élève à \$159,713, le coût du travail et des matériaux à \$54,893 et la valeur des produits à \$84,188. La moyenne des gages par ouvrier est de \$367.87 et la proportion des gages par rapport à la valeur des produits de 22.19 pour 100. Les appareils et effets électriques ainsi que la lumière et la force motrice électriques mis ensemble ont un capital de \$17,158,422, emploient 2,821 ouvriers et montrent un produit de \$5,040,269. La valeur des produits par établisse-

ment donne une moyenne de \$121,290 pour les appareils et effets électriques, avec une proportion des gages par rapport à la valeur des produits de 27·92 pour 100, tandis que pour la lumière et la force motrice électriques la valeur des produits par établissement est de \$34,621 et la proportion des gages par rapport à la valeur des produits de 22·46 pour 100. La moyenne des gages par ouvrier dans la première espèce d'industrie nommée est de \$440.49, et dans la seconde de \$501.72. Les instruments de musique et les matériaux d'instruments de musique, sont aussi des industries intimement liées; les deux représentent 46 établissements ayant un capital de \$4,290,847 et leurs produits ont une valeur de \$3,380,727. Ces industries emploient 2,669 ouvriers dont les gages se montent à \$1,096,309 et le coût des matériaux est de \$1,333,323. La moyenne des gages par ouvrier dans les manufactures d'instruments de musique est de \$423.75, la valeur des produits par établissement est de \$77,532, et la proportion des gages par rapport à la valeur des produits de 33·51 pour 100. Dans les établissements de matériaux d'instruments de musique la moyenne des gages par ouvrier est de \$298.99, la valeur des produits par établissement de \$51,000 et la proportion des gages par rapport à la valeur des produits de 23·28 pour 100. En mettant ensemble deux autres industries intimement liées, vêtements en caoutchouc et articles en caoutchouc, on obtient 13 établissements ayant un capital de \$1,523,971 avec des produits de \$1,574,422 et employant 629 ouvriers dont les gages se montent à \$220,189. La moyenne des gages par ouvrier est de \$390.39 dans les établissements de vêtements en caoutchouc, et de \$336.31 dans ceux des articles en caoutchouc, et la proportion des gages par rapport à la valeur des produits est de 15·57 dans les premiers et de 13·44 dans les derniers. Le coût des matériaux est de 50 pour cent de la valeur des produits dans l'industrie des vêtements en caoutchouc et de 65 pour cent dans celle des articles en caoutchouc. La production du gaz compte 27 établissements dont le capital s'élève à \$7,692,101 et les produits à \$2,327,466. Le nombre d'ouvriers est de 856 avec une moyenne dans les gages de \$473.97 par ouvrier et de \$15,027 par établissement, et la proportion des gages par rapport à la valeur des produits est de 17·43 pour cent. La proportion des matériaux par rapport à la valeur des produits est de 32·30 pour cent. Les savonneries sont aussi une industrie importante. Le nombre d'établissements est de 23, le montant du capital de \$2,321,207, et la valeur des produits de \$2,143,945; il y a 478 ouvriers employés à des gages de \$164,717 et le coût des matériaux s'élève à \$1,424,238. La valeur des produits par établissement est de \$93,215, la moyenne des gages par ouvrier de \$344.59; la proportion des gages par rapport à la valeur des produits est de 7·68 pour cent et la proportion du coût des matériaux à la valeur des produits de 66·43 pour cent. La seule autre industrie du groupe dont la valeur des produits dépasse un million de dollars est celle des gants et mitaines; elle comprend 22 établissements ayant un capital de \$778,003 et une valeur des produits de \$1,024,245. Il y a 974 ouvriers employés dans ces établissements à des gages de \$209,608, et le coût des matériaux s'élève à \$623,612. La moyenne des gages par ouvrier est de \$215.20, le coût des gages par établissement de \$9,528, et la proportion des gages par rapport à la valeur des produits de 20·47 pour cent.

Le groupe des industries manuelles comprend cinq espèces d'industries et 45 établissements. Ce groupe est naturellement petit à cause de la limitation de ces statistiques aux établissements employant cinq personnes et plus. Dans l'industrie des forges par exemple, la grande majorité des boutiques emploient un ou deux ouvriers au plus, et

celles-ci ont été exclues dans l'énumération. Onze établissements seulement ont été énumérés d'après les règlements suivis pour le recensement des manufactures, quoique le nombre de ces boutiques dans le pays ne soit pas moins de 10,000. Pour les mêmes raisons les boutiques de charpentiers ont aussi été exclues, et la seule industrie du genre qui ait été entrée est celle des décorations d'intérieurs. La moyenne du capital dans ce groupe est de \$13,630 par établissement et celle de la valeur des produits de \$13,318. La moyenne des gages par ouvrier varie de \$295,19 pour les réparations de bicyclettes à \$488.27 pour les forges, et la valeur des produits par établissements varie de \$7,087 pour les forges à \$23,788 pour les serrureries et armureries. La proportion des gages par rapport à la valeur des produits est élevée dans toutes les industries de ce groupe, la plus basse étant de 30.17 pour cent dans les réparations de bicyclettes et la plus haute de 44.76 pour cent dans les décorations d'intérieurs.

32 GROUPE XV. INDUSTRIES MANUELLES.

Nom ou sorte d'industrie.	Etablissements	Capital.	Em-ployés à gages.	Montant payé pour travail à gages.	Coût des matières employées	Valeur des produits.
	No.	\$	No.	\$	\$	\$

Le tableau 33 donne pour les différentes espèces d'industries des 15 groupes dans lesquels les statistiques des manufactures ont été classifiées (1) la moyenne du coût des gages par ouvrier (2) la moyenne du coût des gages par établissement et (3) la valeur des produits par établissement.

La moyenne des gages gagnés dans toutes les industries est de \$285.86 par ouvrier, et elle est dépassée par tous les groupes excepté ceux des produits alimentaires, des industries textiles, des bois et leurs manufactures, de l'argile, du verre et de la pierre. La moyenne la moins élevée pour les gages gagnés se trouve dans la classe des produits alimentaires dont font partie les industries de conserves de fruits et légumes et de poisson, et celles des fruits évaporés, dont le nombre est relativement élevé et la saison d'opération nécessairement courte, réduisant ainsi la moyenne des gages gagnés. Dans quatre des industries de cette classe la moyenne des gages est de plus de \$500 et dans six autres elle varie de \$350 à \$500. Le groupe montrant la moyenne la plus élevée payée pour le travail est celui des voitures pour le transport sur terre, \$418.99, le second est celui des métaux et leurs produits autres que l'acier, \$415.55, et la troisième celui des industries manuelles, \$410.40. Mais des moyennes de ce genre n'ont de valeur que lorsqu'elles sont étudiées en vue du nombre d'employés, du montant des gages payés et de la valeur des produits. Les gages les plus élevés dans le premier groupe, par exemple, sont de \$600 par ouvrier et sont payés par une industrie de peu d'importance, celle des

enveloppes à saucisson dont le total des gages n'est que de \$6,000 ; tandis que dans la classe des raffineries de sucre, appartenant au même groupe, avec des gages d'une moyenne de \$510.57 par ouvrier, le montant total des gages payés s'élève à \$612,680, et dans la classe du pain, biscuits et confiseries, avec des gages d'une moyenne de \$308.56 par ouvrier, le total des gages s'élève à \$1,807,805. Le montant des gages payés par toutes les industries de ce groupe le place au quatrième rang sur la liste générale avec le chiffre de \$8,032,580, la première place appartenant au groupe du bois, avec un montant de \$18,966,773, la seconde au groupe des industries textiles avec un montant de \$15,326,107 et la troisième au groupe du fer et de l'acier avec un montant de \$9,846,247.

Dans le groupe des industries textiles les deux classe d'habillements d'hommes (tailleur et fabrique) emploient 20,983 ouvriers dont les gages s'élèvent à \$4,467,806, la valeur des produits est de \$17,755,730 et la moyenne des gages par ouvrier est de \$213. La classe des cotons du même groupe emploi 11,882 ouvriers recevant des gages de \$3,352,464, les produits s'élèvent à \$12,033,052 et la moyenne des gages par ouvrier à \$282.14. La valeur des produits de ces classes est de 44 pour cent de la valeur totale du groupe, mais la moyenne des gages des ouvriers travaillant dans les habillements est moindre que dans 23 et celles des ouvriers travaillant dans les cotons, moindre que dans 9 autres classes du même groupe. De même pour le groupe du fer et de l'acier, les gages des ouvriers travaillant dans les fonderies forment 50 pour cent du montant payé dans le groupe, mais la moyenne par ouvrier est moindre que dans 13 des autres classes d'industries. De même aussi pour le groupe des différentes industries du bois, les gages payés dans la classe des produits des billots et du bois de construction s'élèvent à 73 pour cent du total des gages de tout le groupe et la moyenne est dépassée par 20 autres classes. De même encore pour le groupe du cuir, les gages payés dans la classe des chaussures constituent 65 pour cent du total du groupe et la moyenne est moindre que dans aucune autre classe du groupe, excepté deux. Dans le groupe de papeterie et imprimerie les gages pour la classe des imprimeries et publications sont de 57 pour cent du total et ne sont dépassés seulement que dans une autre classe du groupe, celle de stéréotypie et électrotypie. Il est important de connaître les taux généraux des gages payés pour le travail dans les différentes classes d'industries, mais afin de mieux apprécier leur valeur comme facteur économique dans la proportion, les moyennes devraient être considérées

relativement à l'ensemble et non pas seulement dans leur rapport les unes aux autres. La moyenne du coût des gages par établissement pour toutes les industries est de \$6,114, et varie de \$1,436 pour les produits alimentaires à \$19,045 pour les produits du fer et de l'acier. Il y a sept groupe d'industries dans lesquels la moyenne dépasse \$10,000, ce sont les produits du fer et de l'acier; le cuir et ses produits finis, les métaux et leurs produits autres que l'acier, le tabac et les manufactures de tabac, les voitures pour le transport sur terre, les vaisseaux pour le transport par eau, et les industries diverses. Dans six autres groupes, comprenant les industries textiles, le bois et ses manufactures, la papeterie et imprimerie, les liqueurs et breuvages, les produits chimiques et les industries manuelles, la moyenne varie de \$5,000 à \$10,000; et dans deux autres groupes, comprenant les produits alimentaires et les produits de l'argile, du verre et de la pierre, la moyenne est au-dessous de \$5,000. Le coût le plus élevé des gages par établissement dans aucune classe d'industries est de \$175,162 pour les manufactures de wagons de chemin de fer, le second est de \$167,623 pour les manufactures de cotons, le troisième de \$155,170 pour les raffineries de sucre, et la quatrième de \$104,254 pour les réparations de wagons de chemin de fer. Ce sont les seules classes d'industries dans lesquelles la moyenne du coût des gages par établissement dépasse \$100,000.

Dans les cinq classes des tissus teints et finis, des ponts en fer et en acier, des produits du fer et de l'acier, des machines à coudre et des métallurgies, la moyenne varie de \$50,000 à \$100,000; et dans les treize classes d'habillements d'hommes (fabriqués), de pulpe de bois, de papier, de tapisserie, de ciment de Portland, de verre, d'effets de plombiers, de boîtes de montres, de tabac à chiquer, à fumer et à priser, de munitions, d'appareils et effets électriques, d'instruments de musique et de matériaux de chemin de fer, la moyenne est de \$25,000 à \$50,000. Dans toutes les autres classes d'industries la moyenne du coût des gages par établissement est au-dessous de \$25,000. Dans une classe seulement, celle des produits des billots, le coût total des gages s'élève à au-dessus de \$10,000,000; dans les quatre classes suivantes: cotons, fonderies, chaussures, et imprimeries et publications, les totaux demeurent entre \$3,000,000 et \$5,000,000; dans les 24 classes suivantes: pain, biscuits et confiseries, beurre et fromage, salaisons et conserves de poisson, produits des moulins à farine, habillements d'hommes (établissements de tailleurs) habillements d'hommes (produits des fabriques) articles de toilette pour hommes, habillements de femmes, (établissements de couturières) articles en laine, bouilloires et machines, produits du fer et de l'acier, meubles, produits du bois de construction, pulpe de bois, cuir, briqueteries, tuileries et poteries, plomberies et ferblanteries, métallurgies, cigares et cigarettes, carrosserie, réparations de wagons, manufactures de wagons, instruments aratoires et instruments de musique, le montant total des gages est entre \$1,000,000 et \$3,000,000, et dans les 13 classes suivantes: abattoirs et salaisons de viandes, raffineries de sucre, habillements de femmes (produits des fabriques) chapellerie et pelleterie, bonneterie, selleries, fabriques de papier, imprimerie et reliure, liqueurs (malt) verreries, tabac à chiquer, à fumer et à priser, construction et radoub de navires et appareils et effets électriques, le montant total des gages est entre \$500,000 et \$1,000,000. Dans 54 des classes qui restent le montant total des gages est entre \$100,000 et \$500,000 et dans chacune des 92 autres classes les gages sont au-dessous de \$100,000. Le groupe d'industries occupant le premier rang relativement au travail et aux gages est celui du bois et ses manufactures, qui donne de l'emploi à 75,704 travailleurs au coût de \$18,966,763 pour travail.

La valeur la plus élevée des produits par établissement appartient au groupe des produits chimiques et composés, et la plus basse à celui des produits de l'argile, du verre et de la pierre, soit de \$89,354 pour les premiers et de \$8,560 pour les derniers.

Dans les sept groupes suivants : produits du fer et de l'acier, le cuir et ses produits finis, liqueurs et breuvages, produits chimiques et composés, métaux et produits des métaux autres que l'acier, le tabac et les industries diverses, la valeur moyenne par établissement est au-dessus de \$50,000 ; et dans les cinq groupes suivants : industries textiles, le bois et ses manufactures, papeterie et imprimerie, voitures pour transport sur terre, et vaisseaux pour transport par eau, la moyenne est entre \$25,000 et \$50,000 par établissement, et dans les deux groupes des produits alimentaires et des industries manuelles la moyenne est au-dessous de \$25,000 par établissement. Le groupe des produits alimentaires montre la plus grande valeur totale des produits, \$125,202,620, bien qu'il soit immédiatement au-dessus de la moyenne la moins élevée dans la valeur des produits par établissement. Le groupe du bois et ses manufactures est le second en valeur des produits, soit \$80,341,204 ; et le groupe des industries textiles le troisième avec \$67,724,839. Dans les trois groupes des produits du fer et de l'acier, du cuir et ses produits finis, et des industries diverses, la valeur des produits est entre \$25,000,000 et \$50,000,000 ; et dans neuf autres elle est au-dessous de \$25,000,000.

Dans les trois industries suivantes : beurre et fromage, produits des moulins à farine et produits des billots, la valeur des produits par industrie est au-dessus de \$25,000,000 ; dans les neuf industries suivantes : pain, biscuits et confiserie, abattoirs et salaisons de viandes, raffineries de sucre, cotons, produits des fonderies, produits du bois de construction, chaussures, cuirs, imprimerie et publications, la valeur des produits demeure entre \$10,000,000 et \$25,000,000 ; et dans les quinze industries suivantes : salaisons et conserves de poisson, habillements d'hommes (établissements de tailleurs), habillements d'hommes (produits des fabriques), chapellerie et pelleterie, articles en laine, produits du fer et de l'acier, meubles, liqueurs (malt), plomberies et ferblanteries, métallurgies, tabac à chiquer, à fumer et à priser, cigares et cigarettes, réparations de wagons de chemin de fer, carrosserie et instruments aratoires, la valeur des produits est entre \$5,000,000 et \$10,000,000. Cela forme un total de 27 espèces d'industries dans lesquelles les produits dépassent \$5,000,000 par industrie. Dans 39 autres espèces d'industries (dont une de "toutes autres") la valeur des produits par industrie varie de \$1,000,000 à \$5,000,000 et dans les 122 classes qui restent la valeur par classe est au-dessous de \$1,000,000.

Le tableau 33 montre que pour les 15 groupes d'industries la moyenne du montant gagné par ouvrier est de \$285.86, celle du coût du travail par établissement de \$6,114, et la valeur des produits par établissement de \$32,836. Dans deux des groupes seulement, savoir : produits alimentaires et produits de l'argile, du verre et de la pierre, les différentes moyennes sont-elles plus basses que dans celles des 15 groupes ; dans les deux groupes des industries textiles et des bois, les moyennes des gages par ouvrier sont plus basses, et dans le groupe des industries manuelles, elles sont plus basses pour le coût des gages et la valeur des produits par établissement.

La moyenne du montant gagné par ouvrier est plus élevée dans 177 espèces d'industries et moindre dans 88 que celle de \$285.86 pour les 265 espèces d'industries nom-

mées dans les tableaux, et dans les 180 espèces d'industries ayant trois établissements et plus d'une même espèce, il y en a 109 avec des moyennes du coût des gages et de la valeur des produits par établissement plus élevées que celle de toutes les 265 espèces d'industries dans les tableaux, et 71 avec des moyennes moindres.

Mais les moyennes des gages gagnés sont modifiées par le nombre de jours durant lesquels les ouvriers sont employés, selon la nature des industries. Par exemple, dans les fabriques de beurre le total du temps employé est de 1,140,702 jours et la moyenne de 165 jours, dans l'industrie des conserves de légumes et de fruits le total du temps employé est de 520,430 jours et la moyenne de 112 jours par ouvrier, et dans l'industrie des conserves de poisson, le total est de 1,334,175 et la moyenne de 86 jours, tandis que dans l'industrie du pain, biscuits et confiseries, le total du temps de travail est de 1,727,394 jours et la moyenne par ouvrier de 295 jours, et dans les abattoirs et établissements de salaisons de viandes, le total du temps de travail est de 598,874 jours et la moyenne de 282 jours. Pour correspondre à ces moyennes de jours de travail par ouvrier dans les différentes espèces d'industries, les moyennes des gages gagnés durant l'année de recensement sont données, à savoir : dans la fabrication du beurre et du fromage, \$212.62, dans l'industrie des conserves de légumes et de fruits, \$81.28, dans celle des salaisons et conserves de poisson, \$78.42, dans celle du pain, biscuits et confiseries, \$308.56, et dans celle des abattoirs et salaisons de viandes, \$369.64.

La moyenne du coût du travail par établissement dépend du nombre d'ouvriers et du taux des gages, et la valeur des produits par établissement grandement du coût du travail et des matériaux ; il s'en suit naturellement que le temps d'opération est un élément important dans ces moyennes.

Le tabl au 34 montre, par des proportions pour cent, le coût des principaux items dans les manufactures, par rapport à la valeur des produits, pour les industries et les groupes d'industries.

Sous l'en-tête des matériaux sont inclus tous les articles à l'état brut ou en partie fabriqués, employés dans la production des articles finis. Les dépenses comprennent le loyer des usines ou établissements, du pouvoir mécanique, du chauffage et des bureaux, le coût du combustible et de l'éclairage, des taxes municipales, provinciales et du revenu interne, de l'intérêt, des assurances et du travail à l'entreprise. Les gages comprennent les montants gagnés pour travail, soit en dedans ou en dehors des établissements, à prix fixe ou à la pièce. Les salaires sont des paiements faits aux officiers, gérants, commis aux ventes, etc., et aux propriétaires d'établissement pour services administratifs ou pour travail comme il arrive souvent dans les petits établissements des industries manuelles. Le capital comprend les valeurs des terrains, bâtiments, machines et force motrice, et celles des outils et des instruments nécessaires aux industries manufacturières, ainsi que l'argent en caisse, les billets recevables, les comptes sur le grand-livre non réglés, la matière première, le matériel en voie de fabrication et les produits finis en mains, sur la base du dernier inventaire annuel. Ces matières, bien qu'elles soient exactes et compréhensibles, sont plutôt des termes d'usage en affaires que des termes scientifiques employés en économie politique.

34. PROPORTIONS DU COÛT DES MATÉRIAUX, DES DÉPENSES DIVERSES, DES GAGES, DES SALAIRES ET DE L'INTÉRÊT SUR LE CAPITAL, PAR RAPPORT AUX VALEURS DES PRODUITS.

manufactures, de 91·27 pour les voitures pour transport sur terre, de 84·05 pour les vaisseaux pour transport par eau, de 79·81 pour les industries diverses, et de 82·12 pour les industries manuelles.

La proportion la plus élevée dans le coût des matériaux par rapport à la valeur des produits appartient au groupe des produits alimentaires, 79·18, et la plus basse au groupe des produits de l'argile, du verre et de la pierre, 13·63. La proportion du coût des gages et salaires par rapport à la valeur des produits est la plus grande dans le groupe des industries manuelles, 53·10, et la plus basse dans le groupe des produits alimentaires, 8·64. La proportion des dépenses diverses par rapport au coût des produits est de 29·54 dans l'industrie du tabac et de 2·54 seulement dans celle du cuir et ses produits finis. Dans le groupe des produits alimentaires et des produits chimiques et composés, la proportion des gages et salaires par rapport à la valeur des produits est au-dessous de 20. Dans les groupes des industries textiles, du bois et ses manufactures, du cuir et ses produits finis, des liqueurs et breuvages, des métaux et leurs produits autres que l'acier et le fer, du tabac et ses manufactures et des industries diverses, la proportion est de 20 à 30 ; dans les groupes des produits du fer et de l'acier, de papeterie et imprimerie et des voitures pour transport sur terre la proportion est de 30 à 40 ; et dans les groupes des produits de l'argile, du verre et de la pierre, des vaisseaux pour le transport par eau et des industries manuelles, la proportion est au-dessus de 40.

#### STATISTIQUES COMPARATIVES.

Les tableaux xvi à xxi donnent les statistiques des manufactures du Canada pour les années de recensement de 1881, 1891 et 1901 ; ces statistiques ne sont pas strictement comparatives cependant, vu que celles de 1881 et 1891 comprennent tous les établissements industriels ou métiers mécaniques, tandis que celles de 1901 ne contiennent que des établissements employant cinq personnes et plus.

Les tableaux xvi et xvii donnent pour les provinces et le Canada le nombre d'établissements et la valeur des produits, tels qu'énumérés pour chaque année de recensement. En 1881 le nombre s'élevait à 49,722 et la valeur à \$309,731,867, en 1891 le nombre était de 75,964 et la valeur de \$469,847,886, et en 1901 le nombre était de 14,650 et la valeur s'élevait à \$481,053,375. Le Nouveau-Brunswick, la Nouvelle-Ecosse, et l'Île du Prince-Edouard sont les seules provinces dans lesquelles les produits des fabriques employant cinq personnes et plus en 1901 sont moindres en valeur que les produits de tous les établissements en 1891 ; et dans toutes les provinces la valeur des produits en 1901 était de \$171,321,508 plus élevée qu'en 1881 pour 35,072 établissements de moins, et de \$11,205,489 plus grande qu'en 1891 pour 61,314 établissements de moins.

Les tableaux xviii, xix, xx et xxi donnent les principales statistiques pour les districts de recensement, les provinces et le Canada ainsi que pour les cités, les villes et les principaux villages dans les années 1881, 1891 et 1901, par groupes des valeurs des produits, savoir : (1) au-dessous de \$2,000, (2) \$2,000 à au-dessous de \$12,000, (3) \$12,000 à au-dessous de \$25,000, (4) \$25,000 à au-dessous de \$50,000, (5) \$50,000 et au-dessus ; les statistiques pour 1881 et 1891 sont pour tous les établissements industriels indépendamment du nombre de personnes employées, et celles de 1901 pour les établissements employant cinq personnes et plus.

Les statistiques des établissements, des employés et des gages du tableau 35 donnent les totaux, les moyennes et les proportions pour les trois années de recensement :—des totaux pour les établissements, les employés et les gages ; des employés par classes de sexe et d'âge ; des moyennes pour les employés et les gages par établissement et des gages par employé, et des proportions pour les employés par classes de sexe et d'âge par rapport au total des employés.

Pour 1901, avec 30 pour cent du nombre d'établissement énumérés en 1881, le nombre d'employés était plus élevé de 89,100, et avec 19 pour cent du nombre d'établissements en 1891 le nombre d'employés était plus bas de 25,560 ; mais les gages des employés en 1901 étaient de \$53,820,348 plus élevés qu'en 1881 et de \$12,834,000 plus qu'en 1891.

Les moyennes indiquent, comme il devait certainement en être ainsi, de grandes augmentations dans le nombre d'employés et le montant des gages payés par établissement en 1901 sur 1881 et 1891 ; et elles montrent aussi, chose qui était moins certaine de suivre, une grande augmentation dans le montant des gages payés par employé. De 1881 à 1891 l'augmentation était de \$38.58 et de 1891 à 1901 elle était de \$57.47, tandis que les proportions des hommes, femmes et enfants par rapport au total des employés étaient pratiquement les mêmes durant cette période, excepté dans le cas des enfants où la proportion du nombre employé durant la dernière décade est tombée de cinquante pour cent.

De 1881 à 1891, le recensement de tous les établissements industriels ayant été pris, le nombre d'établissements a augmenté de 355 dans la Colombie-Britannique, de 687 dans Manitoba, de 2,424 dans le Nouveau-Brunswick, de 5,002 dans la Nouvelle-

Ecosse, de 9,081 dans Ontario, de 1,062 dans l'Île du Prince-Edouard, de 7,280 dans Québec, de 351 dans les territoires, et de 26,242 dans tout le Canada. La moyenne des produits par établissement a augmenté durant cette même période de \$7,052 à \$15,584 dans la Colombie-Britannique, et dans Ontario de \$6,851 à \$7,441, mais il y a eu diminution dans la moyenne des produits par établissement de \$9,922 à \$9,849 dans Manitoba, de \$6,160 à \$4,393 dans le Nouveau-Brunswick, de \$3,381 à \$2,958 dans la Nouvelle-Ecosse, de \$2,102 à \$1,622 dans l'Île du Prince-Edouard, de \$6,643 à \$6,404 dans Québec, et de \$6,229 à \$6,186 dans tout le Canada. Pour 1901, le recensement des fabriques ou établissements employant cinq personnes et plus ayant été pris, la moyenne des produits par établissement était de \$49,612 dans la Colombie-Britannique, de \$39,900 dans Manitoba, de \$22,821 dans le Nouveau-Brunswick, de \$19,859 dans la Nouvelle-Ecosse, de \$36,914 dans Ontario, de \$6,966 dans l'Île du Prince-Edouard, de \$32,670 dans Québec, de \$18,714 dans les Territoires, et de \$32,836 dans tout le Canada. La moyenne élevée de la Colombie-Britannique est attribuée à la grande production des conserves de poisson, des scieries et des établissements métallurgiques, et celle de Manitoba à l'industrie des moulins à farine.

36. NOMBRE D'ÉTABLISSEMENTS ET VALEUR DES PRODUITS EN 1881, 1891 ET 1901, POUR LES PROVINCES ET LE CANADA.

Dans le tableau XVIII les statistiques des industries sont données par groupes de valeurs des produits, par districts pour 1901, et dans le tableau XIX, par provinces pour 1881 et 1891. Les établissements avec une production de moins de \$2,000 appartiennent au premier groupe, avec \$2,000 et au-dessous de \$12,000 au deuxième, avec \$12,000 et au-dessous de \$25,000 au troisième, avec \$25,000 et au-dessous de \$50,000 au quatrième et avec 50,000 et plus au cinquième. Deux-tiers du nombre de tous les établissements énumérés en 1881 et 1891 appartiennent au groupe dont la valeur est au-dessous de \$2,000, environ un quart du total au groupe de \$2,000 et au-dessous de \$12,000, et moins d'un douzième du total au groupe de \$12,000 et plus. De tous les établissements énumérés en 1901 un dixième du total ont des valeurs de moins de \$2,000, un peu plus

d'une moitié des valeurs de \$2,000 et au-dessous de \$12,000, et environ deux cinquièmes des valeurs de \$12,000 et plus.

Tel que le démontrent les statistiques du capital et de la valeur des produits, il est évident qu'il y a tendance dans le monde industriel à agrandir les établissements manufacturiers.

En prenant comme illustration le capital des établissements des deux groupes dont les produits sont de \$25,000 et au-dessous de \$50,000, et \$50,000 et plus, qui excluent sans doute tous les établissements employant moins de cinq personnes, le nombre de tels établissements était de 2,075 en 1881, de 2,879 en 1891 et de 3,185 en 1901. Le capital engagé dans les établissements de ces deux groupes était de \$101,104,322 en 1881, soit une moyenne de \$48,725 par établissement ; en 1891 il était de \$235,891,991, ou une moyenne de \$81,878 ; et en 1901 il était de \$377,943,990, ou une moyenne de \$118,663. Comparé par la raison de 100 avec le capital de toutes les industries, celui des établissements ayant un produit de \$25,000 et plus était de 61.03 en 1881, de 66.78 en 1891 et 84.56 en 1901.

En prenant, comme seconde illustration, le produit des établissements des deux mêmes groupes, il était de \$187,249,941 en 1881, soit une moyenne de \$90,241 par établissement, de \$297,222,732 en 1891 ou une moyenne de \$103,166, et de \$393,262,128 en 1901 ou une moyenne de \$123,473. Comparé par la raison de 100 avec le produit de toutes les industries, comme il est fait plus haut pour le capital, ces établissements de \$25,000 et plus donnent les proportions de 60.46 pour 1881, de 63.26 pour 1891 et de 81.75 pour 1901.

Pour tous les établissements ayant un produit de \$25,000 et plus l'augmentation moyenne du capital par établissement était donc de \$33,153 et celle du produit de \$12,925 de 1881 à 1891, et de 1891 à 1901 l'augmentation du capital était de \$36,785 et celle du produit de \$20,307 par établissement.

#### MANUFACTURES DES CITÉS, VILLES ET VILLAGES.

Les tableaux xx et xxi donnent une comparaison de la statistique des manufactures dans les cités et les villes de 5,000 habitants et plus, et dans les villages et villes de 1,500 à au-dessous de 5,000, pour les trois recensements de 1881, 1891 et 1901, en autant qu'il soit possible d'établir des comparaisons entre la statistique d'établissements employant cinq personnes et plus et celle d'établissements dans lesquels le nombre d'employés n'est pas limité à ce chiffre.

Dans les cas où les chiffres sont moindres en 1901 que dans aucun des recensements précédents il ne peut pas être affirmé que ceux de tous les établissements s'ils étaient énumérés, petits et grands, seraient moindres ; mais lorsqu'ils sont plus élevés tels qu'énumérés il n'y a plus alors aucun doute. Et d'ailleurs dans l'ensemble il n'existe aucun doute, vu que 5,832 établissements dans les cités, villes et villages de 1,500 habitants et plus en 1901 ont des produits d'une valeur de \$360,654,387, tandis que 21,607 établissements dans les endroits de même population en 1891 avaient des produits d'une valeur de \$310,911,527, et 13,123 établissements en 1881 avaient des produits évalués à \$198,017,874. Les chiffres représentant le nombre d'établissements, le montant du capital et la valeur des produits sont donnés au tableau 37.

Dans les cités et villes de 5,000 habitants et plus, la moyenne du capital par établissement en 1881 était de \$10,839, en 1891 elle était de \$12,299 et en 1901 elle s'élevait à \$61,730, et dans les villages et villes de 1,500 à au-dessous de 5,000 habitants elle était de \$4,418 en 1881, de \$6,913 en 1891, et de \$49,864 en 1901. Pour les mêmes années de recensement la valeur des produits par établissement dans les cités et villes de 5,000 habitants et plus était de \$18,586 en 1881, de \$16,762 en 1891 et de \$65,128

en 1901, et dans les villages et villes de 1,500 à au-dessous de 5,000 habitants elle était de \$8,823 en 1881, de \$9,001 en 1891 et de \$50,245 en 1901.

L'augmentation des moyennes du capital et des produits dans la dernière année de recensement est due en grande partie à ce que les plus petits établissements n'ont pas été énumérés; mais il n'y a aucun doute que l'accroissement des industries a été plus grand dans les districts urbains. Dans les cités, les villes et les villages le produit des établissements en 1881 était de \$198,017,874 du total de \$309,731,867 pour le Canada, soit 64 pour 100, en 1891 il était de \$310,911,527 du total de \$469,847,886 ou 66 pour 100, et en 1901 il était de \$363,319,603 du total de \$481,053,375 ou 75 pour 100.

Dans la cité de Toronto seule la valeur des produits d'établissements employant 5 personnes et plus, était de \$13,451,576 plus grande que celle de tous les établissements en 1891.

Les établissements manufacturiers ayant une production de \$200,000 et plus durant l'année de recensement sont donnés par industries au tableau 38 en trois groupes, savoir: établissements ayant (1) un produit de \$200,000 à au-dessous de \$500,000, (2) un produit de \$500,000 à au-dessous de \$1,000,000 et (3) un produit de \$1,000,000 et plus. Le premier de ces groupes représente 84 espèces d'industries et 323 établissements avec un produit total de \$94,531,698 et une moyenne de \$292,668 par établissement. Le second groupe représente 30 espèces d'industries et 68 établissements avec un produit total de \$46,729,825 et une moyenne de \$687,203 par établissement. Le troisième groupe représente 18 espèces d'industries et 39 établissements, avec un produit total de \$71,051,834 et une moyenne de \$1,821,842 par établissement. En tout 90 espèces d'industries sont représentées dans les trois groupes comprenant 430 établissements ayant un produit de \$200,000 et plus, dans l'année de recensement, avec un produit total de \$212,313,357 et une moyenne de \$493,752. Le nombre d'établissements ayant une production de moins de \$200,000 dans l'année de recensement est de 14,220, avec un produit total de \$268,740,018 et une moyenne de \$18,898 par établissement.

#### STATISTIQUES DES MANUFACTURES EN 1891 ET 1901 POUR LES ÉTABLISSEMENTS EMPLOYANT CINQ PERSONNES ET PLUS.

Une comparaison équitable des manufactures de 1891 et 1901 ne peut être faite que lorsque les termes sont égaux. Et en autant que le recensement de 1891 comprenait tous les établissements, grands et petits, et que celui de 1901 ne comprenait que les établissements employant cinq personnes et plus, il a été nécessaire de faire une compilation de tous les tableaux de 1891 afin d'en exclure tous les établissements ayant moins de cinq employés. Ce travail ayant été fait le résultat est donné au tableau XXII, (1) pour le nombre d'établissements, (2) pour le nombre d'employés, (3) pour les gages et les salaires, et (4) pour la valeur des produits. Amenés aux mêmes termes que les rapports de 1901, le nombre d'établissements en 1891 est réduit de 75,964 à 14,065, le nombre d'employés de 369,595 à 272,033, le coût des gages et des salaires de \$100,415,350 à \$79,234,311. et la valeur des produits de \$469,907,886 à \$368,696,623. Le nombre d'établissement employant moins de cinq personnes était de 61,899, le nombre d'employés

de 97,562, le coût des gages et des salaires de \$21,181,039 et la valeur des produits de \$101,211,163 <sup>1</sup>.

Des comparaisons sont faites au tableau xxiii entre les statistiques de 1891 et 1901 pour les établissements employant cinq personnes et plus par industrie, pour le Canada, sous les quatre en-têtes : établissements, employés, gages et produits, montrant une augmentation durant la décade de 585 dans le nombre d'établissements, de 72,062 dans le nombre d'employés, de \$34,015,039 dans le montant des gages et salaires des employés et de \$112,356,652 dans la valeur des produits. Le nombre d'industries représenté dans

<sup>1</sup> En analysant les tableaux de 1891 des erreurs ont été découvertes qui affectent jusqu'à un certain point les totaux pour cette année de recensement. Ces erreurs affectent six espèces d'industries, savoir : le coke, les cartouches, le cuir, le sucre, la métallurgie et les moulins à farine, et, tel que corrigé pour ce rapport, le total des employés est réduit de 661, les gages de \$248,300 et la valeur des produits de \$6,351,000.

ce tableau est de 179, les "toutes autres" non comprises, et nécessairement dans certains cas deux industries ou plus ont été groupées sous un même en-tête. Une comparaison entre les statistiques de 1891 et 1901 est faite au tableau 39 de quinze groupes d'industries, par employés, gages et valeurs des produits.

L'augmentation du nombre d'employés dans le groupe des produits alimentaires durant la décade était de 9,391, du montant des gages et salaires de \$4,642,765 et de la valeur des produits de \$49,243,633. La plus forte augmentation du groupe appar-

tient aux fabriques de beurre et de fromage qui ont doublé le nombre d'employés et où le coût des gages a augmenté de \$604,740 et la valeur des produits de \$18,764,523. L'augmentation la plus considérable venant ensuite appartient aux abattoirs et établissements de salaisons de viandes où le nombre d'employés a presque triplé et le coût des gages et la valeur des produits quadruplé.

Le second groupe, industries textiles, montre une augmentation de 17,405 dans le nombre d'employés, de \$6,746,756 dans le montant des gages et de \$12,980,597 dans la valeur des produits. L'industrie des habillements d'hommes et de femmes employait 6,494 personnes de plus en 1901 qu'en 1891, et la valeur des gages payés était de \$2,298,828 plus élevée qu'en 1891, mais la valeur des produits n'était que de \$713,506 plus élevée. Dans l'industrie des articles en laine les résultats sont encore moins favorables. Le nombre d'employés est de 86 moins élevé et la valeur des produits de \$485,845 en moins, tandis que le coût des gages est de \$228,879 plus élevé. L'industrie des tissus teints et finis est donnée séparément en 1901 avec un produit de \$2,051,992; en 1891 le produit des établissements de teinturerie était de \$345,504. Dans l'industrie des cotons il y a une augmentation de 3,394 dans les employés, de \$1,405,181 dans les gages et de \$3,291,328 dans les produits; dans les articles de toilette pour hommes l'augmentation des employés est de 2,372, celle des gages de \$737,601, et celle des produits de \$1,886,452; dans les chapelleries et pelletteries il y a une augmentation de 1,555 dans les employés, de \$709,288 dans les gages et de \$1,132,579 dans les produits; dans les établissements de bonneterie l'augmentation des employés est de 2,119, celle des gages de \$631,227 et celle des produits de \$2,109,734. Des progrès réels ont aussi été faits dans les manufactures de sacs en papier, de corderie et de vêtements en toile cirée.

Le groupe des produits du fer et de l'acier indique une augmentation de 6,096 dans le nombre d'employés, de \$3,426,352 dans les gages et de \$6,342,613 dans la valeur des produits. Les manufactures de haches et d'outils furent compilées avec celles de coutellerie et instruments tranchants en 1891 et les statistiques de ces industries mises ensemble pour 1901 indiquent que le nombre d'employés a augmenté de 615, le montant des gages de \$257,137 et la valeur des produits de \$308,476. L'industrie des ponts en fer et en acier a plus que doublé en nombre d'employés, coût des gages et valeur des produits, tandis que les fonderies n'ont fait aucun progrès. Les industries du fer et de l'acier montrent une augmentation de 1,565 en employés, de \$824,962 en gages et de \$2,555,727 en valeur des produits. La plus grande augmentation venant ensuite dans les industries de ce groupe se trouve dans celle des bouilloires et machines dont le nombre d'employés a augmenté de 1,691 à 4,028, le coût des gages de \$690,775 à \$1,845,574 et la valeur des produits de \$2,433,878 à \$4,626,214. Les presses à imprimer et l'industrie des étampes et coins employaient en 1891 127 personnes dont les gages étaient de \$54,330 et la valeur des produits de \$153,600. En 1901 l'industrie des presses à imprimer, des coins et moules employaient 345 personnes dont les gages s'élevaient à \$142,444 et la valeur des produits à \$395,735.

Le quatrième groupe, le bois et ses manufactures, occupe la première place en nombre de personnes employées ainsi que dans le montant payé en gages et salaires, mais vient en second après le groupe des produits alimentaires pour la valeur des produits. En comparant 1901 avec 1891 il y a une augmentation de 16,554 dans le nombre d'employés, de \$4,813,739 dans les gages et de \$7,544,779 dans les produits. Il y a des

augmentations dans presque toutes les industries de ce groupe, mais la plus grande se trouve dans les produits des billots (bois de construction, bardeau, etc.), et dans la pulpe de bois. L'augmentation des employés dans les premiers est de 9,341, celle des gages de \$1,784,387 et celle des produits de \$4,030,138, et dans la dernière l'augmentation des employés est de 2,280, celle des gages de \$883,983 et celle des produits de \$3,192,939.

Le groupe d 1 cuir et ses produits finis indique une augmentation de 4,745 dans le nombre d'employés, de \$2,556,281 dans les gages et de \$10,268,764 dans la valeur des produits. Dans l'industrie des chaussures l'augmentation des employés est de 2,112, celle des gages de \$1,418,446 et celle des produits de \$5,875,001, et dans l'industrie du cuir l'augmentation en employés est de 782, en gages de \$431,205 et en valeur des produits de \$2,356,819.

Le septième groupe comprend les liqueurs et les breuvages, et quoique le nombre des employés et le montant des gages soit réellement plus élevé en 1901 qu'en 1891 l'augmentation dans la valeur des produits n'est pas proportionnellement élevée. Dans les liqueurs distillées la valeur des produits est de \$579,182 moins élevée, ce qui est peut être le résultat d'avoir ajouté la taxe du revenu de l'intérieur à la valeur des produits des manufactures en 1891 : il y a une augmentation de 182 dans le nombre d'employés et de \$185,112 dans le montant des gages. Les liqueurs, malt, montrent une augmentation de 740 en employés, de \$505,575 en gages et de \$719,945 en produits.

Dans le huitième groupe, produits chimiques et composés, les employés montrent une augmentation de 972, les gages de \$726,938 et les produits de \$3,697,769. La seule industrie de ce groupe montrant une diminution dans le nombre d'employés, le montant des gages et la valeur des produits est celle des drogues. Les matières explosives indiquent aussi une faible diminution dans la valeur des produits ; dans les huiles il y a une augmentation de \$1,391,381, dans les peintures et vernis de \$985,983, dans les remèdes patentés de \$929,893 et dans l'empois de \$522,550.

Les produits de l'argile, du verre et de la pierre sont les moins satisfaisants de tous les groupes, vu qu'ils accusent des diminutions dans la plupart des principales industries. Le nombre d'employés est moindre de 1,371 en 1901, les gages de \$523,208, et les produits de \$2,875,776. La plus grande diminution se trouve dans l'industrie des monuments et pierres tombales.

Le groupe x montre que dans l'industrie des métaux le nombre d'employés a augmenté de 2,201 durant la décade, le montant des gages de \$1,613,353 et la valeur des produits de \$6,309,351. La plus grande augmentation se trouve dans les établissements de métallurgie (qui comprennent les hauts fourneaux). Dans cette industrie avec une augmentation de 215 dans le nombre des employés et de \$480,573 dans le montant des gages payés, il y a une augmentation de \$4,066,144 dans la valeur des produits. Dans les deux industries intimement liées de plomberie et ferblanterie et d'effets de plombiers, l'augmentation du nombre d'employés durant la décade est de 1,332, celle des gages de \$684,934 et celle de la valeur des produits de \$1,589,291. L'industrie des boîtes de montres qui est donnée séparément pour 1901, était probablement comprise dans celle d'orfèvrerie en 1891.

Le groupe des industries du tabac comprend la manufacture du tabac à chiquer, à fumer et à priser, ainsi que celle des cigares et cigarettes. Les employés dans ces indus-

tries ont augmenté de 1,726, les gages de \$1,169,524 et la valeur des produits de \$6,174,347.

Les groupes XII et XIII comprennent la construction des voitures et vaisseaux pour transport sur terre et par eau, bicyclettes, carrosserie, wagons de chemins de fer, navires et bateaux. Il y a une diminution inexplicable dans la construction des wagons de chemin de fer et dans la construction et radoubs de navires, mais les deux groupes mis ensemble accusent une augmentation de 5,127 dans le nombre d'employés, de \$2,712,139 dans le montant des gages et de \$2,666,030 dans la valeur des produits.

Les industries diverses sont groupées dans le tableau xiv. Celles dont les produits en 1891 dépassaient \$1,000,000 sont : instruments aratoires, appareils et effets électriques, lumière et force motrice électriques, gaz d'éclairage et de chauffage, gants et mitaines, instruments de musique, caoutchouc et articles élastiques, nettoyage et préparation des graines de semence, et savonnerie. Dans toutes les industries du groupe il y a une augmentation de 2,126 dans les employés, de \$1,923,174 dans les gages et de \$3,063,263 dans les produits. L'augmentation dans la valeur des instruments aratoires est de \$2,345,384, dans celle des appareils et effets électriques, et lumière et force motrice électriques de \$3,393,383, et dans celle des gants et mitaines de \$331,645. Dans les divers autres industries comprenant les établissements de moins de trois d'une même espèce il y a une diminution de \$6,203,673 dans la valeur des produits.

Le moindre de tous les groupes est celui des industries manuelles qui indique une diminution de \$381,714 dans la valeur des produits.

40. AUGMENTATION DES EMPLOYÉS, DES GAGES ET DE LA VALEUR DES PRODUITS EN 1901 SUR 1891  
PAR GROUPES D'INDUSTRIES.

<sup>1</sup>Diminution.

Le tableau 40 représente, par groupes d'industries, l'augmentation dans le nombre d'employés, dans le coût des gages et dans la valeur des produits, pour les établissements employant cinq personnes et plus en 1891 et 1901, et dont les statistiques sont données au tableau 39. Dans douze des groupes il y a augmentation des employés, des gages et des produits, et dans trois il y a diminution. Dans un groupe seulement, celui des liqueurs et breuvages, l'augmentation dans la valeur des produits est au-dessous de \$1,000,000; dans trois autres, ceux des produits chimiques et composés, des voitures pour transport sur terre et des industries diverses, elle est au-dessous de \$5,000,000; et dans huit autres elle est au-dessus de \$5,000,000. Le groupe des industries textiles est celui qui montre la plus grande augmentation dans le nombre des employés et dans le montant des gages, et la plus grande augmentation dans la valeur des produits appartient au groupe des produits alimentaires.

41. PROPORTIONS DES GAGES PAR RAPPORT À LA VALEUR DES PRODUITS ET VALEUR MOYENNE DES PRODUITS PAR EMPLOYÉ EN 1891 ET 1901, PAR GROUPES D'INDUSTRIES.

La proportion des gages par rapport à la valeur des produits pour les établissements employant cinq personnes et plus est donnée au tableau 41, pour 1891 et 1901, par groupes d'industries, ainsi que la moyenne des gages par employé et la valeur moyenne des produits par employé dans chaque groupe.

La proportion de 1891 pour toutes les industries est de 21·49 et celle de 1901 de 23·54. C'est-à-dire que pour chaque \$100 de produits en 1891 le montant des gages payés était de \$21.49 et en 1901 de \$23.54. Dans le groupe des produits alimentaires

cette proportion est donnée comme étant la plus basse, soit seulement de 8·13 en 1891 et de 8·64 en 1901 ; et dans le groupe des produits de l'argile, du verre et de la pierre elle est la plus élevée. Dans tous les groupes, excepté celui du tabac, il y a une augmentation dans la proportion des gages par rapport à la valeur des produits durant la décade.

Il y a un groupe seulement, celui des produits de l'argile, du verre et de la pierre, dans lequel la moyenne des gages par employé est moins élevée en 1901 qu'en 1891. Elle s'est élevée, pour toutes les industries, de \$291.27 à \$329.18, soit une augmentation de \$37.91. Les gages les moins élevés sont payés dans les manufactures de produits alimentaires où, en 1901, la moyenne n'était que de \$230.33 ; mais il y a eu une augmentation de \$65.90 durant la décade. Les gages les plus élevés se trouvent dans le groupe des liqueurs et breuvages où la moyenne est de \$524.64 en 1901, soit une augmentation de \$76.02 durant la décade. Mais la plus grande augmentation se trouve dans le groupe des produits chimiques et composés, étant de \$106.64, et la plus grande ensuite dans le groupe du tabac, étant de \$100 par employé. Dans les industries manuelles l'augmentation est de \$86.41, et dans le groupe des métaux et leurs produits elle est de \$70.26.

La valeur moyenne des produits par employé s'est élevée de \$1,355.34 en 1891 à \$1,398.29 en 1901, soit une augmentation de \$42.95 pour toutes les industries employant cinq personnes et plus. Dans le groupe des produits chimiques et composés, des métaux et leurs produits et du tabac et ses manufactures, la valeur moyenne des produits par employé est plus élevée en 1901 qu'en 1891, et dans les autres groupes elle est moindre. La valeur la plus élevée des produits par employé est dans le groupe des produits chimiques et composés, où elle a augmenté de \$3,044.66 en 1891 à \$3,254.78 en 1901 ; et la valeur la plus basse est dans le groupe des produits de l'argile, du verre et de la pierre où elle est tombée de \$814.63 à \$656.79. La plus grande augmentation dans la valeur des produits par employé se trouve dans le groupe des produits alimentaires, \$644.32 et la plus grande ensuite dans le groupe du tabac, \$619.63. Dans le groupe des industries textiles la valeur des produits par employé moins le coût des gages est de \$816.20 pour 1891 et de \$700.95 pour 1901 ; dans le groupe des produits alimentaires elle est de \$1,857.91 pour 1891 et de \$2,436.33 pour 1901 ; et dans toutes les industries elle est de \$1,064.07 pour 1891 et de \$1,069.11 pour 1901.

Le tableau 42 représente, par groupe d'industries, une comparaison des proportions du coût des gages, des matériaux et des dépenses diverses par rapport à la valeur des produits, au Canada et aux Etats-Unis, pour le dernier recensement de chaque pays. Pour toutes les industries la proportion des gages par rapport à la valeur des produits est de 23·54 au Canada et de 20·96 aux Etats-Unis, c'est-à-dire que pour chaque \$100 de produits il y a \$23.54 payés en gages au Canada et \$20.96 aux Etats-Unis. La proportion des matériaux par rapport aux produits est de 55·40 au Canada et de 54·27 aux Etats-Unis, ou une différence de \$1.13 en faveur de ce dernier pays. La proportion des dépenses diverses (comprenant le combustible et l'éclairage, les taxes municipales et provinciales, les taxes sur le revenu, le coût de l'ouvrage fait à l'entreprise, l'intérêt, l'assurance, etc.) est de 5·13 au Canada et de 10·12 aux Etats-Unis.

Dans tous les groupes, excepté ceux des produits de l'argile, du verre et de la pierre, et des voitures pour transport sur terre, la proportion des gages par rapport à la valeur des produits est plus élevée au Canada qu'aux Etats-Unis. La plus grande différence se

trouve dans le groupe des industries manuelles où elle est de 27·42, la plus grande ensuite est dans le groupe des métaux et leurs produits, 10·17. La plus petite différence est dans le groupe des produits de l'argile, du verre et de la pierre, 0·09, et la plus petite ensuite dans le groupe des voitures pour transport sur terre, 0·23, dont les proportions dans les deux cas sont plus élevées aux Etats-Unis qu'au Canada.

42. PROPORTION DU COÛT DES GAGES, DES MATÉRIAUX ET DES DÉPENSES DIVERSES PAR RAPPORT À LA VALEUR DES PRODUITS AU CANADA ET AUX ÉTATS-UNIS, PAR GROUPES D'INDUSTRIES.

(1) Dans le calcul des proportions pour les Etats-Unis le fret a été ajouté aux matériaux, tandis que le combustible, le loyer de la force motrice et du chauffage et les fournitures de fabriques ont été ajoutés aux dépenses diverses, de manière à mettre les items comprenant le coût des matériaux et des dépenses diverses sur le même pied d'uniformité que ceux du Canada.

Dans le groupe étendu des produits alimentaires qui forme 26 pour cent de la valeur totale de tous les produits manufacturés au Canada et 17 pour cent de ceux qui sont manufacturés aux Etats-Unis, la différence est de 1·21, soit une proportion de 8·64 au Canada et de 7·43 aux Etats-Unis.

Dans tous les groupes, excepté ceux de papeterie et imprimerie, liqueurs et breuvages et voitures pour transport sur terre, les proportions du coût des matériaux par rapport à la valeur des produits sont plus élevées aux Etats-Unis.

Dans les produits alimentaires la différence est seulement de 0·52 et dans les industries textiles de 1·30 ; tandis que dans le groupe des métaux et leurs produits elle est de 24·59, dans celui des produits du fer et de l'acier de 6·87 et dans celui des industries

manuelles de 17·72. La proportion des dépenses diverses par rapport à la valeur des produits est plus élevée aux Etats-Unis qu'au Canada pour tous les groupes d'industries, à l'exception de celui du tabac, et la différence dans ce groupe n'est seulement que de 1·11. Dans le groupe des industries textiles la proportion est plus élevée aux Etats-Unis de 5·23, dans celui du fer et de l'acier de 4·84, dans celui de papeterie et imprimerie de 8·00, dans celui de liqueurs et breuvages de 30·06, dans celui des produits chimiques et composés de 4·55, dans celui des produits de l'argile, du verre et de la pierre de 9·30 et dans celui des industries manuelles de 4·57. Dans tous les matériaux la proportion des gages par rapport à la valeur des produits au Canada est de 2·58 de plus qu'aux Etats-Unis et la proportion du coût des matériaux est plus élevée de 1·13, mais la proportion des dépenses diverses est moindre de 4·99. Au Canada il reste une proportion de 15·92 et aux Etats-Unis une proportion de 14·65 pour faire face aux autres dépenses et au profit de l'entreprise.

45 PROPORTION DU COÛT TOTAL DES GAGES, DES MATÉRIAUX ET DES DÉPENSES DIVERSES PAR RAPPORT À LA VALEUR DES PRODUITS, ET MOYENNE DES GAGES PAR EMPLOYÉ, AU CANADA ET AUX ETATS-UNIS, PAR GROUPES D'INDUSTRIES.

Industries manuelles.....	82.12	76.99	453.30	522.71
Toutes autres industries.....	84.07	85.35	329.18	477.82

Le tableau 43 donne, par groupes d'industries, les proportions du coût total des gages, des matériaux et des dépenses diverses par rapport à la valeur des produits au Canada et aux Etats-Unis, ainsi que la moyenne des gages par employé dans chaque pays pour chaque groupe d'industries. La proportion moyenne pour toutes les industries du Canada est de 84·07 et celle des Etats-Unis de 85·35, c'est-à-dire que pour chaque \$100 de valeur des produits le coût des gages, des matériaux et des dépenses

diverses s'élève à \$84.07 au Canada et à \$85.35 aux Etats-Unis. La plus haute proportion se trouve dans le groupe des produits alimentaires, 90.71 pour le Canada et 91.60 pour les Etats-Unis. La proportion la plus basse au Canada est dans les produits de l'argile, du verre et de la pierre, 61.18, et aux Etats-Unis dans les industries manuelles, 76.99. Il y a de curieuses différences, comme dans les métaux et leurs produits, avec une proportion de 69.27 au Canada et de 84.27 aux Etats-Unis; et dans les produits de l'argile, du verre et de la pierre, avec une proportion de 61.18 au Canada et de 80.57 aux Etats-Unis; et dans les liqueurs et breuvages, avec une proportion de 73.55 au Canada et de 85.69 aux Etats-Unis. Il semblerait que dans ces groupes d'industries les opérations peuvent être poursuivies de manière à laisser une plus large marge de profits dans ce pays qu'aux Etats-Unis; mais dans la plupart des groupes les proportions se rapprochent assez les unes des autres.

La moyenne des gages pour toutes les industries semble indiquer que l'avantage est du côté du manufacturier Canadien, vu que le coût des gages par employé est de \$148.56 moins élevé chez lui que chez le manufacturier américain. Mais le travail à bon marché n'est pas toujours un avantage dans la poursuite des industries, et la question mérite d'être étudiée. Pourquoi la moyenne du prix du travail, dans tous les groupes d'industries, est-elle moins élevée au Canada qu'aux Etats-Unis—deux pays voisins l'un de l'autre et habités par les mêmes races d'hommes employés dans les mêmes industries? C'est peut-être dû au coût moins élevé de la vie dans un pays que dans l'autre, ou à moins d'habileté dans le travail, ou à un nombre relativement plus grand de travailleurs, ou à une plus petite marge de profit sur une production plus étendue—quoique la proportion des gages par rapport à la valeur des produits soit de 2.58 moins élevée aux Etats-Unis qu'elle ne l'est au Canada, tel que l'indique le tableau 42. Mais dans les pays aux grandes industries ayant des capitaux et des produits multipliés à millions, l'avantage des conditions est presque sûr de prévaloir. Ceci est indiqué par la proportion du capital à la valeur des produits qui est de 75.50 aux Etats-Unis et de 92.50 au Canada; de même que par la valeur moyenne des produits par employé qui est de \$2,279 aux Etats-Unis et de \$1,398 au Canada. Généralement, et dans de semblables conditions, le volume des affaires détermine l'avantage définitif.

NOTE—The census statistics in this table for 1881 and 1891 are for all shops and factories, irrespective of the number of persons employed in them; and in 1901 they are only for shops and factories employing five hands and over, except dairy factories and clay works for which under the instructions to enumerators statistics were taken without limitation of the number of persons employed. Employees include all persons of the administrative and working forces in establishments.

NOTE.—Les statistiques de ce tableau pour 1881 et 1891 représentent toutes les boutiques et fabriques indépendamment du nombre de personnes qui y sont employées; et pour 1901 elles représentent seulement les boutiques et fabriques employant cinq personnes et au-dessus, excepté les fabriques de beurre et de fromage et les établissements d'argile qui, d'après les instructions aux énumérateurs, ont été pris sans limitation quant au nombre de personnes employées. La colonne des "employés" contient toutes personnes appartenant aux forces administratives et industrielles des établissements.

NOTE.—The census statistics in this table for 1881 and 1891 are for all shops and factories, irrespective of the number of persons employed in them; and in 1901 there are only for shops and factories employing five hands and over, except dairy factories and clay works for which, under the instructions to enumerators, statistics were taken without limitation of the number of persons employed. Employees include all persons of the administrative and working forces in establishments.

NOTE.—Les statistiques de ce tableau pour 1881 et 1891 représentent toutes les boutiques et fabriques indépendamment du nombre de personnes qui y sont employées, et pour 1901 elles représentent seulement les boutiques et fabriques employant cinq personnes et au-dessus, excepté les fabriques de beurre et de fromage et les établissements d'arrille qui, d'après les instructions aux énumérateurs, ont été pris sans limitation quant au nombre d'employés. La colonne des "employés" contient toutes personnes appartenant aux industries des établissements.

NOTE—The census statistics in this table for 1881 and 1891 are for all shops and factories, irrespective of the number of persons employed in them; and in 1901 they are only for shops and factories employing five hands and over, except dairy factories and clay works, for which under the instructions to enumerators they were taken without limitation of the number of persons employed. Employees include all persons of the administrative and working forces in establishments.

NOTE—Les statistiques de ce tableau pour 1881 et 1891 représentent toutes les boutiques et fabriques indépendamment du nombre de personnes qui y sont employées; et pour 1901 elles représentent seulement les boutiques et fabriques employant cinq personnes et au-dessus, excepté les fabriques de beurre et de fromage et les établissements d'argile qui, d'après les instructions aux énumérateurs, ont été pris sans limitation quant au nombre de personnes employées. La colonne des "employés" contient toutes tenant aux forces administratives et industrielles des établissements.

<sup>1</sup> Le signe en moins (—) placé devant un nombre ou montant indique une diminution durant la décade

<sup>2</sup> Mis pour comparaison avec coutellerie et instruments tranchants.

<sup>3</sup> Comprend pour comparaison les courroies et tuyaux en caoutchouc.

<sup>4</sup> Comprend 23 fonderies de fer et de cuivre en 1891.

<sup>5</sup> Comprend toutes les fabriques en 1891 et en 1901.

<sup>6</sup> Pour comparaison les fabriques de wagons de chemin de fer.
